Mullin,Richard A. Seigel,2011-08-15 Destruction of

habitat due to urban sprawl pollution and deforestation has caused population declines or even extinction of many of the world's approximately 2,600 snake species. Furthermore, misconceptions about snakes have made them among the most persecuted of all animals despite the fact that less than a quarter of all species are venomous and most species are beneficial because they control rodent pests. It has become increasingly urgent therefore to develop viable conservation strategies for snakes and to investigate their importance as monitors of ecosystem health and indicators of habitat sustainability. In the first book on snakes written with a focus on conservation, editors Stephen J. Mullin and Richard A. Seigel bring together leading herpetologists to review and synthesize the ecology, conservation, and management of snakes worldwide. These experts report on advances in current research and summarize the primary literature, presenting the most important concepts and techniques in snake ecology and conservation. The common thread of conservation unites the twelve chapters, each of which addresses a major subdiscipline within snake ecology. Applied topics such as methods and modeling and strategies such as captive rearing and translocation are also covered. Each chapter provides an essential framework and indicates specific directions for future research, making this a critical reference for anyone interested in vertebrate conservation generally or for anyone implementing conservation and management policies concerning snake populations.

**Galaxies** Brad Buhrow, Anne Upczak Garcia, 2023-10-10

Brad Buhrow and Anne Garcia are primary teachers in a diverse school in Boulder, Colorado. In *Ladybugs, Tornadoes, and Swirling Galaxies*, you will see how they blend comprehension instruction and ELL best practices to explore inquiry as a literacy pathway for English language learners. As teachers and students engage in learning science and social studies content, they also discover multiple ways to make meaning. The book is full of photographs of student artwork, including a color insert that reveals the children's inquiry process and demonstrates the important role of art as a sign system in ELL literacy and language acquisition. Brad and Anne provide explicit detail on the process they use as they move step by step with students from personal narrative through the independent inquiry.

process They also discuss use of the Gradual Release Model authentic assessment and bilingual identities Appendices in Spanish and English help to round out this informative and charming resource
