Soviet Architecture:

Pioneers of Soviet Architecture Selim Omarovich Khan-Magomedov, 1987 *Spatial Revolution* Christina E. Crawford, 2022-02-15 *Spatial Revolution* is the first comparative parallel study of Soviet architecture and planning to create a narrative arc across a vast geography The narrative binds together three critical industrial residential projects in Baku Magnitogorsk and Kharkiv built during the first fifteen years of the Soviet project and followed attentively worldwide after the collapse of capitalist markets in 1929 Among the revelations provided by Christina E Crawford is the degree to which outside experts participated in the construction of the Soviet industrial complex while facing difficult topographies near impossible deadlines and inchoate theories of socialist space making Crawford describes how early Soviet architecture and planning activities were kinetic and negotiated and how questions about the proper distribution of people and industry under socialism were posed and refined through the construction of brick and mortar steel and concrete projects living laboratories that tested alternative spatial models As a result *Spatial Revolution* answers important questions of how the first Soviet industrialization drive was a catalyst for construction of thousands of new enterprises on remote sites across the Eurasian continent an effort that spread to far flung sites in other socialist states and capitalist welfare states for decades to follow Thanks to generous funding from Emory University and its participation in TOME Toward an Open Monograph Ecosystem the ebook editions of this book are available as Open Access volumes from Cornell Open cornellpress.cornell.edu/cornell-open and other repositories **Modern Soviet Architecture and Design** Владимир Муленок, 2025-03-11 This study guide provides a concise overview of the artistic styles and architectural trends during the early years of Soviet rule as well as the architectural development in the RSFSR Russian Soviet Federative Socialist Republic and the USSR Union of Soviet Socialist Republics throughout much of the 20th century from 1917 to 1991 This period encompasses Visionary Architecture Constructivism the decline of the Russian Avant Garde the emergence of the Stalinist Empire style and the rise of New Modernism The guide covers both volumetric design and urban planning concepts proposals and trends The theoretical content is fully illustrated with drawings by 4th year students The cover features portraits of notable architects from the Soviet era This manual is intended for full time students of the Faculty of Architecture in particular in the following areas 07 03 01 Architecture 07 03 02 Restoration and Reconstruction of Architectural Heritage and 07 03 03 Design of the Architectural Environment It will also be of interest to anyone interested in the history of architecture of the Soviet Union This manual is a translated and corrected text of the manual *Modern Domestic Architecture and Design* published in 2011 The author thanks A A Abrosimova Ju V Lapina V U Tereshonok V A Chuprynin and S V Mulenok as well as the Department of Foreign Languages of TSUAB for the translation and preparation of the manual *Russian Architecture and the West* Dmitrii Olegovich Shvidkovskii, Shvidkovsky, 2007-01-01 This is the first book to show the development of Russian architecture over the past thousand years as a part of the history of Western architecture Dmitry Shvidkovsky Russia s

leading architectural historian departs from the accepted notion that Russian architecture developed independent of outside cultural influences and demonstrates that to the contrary the influence of the West extends back to the tenth century and continues into the present. He offers compelling assessments of all the main masterpieces of Russian architecture and frames a radically new architectural history for Russia. The book systematically analyzes Russian buildings in relation to developments in European art, pointing out where familiar European features are expressed in Russian projects. Special attention is directed toward decorations based on Byzantine models, the heritage of Italian master builders and carvers, the impact of architects and others sent by Elizabeth I, the formation of the Russian Imperial Baroque, the Enlightenment in Russian art, and 19th and 20th century European influences. With over 300 specially commissioned photographs of sites throughout Russia and western Europe, this magnificent book is both beautiful and groundbreaking.

Blueprints and Blood
 Hugh D. Hudson, Jr., 2015-03-08

Analyzing totalitarianism from below in a crucial area of Soviet culture, Hugh Hudson shows how Stalinist forces within the architectural community destroyed an avant garde movement of urban planners and architects who attempted to create a more humane built environment for the Soviet people. Through a study of the ideas and constructions of these visionary reformers, Hudson explores their efforts to build new forms of housing and settlements designed to free the residents, especially women, from drudgery, allowing them to participate in creative work and to enjoy the songs of larks. Resolving to obliterate this movement of human liberation, Stalinists in the field of architecture unleashed a little terror from below prior to Stalin's Great Terror. Using formerly secret Party archives made available by perestroika, Hudson finds in the rediscovered theoretical work of the avant garde architects a new understanding of their aims. He shows, for instance, how they saw the necessity of bringing elite desires for a transformed world into harmony with the people's wish to preserve national culture. Such goals brought their often divided movement into conflict with the Stalinists, especially on the subject of collectivization. Hudson's provocative work offers evidence that in spite of the ultimate success of the Stalinists, the Bolshevik Revolution was not monolithic; at one time it offered real architectural and human alternatives to the Terror. Originally published in 1993, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Russian Architecture of the Soviet Period Андрей Владимирович Иконников, 1988

Landmarks of Soviet Architecture, 1917-1991 Aleksandr Vasil'evich Riabushin, Nadezhda Ivanovna Smolina, 1992

Soviet architecture was born and shaped from the outset by dispute from the introductory essay. This catalog documents the architectural output of a country besieged with powerful and conflicting political pressures and aspirations. Text and photos combine to record the architectural heritage of the Communist regime.
