**The Medical Basis of Psychiatry** S. Hossein Fatemi, Paula J. *Practical psychology and psychiatry* Colonel Bell Burr, 1921

**Handbook of Clinical Psychology in Medical Settings** Ronald H. Rozensky, Jerry J. Sweet, Steven M.

Tovian, 2013-06-29 For two decades I have been responding to questions about the nature of health psychology and how it differs from medical psychology behavioral medicine and clinical psychology From the beginning I have taken the position that any application of psychological theory or practice to problems and issues of the health system is health psychology I have repeatedly used an analogy to Newell and Simon's General Problem Solver program of the late 1950s and early 1960s which had two major functional parts in addition to the executive component One was the problem solving core the procedural competence the other was the representation of the problem environment In the analogy the concepts knowledge and techniques of psychology constitute the core competence the health system in all its complexity is the problem environment A health psychologist is one whose basic competence in psychology is augmented by a working knowledge of some aspect of the health system Quite apparently there are functionally distinct aspects of health psychology to the degree

that there are meaningful subdivisions in psychological competence and significantly different microenvironments within the health system I hesitate to refer to them as areas of specialization as the man who gave health psychology its formal definition Joseph Matarazzo has said that there are no specialties in psychology cited in the editors preface to this book

*Moving Beyond Prozac, DSM, and the New Psychiatry* Bradley Lewis, 2010-02-05 Interesting and fresh represents an important and vigorous challenge to a discipline that at the moment is stuck in its own devices and needs a radical critique to begin to move ahead Paul McHugh Johns Hopkins University School of Medicine Remarkable in its breadth an interesting and valuable contribution to the burgeoning literature of the philosophy of psychiatry Christian Perring Dowling College Moving Beyond Prozac DSM and the New Psychiatry looks at contemporary psychiatric practice from a variety of critical perspectives ranging from Michel Foucault to Donna Haraway This contribution to the burgeoning field of medical humanities contends that psychiatry's move

away from a theory based model one favoring psychoanalysis and other talk therapies to a more scientific model based on new breakthroughs in neuroscience and pharmacology has been detrimental to both the profession and its clients This shift toward a science based model includes the codification of the Diagnostic and Statistical Manual of Mental Disorders to the status of standard scientific reference enabling mental health practitioners to assign a tidy classification for any mental disturbance or deviation Psychiatrist and cultural studies scholar Bradley Lewis argues for postpsychiatry a new psychiatric practice informed by the insights of poststructuralist theory
