Social and Economic Policies in Korea Dong-Myeon Shin, 2003-12-08 A unique explanation of the development of Korean social policy using the concepts of policy idea policy network and policy linkages to examine the causes patterns and consequences of state interventions in the economy and social affairs **Social and Economic Policies in Korea**

1960-present Dong-Myeon Shin, 2000 **Social and Economic Policies in Korea** Dong-Myeon Shin, 2003-12-08 The sustained remarkable economic growth in the East Asian countries Japan South Korea Taiwan Hong Kong and Singapore has brought about a great deal of debate over the role of the state in the market and society Shin analyses the dynamic process of state interventions in the economy and social affairs in Korea from the early 1960s until the present with special reference to five policy areas macro economic policy industrial policy social security policy labour policy and education and training policy Social and Economic Policies in Korea develops a unique explanation about the development of Korean social policy using the concepts of policy idea policy network and policy linkages to examine the causes patterns and consequences of state interventions in the economy and social affairs over time It should interest students and researchers of East Asian studies social policy and development studies The Korean State and Social Policy Stein Ringen, Huck-ju Kwon, Ilcheong Yi, Taekyoon Kim, Jooha Lee, 2011-05-27 There are two great mysteries in the political economy of South Korea How could a destroyed country in next to no time become a sophisticated and affluent economy And how could a ruthlessly authoritarian regime metamorphose with relative ease into a stable democratic polity South Korea was long ruled with harsh authoritarianism but strangely the authoritarian rulers made energetic use of social policy The Korean State and Social Policy observes South Korean public policy from 1945 to 2000 through the prism of social policy to examine how the rulers operated and worked After the military coup in 1961 the new leaders used social policy to buy themselves legitimacy That enabled them to rule in two very different ways simultaneously In their determination to hold on to power they were without mercy but in the use of power in governance their strategy was to co opt and mobilize with a sophistication that is wholly exceptional among authoritarian rulers It is governance and not power that explains the Korean miracle Mobilization is a strategy with consequences South Korea was not only led to economic development but also inadvertently perhaps built up as a society rich in public and civil institutions When authoritarianism collapsed under the force of nationwide uprisings in 1987 the institutions of a reasonably pluralistic social and political order were there alive and well and democracy could take over without further serious drama This book is about many things development and modernization dictatorship and democracy state capacity and governance social protection and welfare states and Korean history But finally it is about lifting social policy analysis out of the ghetto of self sufficiency it is often confined to and into the center ground of hard political science **Retirement, Work and Pensions in Ageing Korea** Jae-Jin Yang, Thomas Klassen, 2010-02-25 Even among the four Asian tigers with their economic miracles during the past several decades that allowed them to join the ranks of the

developed nations South Korea is extraordinary As significant as its economic progress from a dirt poor and devastated nation in the 1960s is South Korea s emerging welfare state Although established in a short time and still immature in some aspects its unique East Asian model now faces a population that is aging at an unprecedented rate This book introduces readers to the impact of demographic changes in Korea particularly the impact of these on work retirement and pensions and as importantly provides an explanation for the reforms of public policy in these domains The chapters provide an up to date assessment of aging retirement and pension policies in South Korea and give valuable insights into the diverse aspects of the unprecedented rapid aging The theme of this volume which brings together the foremost Korean scholars and experts is how rapid demographic change in Korea has been a central factor in income security policy for the elderly as well as workplace policies

Korea's Retirement Predicament Thomas R. Klassen,Yunjeong Yang,2013-07-31 The distinguishing feature for many workers in

South Korea is contractual and often involuntary retirement at a young age mid 50s for most workers followed by precarious and low paying self employment or contract work In the past this practice which is also found in other East Asian nations provided firms with a youthful and highly productive workforce However with a rapidly aging population and shifts in the labour market the existing arrangement is becoming less and less functional This book examines how this retirement arrangement arose and the policy reforms that have been both undertaken and proposed to allow workers to remain employed longer The analysis focuses on the institutional constraints to reforms as well as the impact forced retirement has on individuals Using a multi disciplinary and comparative approach the authors study contractual mandatory retirement trends and policies in South Korea and in doing so illuminate the political social legal economic and labour market implications of this widespread practice As nations across Asia face aging populations this book will be welcomed by students and scholars interested in Korean studies social policy social welfare and gerontology It will also be of great value to policy makers

Globalization and Welfare Restructuring in China Huisheng Shou, 2016-10-14 In the past few decades the change in China s welfare system has been characterised by a balanced distribution of benefits across social sectors and the institutionalization of welfare redistribution This process has occurred without significant political change that would empower politically disadvantaged groups such as the urban and rural poor

This book questions what has motivated the regime to redistribute welfare benefits through an institutionalized manner whilst its political structure remains largely unchanged By situating China within the broader context of East Asia and against the backdrop of globalization since the 1980s this book examines the institutional origin and development of China's new welfare system Through doing this it provides an understanding of the nature of the Chinese state in dealing with its economy and society in a context of global economic integration A global local dynamics framework highlights the importance of the interactive relationship between China's integration into the world economy and its unique geopolitical constraints which together induce the regime to listen to its subjects and follow a move to the middle in welfare restructuring Offering a novel explanation of the welfare globalization relations in a non democratic setting this book will be of interest to students and scholars of Social Policy International Political Economy and Chinese Politics

The Governance of Financialization in Latin America and East Asia Max Nagel, 2023-10-20 The Governance of Financialization in Latin America and East Asia analyses how states in these areas have adopted different monetary financial and foreign exchange policies to govern financialization which have induced varying levels of state control over financial markets The book analyzes the puzzling observation of policy divergence by investigating how countries have reacted

differently to major financial crises since the 1970s It shows how Argentina and Japan selected a governance approach to financialization that followed Western prescriptions by propelling unregulated financialization but also how Chile and South Korea by contrast crafted policies to reduce the negative effects of financialization on economic development and financial stability The book identifies variegated expertise in central banks ministries of finance expert commissions and research institutions that has informed policymaking across Argentina Chile Japan and South Korea since the 1970s It then demonstrates how governments have used experts to achieve diverse political objectives and explains how governments can use experts to enhance state agency to counter globalization pressures This book will appeal to scholars of International Political Economy comparative politics economics sociology development studies and Latin American and East Asian history It will also be of interest to economists and policymakers who want to safeguard financial stability and promote economic growth

Korean Workers and Neoliberal Globalization Kevin Gray, 2013-03-07 One of the most remarkable aspects of South Korea's transition from impoverished post colonial nation to fully fledged industrialized democracy has been the growth of its independent and dynamic labour movement Korean Workers and Neoliberal Globalisation examines current trends and transformations within the Korean labour movement since the 1990s It has been a common assumption that the third wave of democratisation the end of the Cold War and the spread of neoliberal globalisation in the latter part of the 20th century have helped to create an environment in which organised labour is better placed to overcome bureaucratic national unionism and transform itself into a potential counter globalisation movement However Kevin Gray argues that despite the apparent continued phenomena of labour militancy and the rhetoric of anti neoliberalism the mainstream independent labour movement in Korea has become increasingly institutionalised and bureaucratised into the new capitalist democracy This process is demonstrated by the Korean Confederation of Trade Unions experience of participation in various forms of policy making forums Gray suggests that as a result the KCTU has failed to mount an effective challenge against processes of neoliberal restructuring and concomitant social polarisation The Korean experience provides an excellent case study for understanding the relationship between organised labour and globalisation Korean Workers and Neoliberal Globalisation will appeal to students and scholars of Korean studies and International Political Economy as well as Asian politics and economics

The Global Korean Motor Industry Russell D. Lansbury, Chung-Sok Suh, Seung-Ho Kwon, 2007-01-24 This book examines the experiences of the globalizing Korean automobile industry with particular focus on the Hyundai Motor Company HMC one of the most prominent of the new Korean multinational corporations It provides an overview of the changing nature of the global automobile industry before considering in depth the globalization processes that the Korean automobile industry has undertaken Tracing the development of HMC as it recovered from the failure of its first venture overseas in Canada and tried again in India the authors explore the similarities and differences between the practices which HMC implemented in India and Korea They highlight the importance of production systems and employment relations as part

of HMC's growth and argue that if Korean companies such as HMC are to compete successfully as global automobile producers they will need to increase the proportion of overseas production, establish global supply chains and improve coordination between head office and subsidiaries. Based upon extensive fieldwork in India and Korea, this book is a detailed account of the globalization of the Korean automobile industry and Hyundai Motor Company. Its findings will be of importance to all those who seek to understand the challenges faced by firms that attempt to become global players.

Understanding Multimodal Discourses in English Language Teaching Textbooks Christopher A. Smith, 2022-08-11. Textbooks are indispensable components and in some cases the cornerstones of the mission of English Language Teaching (ELT). However, they are artefacts of a pedagogical culture that rarely echo the concerns of their most prolific consumers: teachers and students. This book offers a useful framework for evaluating ELT textbooks from a critical discourse perspective, one that is based on sound current research but also offers practical guidance to teachers. Building from a foundational understanding of ELT textbooks, the author presents a systematic procedure to critically analyze their multimodal discourse, examine how those discourses are negotiated between teachers and students in class, and measure how those consumers privately value the lessons. The book provides teachers with the tools they need to select and adapt materials based on critical multimodal discourse analysis, where not only the text but the pictures, websites, audio, visual elements too are subjected to a process which can reveal underlying ideologies, assumptions, omissions, and reifications. The triangulated approach demonstrated in a series of vignettes featuring Korean university students and native English-speaking instructors can inform textbook choice, instigate change, and inspire lesson re-contextualization to best suit the needs of its primary consumers.
