The Phenomenological Movement Volume 2 A Historical Introduction:

The Phenomenological Movement Herbert Spiegelberg, 2013-12-01 *Heidegger, Metaphysics and the Univocity of Being* Philip Tonner, 2011-10-27 In *Heidegger Metaphysics and the Univocity of Being* Philip Tonner presents an interpretation of the philosophy of Martin Heidegger in terms of the doctrine of the univocity of being According to the doctrine of univocity there is a fundamental concept of being that is truly predicable of everything that exists This book explores Heidegger's engagement with the work of John Duns Scotus who raised philosophical univocity to its historical apotheosis Early in his career Heidegger wrote a book length study of what he took to be a philosophical text of Duns Scotus Yet the word univocity rarely features in translations of Heidegger's works Tonner shows by way of a comprehensive discussion of Heidegger's philosophy that a univocal notion of being in fact plays a distinctive and crucial role in his thought This book thus presents a novel interpretation of Heidegger's work as a whole that builds on a suggested interpretation by Gilles Deleuze in *Difference and Repetition* and casts a new light on Heidegger's philosophy clearly illuminating his debt to Duns Scotus **The Cambridge History of Modern European Thought: Volume 2, The Twentieth Century** Peter E.

Gordon, Warren Breckman, 2019-08-29 The *Cambridge History of Modern European Thought* is an authoritative and comprehensive exploration of the themes thinkers and movements that shaped our intellectual world in the late eighteenth and nineteenth century Representing both individual figures and the contexts within which they developed their ideas each essay is written in a clear accessible style by leading scholars in the field and offers both originality and interpretive insight This second volume surveys twentieth century European intellectual history conceived as a crisis in modernity Comprised of twenty one chapters it focuses on figures such as Freud Heidegger Adorno and Arendt surveys major schools of thought including Phenomenology Existentialism and Conservatism and discusses critical movements such as Postcolonialism Structuralism and Post structuralism Renouncing a single master narrative of European thought across the period Peter E Gordon and Warren Breckman establish a formidable new multi faceted vision of European intellectual history for the global modern age *Becoming Beauvoir* Kate Kirkpatrick, 2019-08-22 PROSE Award for Excellence in Biography and Autobiography Finalist 2020 One is not born a woman but becomes one Simone de Beauvoir A symbol of liberated womanhood Simone de Beauvoir's unconventional relationships inspired and scandalised her generation A philosopher writer and feminist icon she won prestigious literary prizes and transformed the way we think about gender with *The Second Sex* But despite her successes she wondered if she had sold herself short Her liaison with Jean Paul Sartre has been billed as one of the most legendary love affairs of the twentieth century But for Beauvoir it came at a cost for decades she was dismissed as an unoriginal thinker who applied Sartre's ideas In recent years new material has come to light revealing the ingenuity of Beauvoir's own philosophy and the importance of other lovers in her life This ground breaking biography draws on never before published diaries and letters to tell the fascinating story of how Simone de Beauvoir became herself The

represent the development of the studies devoted to Husserlian Phenomenology in the U S with a focus of the Regional Phenomenological Schools

The Context of the Phenomenological Movement E. Spiegelberg, 2013-03-09 This is an unashamed collection of studies grown but not planned before hand whose belated unity stems from an unconscious pattern of which I was not aware at the time of writing I call it unashamed not only because I have made no effort to patch up this collection by completely new pieces but also because there seems to me nothing shamefully wrong about following up some loose ends left dangling from my main study of the Phenomenological Movement which I had to cut off from the body of my account in order to preserve its unity and proportion This disclaimer does not mean that there is no connection among the pieces here assembled They belong together while not requiring consecutive reading as attempts to establish common ground 11nd lines of communication between the Phenomenological Movement and related enterprises in philosophy They are not put together arbitrarily but because of intrinsic affinities to phenomenology This does not mean an attempt to blur its edges But since they are growing edges any boundaries cannot be drawn sharply without interfering with the phenomena Nevertheless in the end the figure of the Phenomenological Movement should stand out more distinctly as the text against its surrounding context of which these studies are to provide some of the comparative and historical background This is why I gave to this collection the title The Context of the Phenomenological Movement in contrast to the central text as contained in my historical introduction to this movement

The Husserlian Mind Hanne Jacobs, 2021-07-20 Edmund Husserl 1859 1938 is widely regarded as the principal founder of phenomenology one of the most important movements in twentieth century philosophy His work inspired subsequent figures such as Martin Heidegger his most renowned pupil as well as Jean Paul Sartre and Maurice Merleau Ponty all of whom engaged with and developed his insights in significant ways His work on fundamental problems such as intentionality consciousness and subjectivity continues to animate philosophical research and argument The Husserlian Mind is an outstanding reference source to the full range of Husserl's philosophy Forty chapters by a team of international contributors are divided into seven clear parts covering the following areas major works phenomenological method phenomenology of consciousness epistemology ethics and social and political philosophy philosophy of science metaphysics Contained in these sections are chapters on many of the key aspects of Husserl's thought including intentionality transcendental philosophy reduction perception time self and subjectivity personhood logic psychology ontology and idealism Offering an unparalleled guide to the enormous range of his thought The Husserlian Mind is essential reading for students and scholars of Husserl phenomenology and the history of twentieth century philosophy It will also be of interest to those in related fields in the humanities social sciences and psychology and the cognitive sciences
