Woertendyke, 2016-06-02 In this broad ranging study Gretchen Woertendyke reconfigures US literary history as a product of hemispheric relations *Hemispheric Regionalism* Romance and the Geography of Genre brings together a rich archive of popular culture fugitive slave narratives advertisements political treatises and literature to construct a new literary history from a hemispheric and regional perspective At the center of this history is romance a popular and versatile literary genre uniquely capable of translating the threat posed by the Haitian Revolution or the expansionist possibilities of Cuban annexation for a rapidly increasing readership Through romance she traces imaginary and real circuits of exchange and remaps romance's position in nineteenth century life and letters as irreducible to nor fully mediated by a concept of nation The energies associated with Cuba and Haiti manifest destiny and apocalypse bring historical depth to an otherwise short national history As a result romance becomes remarkably influential in inculcating a

sense of new world citizenry The study shifts our critical focus from novel and nation to romance and region inevitable she argues when we attend to the tangled messy relations across geographic and historical boundaries Woertendyke reads the archives of Gabriel Prosser Nat Turner and Denmark Vesey along with less frequently treated writers such as John Howison William Gilmore Simms and J H Ingraham The study provides a new context for understanding works by Washington Irving Edgar Allan Poe Herman Melville and James Fenimore Cooper and brings together the theories of Charles Brockden Brown the editorial work of Maturin M Ballou and the historical romances of Walter Scott In *Hemispheric Regionalism* Woertendyke demonstrates that US literature has always been the product of hemispheric and regional relations and that all forms of romance are central to this history

*The Cambridge History of the*

*Book in Britain: Volume 6, 1830-1914* David McKitterick, 2009-03-05 The years 1830-1914 witnessed a revolution in the manufacture and use of books as great as that in the fifteenth century. Using new technology in printing, paper making and binding, publishers worked with authors and illustrators to meet ever growing and more varied demands from a population seeking books at all price levels. The essays by leading book historians in this volume show how books became cheap, how publishers used the magazine and newspaper markets to extend their influence, and how book ownership became universal for the first time. The fullest account ever published of the nineteenth century revolution in printing, publishing and bookselling, this volume brings *The Cambridge History of the Book in Britain* up to a point when the world of books took on a recognisably modern form.

*Time's Witness* Rosemary Hill, 2021-06-24 From the Wolfson Prize winning author of *God's Architect*, Pugin and the Building of Romantic Britain. Between the fall of the Bastille in 1789 and the opening of the Great Exhibition in 1851, history changed. The grand narratives of the Enlightenment, concerned with kings and statesmen, gave way to a new interest in the lives of ordinary people. Oral history, costume history, the history of food and furniture, of Gothic architecture, theatre, and much else, were explored as never before. Antiquarianism, the study of the material remains of the past, was not new, but now hundreds of men and some women became antiquaries, and set about rediscovering their national history in Britain, France, and Germany. The Romantic age valued facts, but it also valued imagination, and it brought both to the study of history. Among its achievements were the preservation of the Bayeux Tapestry, the analysis and dating of Gothic architecture, and the first publication of *Beowulf*. It dispelled old myths and gave us new ones: Shakespeare's birthplace, clan tartans, and the arrow in Harold's eye are among their legacies. From scholars to imposters, the dozen or so antiquaries at the heart of this book show us history in the making.

***The English Cult of Literature*** William R. McKelvy, 2007 What constitutes reading? This is the question William McKelvy asks in *The English Cult of Literature*. Is it a theory of interpretation or a physical activity, a process determined by hermeneutic destiny or by paper, ink, hands, and eyes? McKelvy seeks to transform the nineteenth century field of Religion and Literature into Reading and Religion, emphasizing both the material and the institutional contexts for each. In doing so, he hopes to recover the ways in which modern literary authority developed in dialogue with a politically reconfigured religious authority. The received wisdom has been that England's literary tradition was modernity's most promising religion, because the established forms of Christianity, wounded in the Enlightenment, inevitably gave up their hold on the imagination and on the political sphere. Through a series of case studies and analysis of a diverse range of writing, this work gives life to a very different story, one that shows literature assuming a religious vocation in concert with an increasingly unencumbered freedom of religious confession and the making of a reading nation. In the process, the author shifts attention away from the idea of the literary critic in favor of considering the historic role of religious professionals in shaping and contesting the authority of print. Indebted to recent findings of book history and newer historiographies at odds with conventional secularization theory, this work makes an interdisciplinary contribution to revising

the existing models for understanding change in Britain during the eighteenth and nineteenth centuries
