

The Predatory Behavior Of Wild Chimpanzees

Thomas Gregor

The Predatory Behavior Of Wild Chimpanzees:

The Predatory Behavior of Wild Chimpanzees Geza Teleki, 1973 Geza Teleki has spent two years observing wild chimpanzees at very close quarters in the Gombe National Park of Tanzania. He has compiled this report on predatory behavior based in part upon a decade of observations by a research team living in the park but primarily upon numerous episodes he observed since early 1968. Illustrated **Chimpanzee Behavior in the Wild** Toshisada Nishida, Koichiro Zamma, Takahisa Matsusaka, Agumi Inaba, William C. McGrew, 2010-09-15 Where We Stand Field workers/scientists of animal behavior including human behavior in nature have long been fascinated by wild chimpanzees. A person who once has studied wild chimpanzees will be eager to observe them again. A person who has studied them twice will make every effort to continue the study unless prevented from doing so. In short, behavioral primatology is addictive. Many people among them Jane Goodall, Richard Wrangham, and I do not regret that they have dedicated their whole lives to the study of wild chimpanzees. This is because the apes' behavior is always challenging. Chimpanzees are cheerful, charming, playful, curious, beautiful, easygoing, generous, tolerant, and trustworthy most of the time but also are cautious, cunning, ugly, violent, ferocious, bloated, thirsty, greedy, and disloyal at other times. We human beings share both the light and dark sides with our closest living relatives. For decades we have documented huge across-population variation in behavior as well as within-population variation. Cultural biology, now called cultural primatology as proposed 60 years ago by Kinji Imanishi, recently has flourished. *Wild Chimpanzees* Adam Clark Arcadi, 2018-06-21 An introduction to chimpanzee behavior and conservation synthesizing findings from long-term field studies in the African rainforest belt. [The Chimpanzees of the Taï Forest](#) Christophe Boesch, Hedwige Boesch-Achermann, 2000 The chimpanzees are the closest living evolutionary relatives to our own species, *Homo sapiens*. As such, they have long exerted a fascination over those with an interest in human evolution and what makes humans unique. Christophe Boesch and Hedwige Boesch-Achermann undertook an incredible observational study of a group of wild chimpanzees of the Tai forest in Côte d'Ivoire, spending some fifteen years in the West African jungle with them. This fascinating book is the result of these years of painstaking research. Chimpanzee behavior is documented here in all its impressive diversity and variety. Aggression, territoriality, social structure, and relationships, reproductive strategies, hunting, tool use—each of these is given its own chapter along with topics such as chimpanzee intelligence, life histories, and demography. The authors take care to place their observations within the broader context of research in behavioral ecology and to compare and contrast their findings with other important work on chimpanzee groups such as that by Jane Goodall. The book concludes with a summary chapter relating the chimpanzee findings to our understanding of human evolution. Combining careful scientific observation with a store of entertaining anecdotes, this is a lively and readable book. It also succeeds in shedding light on some of the central questions around the evolutionary relationships between the primates and, in particular, the affinity between chimpanzees and humans. This is a major contribution to the study of the great apes.

and a significant addition to debates about human ape evolution It has all the makings of a classic monograph

Early Hominin Paleoecology Matt Sponheimer, Julia A. Lee-Thorp, Kaye E. Reed, Peter Ungar, 2013-05-15 An introduction to the multidisciplinary field of hominin paleoecology for advanced undergraduate students and beginning graduate students Early Hominin Paleoecology offers an up to date review of the relevant literature exploring new research and synthesizing old and new ideas Recent advances in the field and the laboratory are not only improving our understanding of human evolution but are also transforming it Given the increasing specialization of the individual fields of study in hominin paleontology communicating research results and data is difficult especially to a broad audience of graduate students advanced undergraduates and the interested public Early Hominin Paleoecology provides a good working knowledge of the subject while also presenting a solid grounding in the sundry ways this knowledge has been constructed The book is divided into three sections climate and environment with a particular focus on the latter adaptation and behavior and modern analogs and models and features contributors from various fields of study including archaeology primatology paleoclimatology sedimentology and geochemistry Early Hominin Paleoecology is an accessible entrance into this fascinating and ever evolving field and will be essential to any student interested in pursuing research in human paleoecology

Chimpanzee Cultures Richard W. Wrangham, 1996 Compares and contrasts the ecology social relations and cognition of chimpanzees bonobos and occasionally gorillas

What is an Animal? Tim Ingold, 2016-04-29 This book offers a unique interdisciplinary challenge to assumptions about animals and animality deeply embedded in our own ways of thought and at the same time exposes highly sensitive and largely unexplored aspects of the understanding of our common humanity

Chimpanzees of the Lakeshore Toshisada Nishida, 2011-12-01 Chimpanzees are humanity's closest living relations and are of enduring interest to a range of sciences from anthropology to zoology In the West many know of the pioneering work of Jane Goodall whose studies of these apes at Gombe in Tanzania are justly famous Less well known but equally important are the studies carried out by Toshisada Nishida on the eastern shore of Lake Tanganyika Comparison between the two sites yields both notable similarities and startling contrasts Nishida has written a comprehensive synthesis of his work on the behaviour and ecology of the chimpanzees of the Mahale Mountains With topics ranging from individual development to population specific behavioural patterns it reveals the complexity of social life from male struggles for dominant status to female travails in raising offspring Richly illustrated the author blends anecdotes with powerful data to explore the fascinating world of the chimpanzees of the lakeshore

[The Chimpanzees of the Budongo Forest](#) Vernon Reynolds, 2005-06-30 Unlike humans who came down from the trees and developed bipedal locomotion chimpanzees have remained in the original habitat of our ancestors the tropical rainforests of Africa In this book Vernon Reynolds describes in detail the work of a large number of students and senior researchers on the wild chimpanzees of the Budongo Forest Reserve in Western Uganda The result is the most comprehensive account of the Budongo chimpanzees ever published with a wealth of referenced material that will serve as a

source of information for many years to come **A Natural History of Peace** Thomas Gregor, 1996 A stimulating and innovative consideration of the concept causes and practice of peace in societies both ancient and modern human and primate We know a great deal about aggression conflict and war but relatively little about peace partially because it has been such a scarce phenomenon throughout history and in our own times Peace is more than the absence of war Peace requires special relationships structures and attitudes to promote and protect it A Natural History of Peace provides the first broadly interdisciplinary examination of peace as viewed from the perspectives of social anthropology primatology archeology psychology political science and economics Among other notable features this volume offers a major theory concerning the evolution of peace and violence through human history an in depth comparative study of peaceful cultures with the goal of discovering what it is that makes them peaceful one of the earliest reports of a new theory of the organization and collapse of ancient Maya civilization a comparative examination of peace from the perspective of change including the transition of one of the world s most violent societies to a relatively peaceful culture and the decision making process of terrorists who abandon violence and a theory of political change that sees the conclusion of wars as uniquely creative periods in the evolution of peace among modern nations
