Our Separate Ways Christina Greene,2006-03-13 In an in depth community study of women in the civil rights movement Christina Greene examines how several generations of black and white women low income as well as more affluent shaped the struggle for black freedom in Durham North Carolina In the city long known as the capital of the black middle class Greene finds that in fact low income African American women were the sustaining force for change Greene demonstrates that women activists frequently were more organized more militant and more numerous than their male counterparts They brought new approaches and strategies to protest leadership and racial politics Arguing that race was not automatically a unifying force Greene sheds new light on the class and gender fault lines within Durham s black community While middle class black leaders cautiously negotiated with whites in the boardroom low income black women were coordinating direct action in hair salons and neighborhood meetings Greene s analysis challenges scholars and activists to rethink the contours of grassroots activism in the struggle for racial and economic justice in postwar America She provides fresh insight into the changing nature of southern white liberalism and interracial alliances the desegregation of schools and public accommodations and the battle to end employment discrimination and urban poverty *Annual Report for Fiscal Year ...*

Shaping Biology Toby A. Appel,2000-07-03 Historians of the postwar transformation of science have focused largely on the physical sciences especially the relation of science to the military funding agencies In *Shaping Biology* Toby A Appel brings attention to the National Science Foundation and federal patronage of the biological sciences Scientists by training NSF biologists hoped in the 1950s that the new agency would become the federal government s chief patron for basic research in biology the only agency to fund the entire range of biology from molecules to natural history museums for its own sake Appel traces how this vision emerged and developed over the next two and a half decades from the activities of NSF s Division of Biological and Medical Sciences founded in 1952 through the cold war expansion of the 1950s and 1960s and the constraints of the Vietnam War era to its reorganization out of existence in 1975 This history of NSF highlights fundamental tensions in science policy that remain relevant today the pull between basic and applied science funding individuals versus

funding departments or institutions elitism versus distributive policies of funding issues of red tape and accountability In this NSF funded study Appel explores how the agency developed how it worked and what difference it made in shaping modern biology in the United States Based on formerly untapped archival sources as well as on interviews of participants and building upon prior historical literature *Shaping Biology* covers new ground and raises significant issues for further research on postwar biology and on federal funding of science in general Margaret Rossiter Cornell University author of *Women Scientists in America Before Affirmative Action* 1940 1972 **Serials Holdings** Linda Hall Library, 1989 *Reports and Documents* United States.
