Unfolding Social Constructionism Fiona J. Hibberd, 2006-11-24 For more than half of the 20 century psychologists sought to locate the causes of behaviour in individuals and tended to neglect the possibility of locating the psychological in the social In the late 1960s a reaction to that neglect brought about a crisis in social psychology This crisis did not affect all social psychologists some remained seemingly oblivious to its presence others dismissed its significance and continued much as before But in certain quarters the psychological was re conceptualised as the social and the social was taken to be sui generis Moreover the possibility of developing general laws and theories to describe and explain social interaction was rejected on the grounds that as social beings our actions vary from occasion to occasion and are for many reasons unrepeatable There is so it was thought an inherent instability in the phenomena of interest The nomothetic ideal

was said to rest on individualistic cause effect positivism of the kind which arguably characterised the natural sciences but social psychology so it was said is an historical inquiry and its conclusions are necessarily historically relative Gergen 1973 Events outside psychology converged to give impetus to the crisis within *What Is a Person?* Christian Smith, 2010-09-15 What is a person This fundamental question is a perennial concern of philosophers and theologians But Christian Smith here argues it also lies at the center of the social scientist's quest to interpret and explain social life In this ambitious book Smith presents a new model for social theory that does justice to the best of our humanistic visions of people life and society Finding much current thinking on personhood to be confusing or misleading Smith finds inspiration in critical realism and personalism Drawing on these ideas he constructs a theory of personhood that forges a middle path between the extremes of positivist science and relativism Smith then builds on the work of Pierre Bourdieu Anthony Giddens and William Sewell to demonstrate the importance of personhood to our understanding of social structures From there he broadens his scope to consider how we can know what is good in personal and social life and what sociology can tell us about human rights and dignity Innovative critical and constructive *What Is a Person* offers an inspiring vision of a social science committed to pursuing causal explanations interpretive understanding and general knowledge in the service of truth and the moral good

Liberalism and the Challenge of Climate Change Christopher Shaw, 2023-08-25 In this book Christopher Shaw analyses how liberalism has shaped our understanding of climate change and how liberalism is legitimated in the face of a crisis for which liberalism has no answers The language and symbolism we use to make sense of climate change arose in the post World War II liberal institutions of the West This language and symbolism in neutralising the philosophical and ideological challenge climate change poses to the legitimacy of free market liberalism has also closed off the possibility of imagining a different kind of future for humanity The book is structured around a repurposing of the guardrail concept commonly used in climate science narratives to communicate the boundary between safe and dangerous climate change Five discursive guardrails are identified which define a boundary between safe and dangerous ideas about how to respond to climate change The theoretical treatment of these issues is complemented with data from interviews with opinion formers decision makers and campaigners exploring what models of human nature and political possibilities guide their approach to the politics of climate change governance This book will be of great interest to students and scholars of climate change liberal politics environmental communication and environmental politics and philosophy in general
