South African Agriculture At The Crossroads An Empirical Analysis Of Efficiency Technology And Productivity:

South African Agriculture at the Crossroads Colin G. Thirtle, 2000 This book examines the current state of South African agriculture and makes attempts at reform in context by looking at the past It begins by explaining the historical process which led to a dualistic agricultural sector and the current policy process that attempts to resolve the inequalities and distortions The policy discussion draws on the main part of the book which is an empirical investigation of the measurement and explanation of efficiency and productivity change which depend on technologies developed by R D *Food Security in Africa* Alexander Sarris, 2010-01-01 As they often do Jamie Morrison and Alexander Sarris have provided researchers policy makers and the interested public with the firm empirical grounding needed for sound agricultural development policies They have synthesized from a rich and varied set of country studies a unique contribution to one of the key challenges of our times increasing the productivity of smallholder food production in the age of globalization Timothy A Wise Tufts University US Food security has been a major concern in Africa for decades and a more pressing problem with recent increases in food prices The editors and contributors to this volume are experts in the field and should be commended for a timely informative and in places challenging analysis of food production and markets in eastern and southern Africa The volume brings a refreshing variety of theoretical analytical and informed case study approaches to bear on the food security problem it should be read by anybody seriously interested in African development Oliver Morrissey University of Nottingham UK Drawing on insights from theoretical applications empirically based approaches and case study experience this book contributes to the improved design and use of trade and related policy interventions in staple food markets Trade policy interventions have a potentially critical role to play in the development of staple food markets in developing countries and as a source of revenue in wider processes of rural development Governments have long defended trade and related policy interventions in staple food markets on the basis of food security concerns However the design and implementation of these policies has often resulted in unintended impacts increasing the risks faced by private sector actors and reducing their incentives for investment in improved market performance In the context of increasingly volatile staple food markets this book commissioned from leading experts in this field seeks to enhance dialogue between stakeholders involved in and affected by the design and use of trade and related policy interventions This significant book will appeal to policy analysts and decision makers influential in the design and implementation of trade and related market interventions as well as students of development economics Researchers contributing to debates on the use and impacts of trade and related market interventions in staple food markets in poor countries will also find this volume of great benefit *Agricultural Research and Poverty Reduction* Shantanu Mathur, Douglas Pachico, Annie L. Jones, 2003 **Agrekon**, 2005 **Water is Life** Hellum, Anne, Kameri-Mbote, Patricia, 2015-10-19 This book approached water and sanitation as an African gender and human rights issue Empirical case studies from Kenya Malawi South Africa and Zimbabwe show how coexisting international national and

local regulations of water and sanitation respond to the ways in which different groups of rural and urban women gain access to water for personal domestic and livelihood purposes The authors who are lawyers sociologists political scientists and anthropologists explore how women cope in contexts where they lack secure rights and participation in water governance institutions formal and informal The research shows how women as producers of family food rely on water from multiple sources that are governed by community based norms and institutions which recognise the right to water for livelihood How these common pool water resources due to protection gaps in both international and national law are threatened by large scale development and commercialisation initiatives facilitated through national permit systems is a key concern The studies demonstrate that existing water governance structures lack mechanisms which make them accountable to poor and vulnerable water users on the ground most importantly women The findings thus underscore the need to intensify measures to hold states accountable not just in water services provision but in assuring the basic human right to clean drinking water and sanitation and also to protect water for livelihoods

Innovative Institutions, Public Policies And Private Strategies For Agro-enterprise Development Ralph D Christy, Carlos A Da Silva, Nomathemba Mhlana, Krisztina Tihanyi, Edward Mabaya, 2014-09-12 In an effort to promote agro enterprises and agro industries as viable forms of inclusive development the Food and Agriculture Organization of the United Nations FAO and The Cornell International Institute for Food Agriculture and Development CIIFAD in collaboration with the International Association of Agricultural Economists IAAE organized an international symposium on the topic Innovative Institutions Public Policies and Private Strategies for Inclusive Agro Enterprise Development as part of the Triennial Meetings of the IAAE held in Foz do Iguaçu Brazil in August 2012 This book contains the major papers presented at the symposium which feature a wide range of country and regional experiences and examine the influence of markets and technology transfer to agro enterprises on food security poverty and economic growth The contributions also identify alternative market access strategies for sustainable economic development This volume will enrich existing knowledge of agro enterprises as a channel for promoting inclusive growth and reducing poverty levels across developing and emerging markets

The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
