Peninsular Southeast Asia Army Library (U.S.),1972 Mapping the Cold War Timothy Barney,2015-04-13 In this fascinating history of Cold War cartography Timothy Barney considers maps as central to the articulation of ideological tensions between American national interests and international aspirations Barney argues that the borders scales projections and other conventions of maps prescribed and constrained the means by which foreign policy elites popular audiences and social activists navigated conflicts between North and South East and West Maps also influenced how identities were formed in a world both shrunk by advancing technologies and marked by expanding and shifting geopolitical alliances and fissures Pointing to the necessity of how politics and values were spatialized in recent U S history Barney argues that Cold War era maps themselves had rhetorical lives that began with their conception and production and played out in their circulation within foreign policy circles and popular media Reflecting on the ramifications of spatial power during the period Mapping the Cold War ultimately demonstrates that even in the twenty first century American visions of the world and the maps that account for them are inescapably rooted in the anxieties of that earlier era **Learning Directory** ,1970 Catalog of Copyright Entries, Third Series ,1958 The record of each copyright registration listed in the Catalog includes a description of the work copyrighted and data relating to the copyright claim the name of the copyright claimant as given in the application for registration the copyright date the copyright registration number etc **The Myth of Continents** Martin W. Lewis,Kären Wigen,1997-08-11 In this thoughtful and engaging critique geographer Martin W Lewis and historian K ren Wigen reexamine the basic geographical divisions we take for granted and challenge the unconscious spatial frameworks that govern the way we perceive the world Arguing that notions of East vs West First World vs Third World and even the sevenfold continental system are simplistic and misconceived the authors trace the history of such misconceptions Their up to the minute study reflects both on the global scale and its relation to the specific continents of Europe Asia and Africa actually part of one contiguous landmass The Myth of Continents sheds new light on how our metageographical assumptions grew out of cultural concepts how the first continental divisions developed from classical times how the Urals became the division between the so called continents of Europe and Asia how countries like Pakistan and Afghanistan recently shifted macroregions in the general consciousness This extremely readable and thought provoking analysis also explores the ways that new economic regions the end of the cold war and the proliferation of communication technologies change our understanding of the world It stimulates thinking about the role of large scale spatial constructs as driving forces behind particular worldviews and encourages everyone to take a more thoughtful geographically informed approach to the task of describing and interpreting the human diversity of the planet **National Union Catalog** ,1978 Hammond's Commercial and Library Atlas of the World ,1912 Hammond's Modern Atlas of the World C.S.
