Sixteenth Century German Panel Paintings Janos Vegh, Susanna Horn, 1988-01 *Sixteenth Century German Panel Paintings* János Végh, 1972 **Sixteenth century German panel paintings** János Végh, 1972 **Sixteenth Century German Panel Paintings** János Végh, 1981 The Painted Triptychs of Fifteenth-Century Germany Lynn F. Jacobs, 2025-10-01 This book presents four case studies that interrogate how German fifteenth century painted triptychs engage with and ultimately blur various boundaries Some of the boundaries are internal to the triptych format for example transgressed frames between narrative scenes on triptych interiors or interconnections between imagery on triptych interiors and exteriors Other blurred boundaries are regional ones between the Netherlands and Cologne metaphysical ones between heaven and earth and artistic distinctions between the media of painting and sculpture The book's case studies which shed new light on Conrad von Soest Stefan Lochner and the Master of the St Bartholomew Altarpiece illuminate the importance of German fifteenth century painting while providing a fresh assessment of relations between German triptychs and their more famous Netherlandish counterparts The case studies also demonstrate the value of probing MediaLiterature that is the implications of format and medium for generating meaning A coda assesses the triptych in the age of Digital Media **A History of Madness in Sixteenth-Century Germany** H. C. Erik Midelfort, 1999 This magisterial work explores how Renaissance Germans understood and experienced madness It focuses on the insanity of the world in general but also on specific disorders examines the thinking on madness of theologians jurists and physicians and analyzes the vernacular ideas that propelled sufferers to seek help in pilgrimage or newly founded hospitals for the helplessly disordered In the process the author uses the history of madness as a lens to illuminate the history of the Renaissance the Reformation and Counter Reformation the history of poverty and social welfare and the history of princely courts state building and the civilizing process Rather than try to fit historical experience into modern psychiatric categories this book reconstructs the images and metaphors through which Renaissance Germans themselves understood and experienced mental illness and deviance ranging from such bizarre conditions as St Vitus's dance and demonic possession to such medical crises as melancholy and mania By examining the records of shrines and hospitals where the mad went for relief we hear the voices of the mad themselves For many religious Germans sin was a form of madness and the sinful world was thoroughly insane This book compares the thought of Martin Luther and the medical religious reformer Paracelsus who both believed that madness was a basic category of human experience For them and others the sixteenth century was an age of increasing demonic presence the demon possessed seemed to be everywhere For Renaissance physicians however the problem was finding the correct ancient Greek concepts to describe mental illness In medical terms the late sixteenth century was the age of melancholy For jurists the customary insanity defense did not clarify whether melancholy persons were responsible for their actions and they frequently solicited the advice of physicians Sixteenth century Germany was also an age of folly with fools filling a major role

in German art and literature and present at every prince and princeling's court The author analyzes what Renaissance Germans meant by folly and examines the lives and social contexts of several court fools **Sixteenth-century German Panel Paintings in Hungarian Collections** Janos Vegh,1972 **16th Century German Panel Paintings** J. Végh,1972
