Abstract

Social cohesion and a sustainable labour market remain the aims of sustainable development policy. However, income inequalities and labour market policies are more often separately analysed. To fill the identified research gap, our article presents the results of an analysis of interactions between active and passive labour market policies and income inequalities in the European Union. The 27 countries were divided into two clusters based on their active and passive labour market policy (LMP) expenditures in 2019. These clusters sustain the basis for analysing the interactions between LMP and income inequalities in its different measures. The results reveal that labour market interventions interact with income inequalities, decreasing disposable income inequalities (equalising the disposable income after transfers and taxes) and therefore contributing to social cohesion. This paper concerns social cohesion as the manifestation of intragenerational justice.

Keywords: income inequalities, labour market policy, sustainable labour market, social cohesion, sustainable development

Directorate of Youth and Sport,2008-01-01 This international review of Hungarian national youth policy is the fifteenth in the series started in 1997 by the Directorate of Youth and Sport of the Council of Europe Like preceding reviews it aims to fulfil three distinct objectives to advise on national youth policy to identify components which might combine to form a harmonised approach to youth policy across Europe and to contribute to a learning process in relation to the development and implementation of youth policy Hungary at its own request embarked on an international review to benefit from ten years of reviewing experience and to contribute to the European exchange of information on youth policies This report includes information gathered by the international review team as well as its analyses and recommendations concerning the development perspectives and challenges for the future of youth policy in Hungary **Lessons from Labour Market**

Policies in the Transition Countries Centre for Co-operation with Economies in Transition,1996 OECD Economic Surveys: Hungary 1997 OECD,1997-06-25 This 1997 edition of OECD s periodic review of Hungary s economy examines recent economic developments policies and prospects It includes special features on privatisation trade policy and the labour market Public Finance Reform During the Transition Lajos Bokros,Jean-Jacques Dethier,1998-01-01 Public finance reform is simultaneously a process of fiscal adjustment and structural reforms in the public sector Under socialist rule Hungary s concept of public finance was nebulous since there was no clear delineation between private and public sectors As a transition country structural reforms were aimed at creating not only sustainable institutional arrangements but were aimed at creating a government sector adapted to a market economy as well The former socialist states were forced into abrupt transitions and there was little time for minds and institutions to adapt This volume aims to provide a comprehensive description of Hungary s experience of public finance reform in a former socialist economy including a history of the reform process an empirical analysis of trends in public spending and revenues evidence of Hungary s ability to move towards accession to the European Union EU a description of policy reforms in the public welfare system an analysis of the reforms in key aspects of the institutional framework and an examination of the tax system OECD Territorial Reviews: Hungary 2001 OECD,2001-10-05 OECD s territorial review of Hungary **Labour Market Institutions and Productivity** Beata Woźniak-Jęchorek,Michał Pilc,2020-10-25 This book explains the role of formal labour market institutions in keeping the

labour utilisation in Central and Eastern Europe above the level characteristic for Western European states It provides an innovative and enriching take on labour utilisation at large and how various formal labour market institutions can affect the ongoing trend in labour utilisation in a way that is not covered by the extant literature The impact of labour market institutions on labour market outcomes is analysed throughout 12 chapters both from a cross country perspective and in detailed case studies by 21 labour market experts from various CEE countries Most chapters are based on empirical methods yet are presented in an easy to follow way in order to make the book also accessible for a non scientific audience The volume explores three key questions How can labour utilisation be increased by labour market institutions Which CEE countries managed to create a labour market institutional framework beneficial for labour utilisation How should the labour market institutions in CEE countries be reformed in order to increase labour utilisation The book argues that the legacy of transition reforms and a centrally planned past is still relevant in explaining common patterns among CEE countries and concludes that increasing the stock of skills accumulated by the employed and improving utilisation of these skills seems to be the first best solution to increase labour utilisation The book will be of interest to post graduate researchers and academics in the fields of labour economics regional economics and macroeconomics as well as scholars interested in adopting an institutional analysis approach Additionally due to the broader policy implications of the topic the book will appeal to policymakers and experts interested in labour economics
