The Polarity Of Mexican Thought:

The Polarity of Mexican Thought Michael A. Weinstein, 1976 Mexican thinkers in recent generations have sought a philosophy emphasizing the ends of human activity finalism as contrasted with one stressing means or techniques instrumentalism According to Professor Weinstein's interpretation an integrated perspective toward all aspects of the human condition characterizes Mexican philosophy and social thought incorporating close attention to the aesthetic dimension of human experience and the tensions of human existence The distinctive Mexican world view provides a needed supplement to the analytical approach of North American philosophy and Marxist determinism Michael A. Weinstein Robert L.

Oprisko, Diane Rubenstein, 2014-12-05 This book is a major reassessment of Michael Weinstein's political philosophy It situates his singular contribution designated as critical vitalism in the context of both canonical American and contemporary continental theory Weinstein is presented as a philosopher of life and as an American Nietzsche Yet the contributors also persuasively argue for this form of thinking as a prescient prophecy addressing contemporary society's concern over the management of life as well as the technological changes that both threaten and sustain intimacy This is the first full scale study of Weinstein's work which reveals surprising aspects of a philosophic journey that has encompassed most of the major American pragmatic or vitalist or Continental phenomenological or existential traditions Weinstein is read as a comparative political theorist a precursor to post structuralism and as a post colonial border theorist A different aspect of his oeuvre is highlighted in each of the book's three sections The opening essays comprising the Action diptych contrasts meditative versus extrapolative approaches Contemplation stages a series of encounters between Weinstein and his philosophic interlocutors Vitalism presents Weinstein as a teacher media analyst musician and performance artist The book contains an epilogue written by Weinstein in response to the contributors **Mexican Philosophy in the 20th Century** Carlos Alberto

The Suspension of Seriousness Carlos Alberto Sánchez, 2012-12-15 The Suspension of

Seriousness engages the Mexican philosopher Jorge Portilla 1919 1963 taking note of Portilla's philosophical methodology insights and contributions to our understanding of value being and subjectivity Portilla lived a short troubled life and never held a teaching appointment but his works though few in number were nevertheless philosophically penetrating He is a legendary character in the Mexican popular imagination of the 1940s and 50s but little has been written about him or his philosophy His posthumously published *Fenomenología del relato* is a phenomenological analysis of what Portilla calls *relato* or the state we assume when we do not want to do what is seriously being asked of us what is demanded of us It is Portilla says the suspension of seriousness Carlos Alberto Sánchez uses Portilla's *Fenomenología del relato* as a point of departure to consider the dangers both of our uncritical adherence to values as well as our urge to reject values altogether He argues that Portilla provides a framework in which to situate the modern condition ourselves and our future The first authorized English translation of Portilla's *Fenomenología del relato* is included

The Role of History in Latin American Philosophy

Arleen Salles, Elizabeth Millán, 2012-02-01 This book brings the history of Latin American philosophy to an English speaking audience through the prominent voices of Mauricio Beuchot Horacio Cerutti Guldberg María Luisa Femenías Jorge J E Gracia Oscar R Martínez Oliv Carlos Pereda and Eduardo Rabossi They argue that Spanish is not a philosophically irrelevant language and that there are original positions to be found in the work of Latin American philosophers Part I of the book looks at why the history of philosophy has not developed in Latin America A range of theoretical issues are explored each focusing on specific problems that have hindered the development of a solid history Part II details the complex task of writing a history of philosophy for a region still haunted by the specter of colonialism

Magistrates of the Sacred William B.

Taylor, 1996 This book is an extraordinarily rich account of the social political cultural and religious relationships between parish priests and their parishioners in colonial Mexico It thus explores a wide range of issues from competing interpretations of religious dogma and beliefs to questions of practical ethics and daily behavior to the texture of social and authority relations in rural communities to how all these things changed over time and over place and in relation to reforms instigated by the state

The Artist and Political Vision

Benjamin R. Barber, Michael J. Gargas McGrath, Art and politics are often regarded as denizens of different realms but few artists have been comfortable with the notion of a purely aesthetic definition of art The artist has a public and thus political vision of the world interpreted by his art no less than the statesman and the legislator have a creative vision of the world they wish to make The sixteen original essays in this volume bear eloquent witness to this interpenetration of art and politics Each confronts the intersection of the aesthetic and the social each is concerned with the interface of poetic vision and political vision of reflection and action They take art in the broadest sense ranging over poets dramatists novelists essayists and filmmakers Their focus is on art and its political dilemmas not simply on the artist They consider the issues raised for politics and culture by alienation violence modernization technology democracy progress and revolution And they debate the capacity of art to stimulate social change and incite revolution the

temptations of social control of culture and of political censorship the uncertain relationship between art and history the impact of economic structure on artistic creation and of economic class on artistic product the common ground between art and legislation and between creativity and control Catalog of Copyright Entries. Rethinking Philosophy with Borges, Zambrano, Paz, and Plato Hugo Moreno, 2022-02-16 In *Rethinking Philosophy with Borges Zambrano Paz and Plato* Hugo Moreno argues that in *Ficciones Claros del bosque* and *El mono gram tico* Jorge Luis Borges Mar a Zambrano and Octavio Paz practice a literary way of philosophizing a way of seeking and communicating knowledge of reality that takes up analogical procedures They deploy analogy as an indispensable and irreplaceable heuristic tool and literary device to convey their insight and perplexities on the nature of existence Borges ironic approach involves reading and writing philosophy as fiction Zambrano s poetic reason is a mode of writing and thinking based on an imaginative sort of recollection that is ultimately a visionary s poetizing technique Paz s poetic thinking relies on analogy to correlate and harmonize an array of worldviews ideas and discourses In the appendix Moreno shows that Plato s *Republic* is a forerunner of this way of philosophizing in literature Moreno suggests that in the *Republic* Plato reconciles philosophy and poetry and creates a rational prose poetry that fuses argumentation and narration dialectical and analogical reasoning and abstract concepts and poetic images

Understanding Mexicans and Americans Rogelio Diaz-Guerrero, Lorand B. Szalay, 2013-11-11 The Communication Lexicon is a new concept it is a new source of information in the field of language and area studies Its focus is on people s way of thinking their frame of reference their characteristic outlook on life Compared to the more traditional area studies our main focus is not on history or religion or geography not on tangible material realities of existence in a particular country but rather on people s shared subjective views of those real ities which are dominant in their minds The focus of the analysis is essentially psychological it is centered on perceptions and motivations which influence people s choices and behavior Compared to individual psychology the information represented by this volume is psycho cultural in that it is centered on the shared perceptions and motivations which people with the same language backgrounds and experiences develop together into a shared cultural view or subjective representation of their universe The attention psycho cultural factors are receiving these days follows from the growing realization that their influences are powerful and yet they occur without people s awareness Based on extensive empirical data produced through an analytic technique of indepth assessment the Communication Lexicon presents the culturally characteristic system of meanings which members of a particular cultural community develop in construing their world At the level of specifics the lexicon describes how selected themes such as family society work and entertainment are perceived and understood by members of three cultures Mexicans Colombians and U S

Meaning and Appreciation Michael A. Weinstein, 1978 The great crisis of twentieth century philosophy has been the loss of meaning as a criterion for conduct With the collapse of the historical sociologies of the nineteenth century and their replacement by relativistic doctrines contemporary thought has retreated to the fleeting present moment as the ground for describing action In *Meaning and Appreciation* Michael Weinstein traces the history of the failure of historical meaning showing how the disappearance of collective purpose has altered our sense of time and made us aware that we are the creators of our time perspectives Drawing upon the vitalistic tradition of Bergson Weinstein returns to the intuition of the *dur e* and argues that beneath practical life we are rooted in successive lived presents Weinstein identifies the lived present with appreciation arguing that the life of expression not nihilism lies beyond the wreckage of historical teleology The climax of Weinstein s work is an original vision of human existence in which our essence is to express one another to ourselves Vindicating our

intrinsic sociality against the abstract and mechanistic claims of both individualism and collectivism the author argues that our destiny is not to project meanings into a symbolic future but to attend to and care for one another in the present Weinstein's sensitive analysis offers new insights into such contemporary movements as existentialism the sociology of knowledge and cultural philosophy evaluating all of them in terms of the fundamental tension in our society

Do the Americas Have a Common Literature? Gustavo Pérez Firmat, 1990 This volume takes an important step toward the discovery of a common critical heritage that joins the diverse literatures of North America and Latin America Traditionally literary criticism has treated the literature of the Americas as New World literature examining it in relation to its Old World usually European counterparts This collection of essays redirects the Eurocentric focus of earlier scholarship and identifies a distinctive pan American consciousness The essays here place the literature of the Americas in a hemispheric context by drawing on approaches derived from various schools of contemporary critical thought Marxism feminism culture studies semiotics reception aesthetics and poststructuralism As part of their search for a distinctly New World literary idiom the contributors engage not only the major North American and Spanish American writers but also such marginal or minor literatures as Chicano African American Brazilian and Québécois In identifying areas of agreement and confluence this work lays the groundwork for finding historical ideological and cultural homogeneity in the imaginative writing of the Americas Contributors Lois Parkinson Zamora David T.
