Building a Prosperous Southeast Asia Kunio Yoshihara,2013-01-11 Professor Yoshihara an international expert on the Southeast Asian economies looks beyond the causes of the current crisis to discuss what can be done to build a dynamic economy in Asia to ensure prosperity for the future He takes the viewpoint that the only way to achieve this is to promote integration into the global economy through free trade and free capital movement He puts forward a convincing argument that government intervention is not the way forward and has in fact helped cause the present crisis But a prosperous future is possible he argues by renovating institutions and adapting new attitudes A most timely book with lessons for other parts of the world as well as for Southeast Asia

The Rise of Ersatz Capitalism in South-East Asia Kunio Yoshihara,1988 This book by a leading expert considers the growth of an inefficient superlayer in Southeast Asian economies and assesses the problems that this poses for future economic development Yoshihara argues that as technological backwardness the low quality of government intervention and discrimination against those of Chinese descent have prevented capitalism from stimulating development there has emerged a brand of ersatz capitalism very different from the capitalism in Japan and the West He goes on to offer recommendations for creating a dynamic capitalism while acknowledging that obstacles to their implementation exist in current Southeast Asian social and political systems

Rural Capitalists in Asia Mario Rutten,2005-08-18 This is a comparative study of small capitalists and rural industrialists in three Asian countries Studies on the entrepreneurial class in South Asia tend to focus on the structural aspects of entrepreneurial behaviour while studies on this class in Southeast Asia tend to focus on cultural aspects of their behaviour In fact this book points to striking similarities

between Indian overseas Chinese and Muslim businessmen in Asia similarities usually hidden under variations in analytical approaches Although this study emphasizes similarities within Asia it does not support the view of a specific Asian business pattern different to the rise of non Asian especially European entrepreneurs The findings are of major interest not just within the fields of anthropology and entrepreneurship but to all scholars working on South or Southeast Asia who will find much of interest in the author s observations of variable research results between the two regions
