Source In Astronomy 1900 195:

Astrophysical Formulae Kenneth R. Lang, 2013-12-21 This volume is a reference source of fundamental formulae in physics and astrophysics In contrast to most of the usual compendia it carefully explains the physical assumptions entering the formulae All the important results of physical theories are covered electrodynamics hydrodynamics general relativity atomic and nuclear physics and so on Over 2100 formulae are included and the original papers for the formulae are cited together with papers on modern applications in a bibliography of over 1900 entries For this new edition a chapter on space time matter and cosmology has been included and the other chapters have been carefully revised **Joe Pawsey and the Founding of Australian Radio Astronomy** W. M. Goss, Claire Hooker, Ronald D. Ekers, 2023-01-10 This open access book is a biography of Joseph L Pawsey It examines not only his life but the birth and growth of the field of radio astronomy and the state of science itself in twentieth century Australia The book explains how an isolated continent with limited resources grew to be one of the leaders in the study of radio astronomy and the design of instruments to do so Pawsey made a name for himself in the international astronomy community within a decade after WWII and coined the term radio astronomy His most valuable talent was his ability to recruit and support bright young scientists who became the technical and methodological innovators of the era building new telescopes from the Mills Cross and Chris Christiansen Cross to the Parkes radio telescope The development of aperture synthesis and the controversy surrounding the cosmological interpretation of the first major survey which resulted in the Sydney research group s disagreements with Nobel laureate Martin Ryle play major roles in this story This book also shows the connections among prominent astronomers like Oort Minkowski Baade Struve famous scientists in the UK such as J A Ratcliffe Edward Appleton and Henry Tizard and the engineers and physicists in Australia who helped develop the field of radio astronomy Pawsey was appointed the second Director of the National Radio Astronomy Observatory Green Bank West Virginia in October 1961 he died in Sydney at the age of 54 in late November 1962 Upper level students scientists and historians of astronomy and technology will find the information much of it from primary sources relevant to any study of Joseph L Pawsey or radio astronomy This open access book includes a Foreword by Woodruff T Sullivan II **Astrophysical Formulae** Kenneth Lang, 2006-02-22 This classic reference for the fundamental formulae of physics and astrophysics has become part of nearly every astronomers and astrophysicists library A magnificent compendium OPTICA ACTA ON THE FIRST EDITION *Pure and Applied Science Books, 1876-1982*, 1982 Over 220 000 entries representing some 56 000 Library of Congress subject headings Covers all disciplines of science and technology e g engineering agriculture and domestic arts Also contains at least 5000 titles published before 1876 Has many applications in libraries information centers and other organizations concerned with scientific and technological literature Subject index contains main listing of entries Each entry gives cataloging as prepared by the Library of Congress Author title indexes **The Annual American Catalog, 1900-1909**, 1909 *Star Noise: Discovering the Radio Universe* Kenneth I.

Kellermann, Ellen N. Bouton, 2023-05-11 Until Karl Jansky's 1933 discovery of radio noise from the Milky Way astronomy was limited to observation by visible light. Radio astronomy opened a new window on the Universe leading to the discovery of quasars, pulsars, the cosmic microwave background, electrical storms on Jupiter, the first extrasolar planets, and many other unexpected and unanticipated phenomena. Theory generally played little or no role or even pointed in the wrong direction. Some discoveries came as a result of military or industrial activities, some from academic research intended for other purposes, some from simply looking with a new technique. Often it was the right person in the right place at the right time doing the right thing or sometimes the wrong thing. Star Noise tells the story of these discoveries, the men and women who made them, the circumstances which enabled them, and the surprising ways in which real life scientific research works.

The Immortal Fire Within William Sheehan, 1995-06-30 This is the first full length biography of Edward Emerson Barnard, who tells the remarkable tale of endurance and achievement of one of the leading astronomers of the late nineteenth and early twentieth century. Through his career Barnard scoured the heavens endlessly leaving an astonishing legacy of observations of planets, satellites, comets, double stars, bright and dark nebulae, and globular clusters that make him one of the greatest observers of all time. Beautifully illustrated throughout, this book includes many of Barnard's famous wide field photographs of comets and the Milky Way. It provides a complete history of Barnard's fascinating life and work and offers unusual insight into the astronomers he knew and observatories with which he was associated and will be of interest to astronomers and historians of science.

Tomorrow the World Norman J. W. Goda, Ronald Anthony Schorn, 1998 Schorn's look into the world's oldest science from ancient times to the present offers more than the usual time line of events. This rare inside examination will interest readers of space exploration, astronomy, and the history of science.

Improved Understanding of Past Climatic Variability from Early Daily European Instrumental Sources Dario Camuffo, Phil D. Jones, 2012-12-06 Climate can be defined as an ensemble of many weather phenomena. Climatologists often use the mean, conventionally the monthly and annual mean of weather related parameters to describe climate. The mean value, however, is not all the climate. Climatic changes might occur if certain aspects of the distribution of extreme values change while the mean does not. Katz and Brown 1992, for example, show from a theoretical viewpoint that in a changing climate extreme values are determined more by changes in variability than changes in the mean. Possible changes in extreme event frequency receive considerable attention along with the global warming because extremes directly impact human society and the economy. For most societally sensitive extremes and related changes in their variability, an analysis based on daily data becomes necessary. This paper considers two aspects: relative and absolute values of extreme temperatures on a daily basis. We do not consider spells of extreme days, periods which will likely have greater socio-economic and health impacts. Kalkstein et al 1996, Wagner 1999, than individual extreme days.
