Slough A Century Of Change:

Slough Peter Burgess,1999 **Slough** Peter Burgess,2005 Pocket Images Slough **A Century of Change in Music Education** Stephanie Pitts,2019-01-04 Published in 2000 Education in our schools is a constant feature of media headlines often blamed for many of society's ills Perceived throughout the ages as civilizing force music has a fundamental role to play in education yet the last twenty years have seen a consistent erosion of the time and money made available to music teachers in our schools This book is a timely reminder of how we have arrived at the current debates and challenges of music education Stephanie Pitts charts the history of music teaching in British secondary schools over the course of the twentieth century Each chapter looks at a significant period of music education history in which the ideas and practices of a generation were established and refined The main educational publications of each decade are examined from the early by MacPherson Somervell and Yorke Trotter to the more recent thinking of Paynter and Swanwick The shifting perceptions of music in the school curriculum are nowhere better highlighted than in the changing focus on children's engagement with music from the musical appreciation lessons of the 1920s and 1930s to the post war concentration on performance and the 1970s emphasis on improvisation and composition There and many other trends are discussed in the book allowing today's music educators to see their own practice in its historical context **A Century of Change** Orrin Grimmell Judd,1939 **A Half Century of Change in Bird Populations of the Lower Chippewa River, Wisconsin** Irven O. Buss,Helmer M. Mattison,1955 **Local Churches in New Urban Britain, 1890-1975** Grant Masom,2020-07-31 This monograph is an important contribution to our understanding of the varied fortunes of British Christianity during the twentieth century Rev Dr Andrew Atherstone Tutor in Church History and Latimer Research Fellow Wycliffe Hall University of Oxford UK This book is an important and original work Anyone interested in twentieth century Christianity in Britain will learn much from it Grant Masom enables the reader to make sense of the new urban spaces that became a key part of British life in the last hundred years Rev Dr David Goodhew Visiting Fellow of St Johns College Durham University UK This ground breaking study adds new depth to our understanding of the importance of religion in English life and the role of the churches in shaping their own destiny in the first three quarters of the twentieth century Dr Mark Smith Associate Professor in History University of Oxford UK This book contributes to the ongoing academic debates on secularisation or the marginalisation of mainstream religious beliefs and practices in twentieth century British society It addresses three areas in which the current literature is weak the agency of organised religion in the outcomes described as secularisation rather than explanations based on external challenges such as the modernisation of society and thought increased affluence and more leisure choices a focus on urban areas transformed by twentieth century industrialisation and suburbanisation and an extended time period to the end of the third quarter of the twentieth century allowing proper consideration of long term trends alongside short term upheavals such as the World Wars the Great Depression and the social changes of the 1960s Further the book employs a distinctly different highly data driven

approach considers all religious movements and sets its conclusions within the wider social and cultural context of a representative community

Global Change and Terrestrial Ecosystems Brian Harrison Walker, Will Steffen, 1996-11-13
 This major new book presents a collection of essays by leading authorities who address the current state of knowledge. The chapters bring together the early results of an international scientific research program designed to address what will happen to our ability to produce food and fiber and what effects there will be on biological diversity under rapid environmental change. This book addresses how these changes to terrestrial ecosystems will feed back to further environmental change. International in scope, this state-of-the-art assessment will interest policymakers, students, and scientists interested in global change, climate change, and biodiversity. Special features include descriptions of a dynamic global vegetation model, developing generic crop models, and a special section on the emerging discipline of global ecology.

Linguistic Change in French Rebecca Posner, 1997
 What is French and how has it changed over time? Can we distinguish language history from historical linguistics and language change from linguistic change? These questions are explored using copious material from the history of the French language, concentrating on changes in the relatively modern period. In particular, Posner explains how change comes about and how changes at different levels of language interact, and the role of sociological and ideological factors is set against the internal mechanisms that trigger change. This work makes a substantial contribution to the theory of linguistic change as well as to discussion of the relationship between language and history in French-speaking areas, including Canada and French Creole-speaking countries.

The Monterey Bay Shoreline Guide Jerry Emory, 1999
 Healthy oceans are critical to the future of all life on Earth, yet by and large the underwater world remains hidden to us, unknown and mysterious. The mission of the Monterey Bay Aquarium is to inspire conservation of the oceans, and this series of books is intended to further that goal. By helping people discover their connection with the natural world, we hope to foster a lifelong commitment to learning about and caring for the oceans on which all life depends.
