Southeast Asia's Economy Development Policies In The 1970s Penguin Education:

South East Asia in the World-Economy Chris J. Dixon, 1991-07-26 South East Asia has for many centuries occupied a pivotal position in the wider Asian economy linking China and the Far East with India and the Middle East and since the early 1500s the region has also played a major role in the world economy South East Asia in the World economy is a textbook survey of the area's interaction with these wider regional and international structures Professor Chris Dixon demonstrates how this region's role has undergone frequent and profound change as a result of the successive emergence and dominance of mercantile industrial and finance capital He shows how the region has developed as a supplier of luxury products such as spices as a producer of bulk primary products and how since the mid 1960s it has become a major recipient of investment and a favoured location for European and American markets The author examines how these phases in the evolution of the international economy have been reflected in the relations of evolution of the production and in the spatial pattern of economic activity He also discusses how the progressive integration of South East Asia in the world economy has established the dominance of a small number of core areas and produced a pattern of uneven development throughout the region In a concluding chapter Chris Dixon explores the prospects for South East Asia in the 1990s in the light of the restructuring of the world economy
