The Politics Of Shared Power:

The Politics of Shared Power Louis Fisher, 1998 As Congress and the president battle out the federal deficit foreign involvements health care and other policies of grave national import the underlying constitutional issue is always the separation of powers doctrine In *The Politics of Shared Power* a classic text in the field of executive legislative relations Louis Fisher explains clearly and perceptively the points at which congressional and presidential interests converge and diverge the institutional patterns that persist from one administration and one Congress to another and the partisan dimensions resulting from the two party system Fisher also discusses the role of the courts in reviewing cases brought to them by members of Congress the president agency heads and political activists illustrating how court decisions affect the allocation of federal funds and the development and implementation of public policy He examines how the president participates as legislator and how Congress intervenes in administrative matters Separate chapters on the bureaucracy the independent regulatory commissions and the budgetary process probe these questions from different angles The new fourth edition addresses the line item veto and its tortuous history and prospects A chapter on war powers and foreign affairs studies executive legislative disputes that affect global relations including the Iran Contra affair the Persian Gulf War in 1991 and American presence in conflicts such as Haiti and Bosnia An important new discussion focuses on interbranch collisions and gridlock as they have developed since 1992

Shared Knowledge, Shared Power Veysel Apaydin, 2017-11-20 This volume brings together the experiences and research of heritage practitioners archaeologists and educators to explore new and unique approaches to heritage studies The last several decades have witnessed a rapid increase in the field of cultural heritage studies worldwide This increase in the number of studies and in interest by the public as well as academics has effected substantial change in the understanding of heritage and approaches to heritage studies This change has also impacted the perception of communities how to study and protect the physical residues of heritage and how to share the knowledge of heritage It has brought the issue of who has knowledge and how the value of heritage can be shared more effectively with communities who then ascribe meaning and value to heritage materials Heritage studies until a few decades ago exclusively studied the material culture of the past as part of elitist approaches that completely neglected communities rights to knowledge of their own heritage Additionally heritage practitioners and archaeologists neither shared this knowledge nor engaged with communities about their heritage Communities were also mostly deprived from contributing to heritage and archaeological studies This kind of top down approach was quite common in many parts of the world But recent studies and research in the field have shown the importance of including the public in projects and that sharing the knowledge produced through heritage studies and archaeological works is significant for the protection and preservation of heritage materials it has finally been understood that excluding the public from heritage is not ethical This publication presents a wide array of case studies with different approaches and methods from many parts of the world to answer these

American Foreign Policy and The Politics of Fear A. Trevor Thrall, Jane K. Cramer, 2009-05-07 This edited volume addresses the issue of threat inflation in American foreign policy and domestic politics The Bush administration's aggressive campaign to build public support for an invasion of Iraq reheated fears about the president's ability to manipulate the public and many charged the administration with threat inflation duping the news media and misleading the public into supporting the war under false pretences Presenting the latest research these essays seek to answer the question of why threat inflation occurs and when it will be successful Simply defined it is the effort by elites to create concern for a threat that goes beyond the scope and urgency that disinterested analysis would justify More broadly the process concerns how elites view threats the political uses of threat inflation the politics of threat framing among competing elites and how the public interprets and perceives threats via the news media The war with Iraq gets special attention in this volume along with the War on Terror Although many believe that the Bush administration successfully inflated the Iraq threat there is not a neat consensus about why this was successful Through both theoretical contributions and case studies this book showcases the four major explanations of threat inflation realism domestic politics psychology and constructivism and makes them confront one another directly The result is a richer appreciation of this important dynamic in US politics and foreign policy present and future This book will be of much interests to students of US foreign and national security policy international security strategic studies and IR in general Trevor Thrall is Assistant Professor of Political Science and directs the Master of Public Policy program at the University of Michigan Dearborn Jane Kellett Cramer is an Assistant Professor of Political Science at the University of Oregon
