Soviet Decision Making For National Security:

Soviet Decisionmaking for National Security Jiri Valenta, William C. Potter, 2021-01-26 This book first published in 1984 analyses the critically important Cold War issue of the Soviet national security decision making process dealing with weapons acquisition arms control and the application of military force It conceptualises Soviet decision making for national security from Stalinist antecedents to 1980s modes and examines the problems of decision making concerning weapons development defence research and development and SALT negotiations It also focuses on the decision making processes which led to the use or threatened use of military force in Czechoslovakia 1968 the Middle East 1973 and Afghanistan 1979 *Russian Strategic Modernization* N. N. Sokov, 2000 This invaluable study provides a unique insider's view of the history of Soviet and Russian policy on nuclear weapons modernization and charts the future evolution of the Russian strategic arsenal Using information that has only recently become available and introducing new previously unknown data Sokov concludes that the most important force behind the evolution of the Soviet and Russian strategic arsenal was the military itself which sought to increase strategic stability by enhancing the survivability of weapons systems The highly destabilizing posture of the 1970s and 1980s was he argues in a sense accidental resulting from the failure of several R D programs and specific features of the Soviet decisionmaking mechanism The author demonstrates that the role of such factors as the economic crisis U S modernization programs and general Russian foreign policy goals has been exaggerated by Western analysts No matter how hard pressed Russia will hold to its current plans Sokov argues At the same time the military will be unlikely to engage in a new arms buildup even if the economic situation improves or a nationalist government comes to power Instead stability will be sought through better quality of weapons at progressively lower levels Introducing a wealth of new information on Soviet and Russian national security policymaking the author explores in meticulous detail such key issues as decisions on weapons development arms control negotiations and the handling of the Soviet nuclear arsenal after the breakup of the Soviet Union The reader will be able to follow the debates and intrigues between military planners diplomats and weapons designers as they clashed over the choice of acquisition programs and negotiating positions With its combination of informed analysis and use of new documentation this work will be invaluable for all concerned with U S Russian strategic relations *Soviet National Security Policy Under Perestroika* George E. Hudson, 2021-01-26 This book first published in 1990 examines the nature and causes of the changes to Soviet national security policy under Gorbachev Changes in leadership and institutional arrangements economic policy ideology and military involvement all fostered new patterns of cooperation and competition Authors look at the historical economic and cultural contexts of change and proceed to a discussion of change agents such as modernization technology and domestic politics Specific components of foreign and military policy such as arms control and relations with Western Europe the Warsaw Pact and the Third World are also examined **Managing National Security Policy** William W. Newmann, 2010-06-15 The U S national security decision making system is a product of the Cold War

Formed in 1947 with the National Security Council it developed around the demands of competing with and containing the USSR But the world after the collapse of communism and particularly the tragedy of September 11 is vastly different A threatening but familiar enemy has given way to a complex environment of more diverse and less predictable threats As the creation of the Homeland Security Council and Office of Homeland Security indicate the United States must now reevaluate standard national security processes for this more uncertain world In this timely book William W Newmann examines the way presidents manage their advisory process for national security decision making and the way that process evolves over the course of an administration s term Three detailed case studies show how the president and his senior advisors managed arms control and nuclear strategy during the first terms of the Carter Reagan and G H W Bush presidencies These studies enhanced by interviews with key members of the national security teams including James Baker Brent Scowcroft and Zbigniew Brzezinski reveal significant patterns of structure and adaptation They provide a window to how decision making in the modern White House really works at a moment when national security decisions are again at the top of the agenda Specifically Newmann investigates this pattern Each president begins his administration with a standard National Security Council based interagency process which he then streamlines toward a reliance on senior officials working in small groups and a confidence structure of a few key advisors Newmann examines the institutional pressures that push administrations in this direction as he also weighs the impact of the leadership styles of the presidents themselves In so doing he reaches the conclusion that decision making can be an audition process through which presidents discover which advisors they trust And the most successful process is one that balances formal informal and confidence sources to maintain full discussion of diverse opinions while settling those debates informally at the senior most levels Unlike previous studies *Managing National Security Policy* views decision making as dynamic rather than as a static system inaugurated at the beginning of a president s term The key to understanding the decision making process rests upon the study of the evolving relationships between the president and his senior advisors Awareness of this evolution paints a complex portrait of policy making which may help future presidents design national security decision structures that fit the realities of the office in today s world **The**

National Security Adviser, Role and Accountability United States. Congress. Senate. Committee on Foreign Relations,1980 **Problems of Communism** ,1986 *National Security Policy, 1969-1972* United States. Department of State,2012-04-05 This volume documents U S national security policy in the context of the Vietnam War and the changing Cold War strategic balance between the United States and the Soviet Union When President Richard Nixon assumed office in January 1969 he was confronted with the fact that the United States no longer held commanding military superiority over its superpower rival Since the end of his stint as Vice President in 1961 the Soviets had achieved a rough strategic parity that left the United States with significant vulnerabilities vis vis the USSR This work documents the Nixon administration s efforts to grapple with this new strategic situation and provides coverage of the following The administration s review of U S nuclear

and general purpose forces and strategic doctrine its attempts to ascertain the level of technological sophistication achieved by the Soviet missile program and its decision to deploy Safeguard a modified anti ballistic missile system The page contained in this volume also examines chemical and biological weapons policy U S nuclear policy in Asia the evolution of the administration s strategic priorities in light of an ever shrinking defense budget and the transition from military conscription to an all volunteer armed force Additionally it provides previously unreleased material regarding the October 1969 Joint Chiefs of Staff Readiness Test in which Nixon secretly placed on alert portions of the United States military including its nuclear forces Throughout this comprehensive and historical volume a consistent theme is the relationship between military strength and diplomatic strength in particular the importance of military might real or perceived to the United States ability to maintain credibility in the eyes of allies and adversaries alike *National Security Policy and the Changing World Power Alignment, Hearing-symposium Before the Subcommittee on National Security Policy and Scientific Developments...*, 92-2, May 24, 31; June 7, 14, 21, 28; August 8, 1972 United States. Congress. House. Foreign Affairs, 1972 Decision-Making in American Foreign Policy Nikolas K. Gvosdev, Jessica D. Blankshain, David A. Cooper, 2019-01-09 This foreign policy analysis textbook is written especially for students studying to become national security professionals It translates academic knowledge about the complex influences on American foreign policymaking into an intuitive cohesive and practical set of analytic tools The focus here is not theory for the sake of theory but rather to translate theory into practice Classic paradigms are adapted to fit the changing realities of the contemporary national security environment For example the growing centrality of the White House is seen in the palace politics of the president s inner circle and the growth of the national security apparatus introduces new dimensions to organizational processes and subordinate levels of bureaucratic politics Real world case studies are used throughout to allow students to apply theory These comprise recent events that draw impartially across partisan lines and encompass a variety of diplomatic military and economic and trade issues

Strategic Disarmament, Verification and National Security Stockholm International Peace Research

Institute, 2020-12-01 Originally published in 1977 the purpose of this book was to analyse the relationship between the security of two states mutually undergoing strategic disarmament at the time and the need for safeguarding their security by means of a verification system The book thus studies some of the basic problems in the disarmament debate issues that had been the subject of great political controversy Previous studies had been mainly descriptive or historical lacking in objective political analysis and tending to political bias depending on the political school of the author There was thus some justification for the statement made by some outstanding authorities in the field that to date no systematic analysis has been attempted to determine what disarmament measures would optimally require of verification methods Our ambition is to respond to this criticism at least so far as the strategic context of disarmament is concerned Chapter 1 introduces us to the enormous range of repercussions caused by a disarmament agreement Chapter 2 examines the concept of verification

analysing the meaning of the term presenting various definitions of what verification is and attempting to systematize the concept It has been noted on many occasions that the verification set up in a disarmament treaty is only one of a number of factors working towards compliance with a treaty In fact the role of verification in presenting the treaty and therefore the security of its participants is to a large extent limited However without many other conditions being satisfied verification on its own can do little to preserve the treaty regime Chapter 3 discusses these conditions Chapter 4 gives a brief analysis of the concept of national interests in general and the concept of national security in particular Among all the elements of security it is military security that plays by far the largest role Because of this Chapter 5 considers a specific case of strategic military security in which security defined as stable strategic deterrence between two states is analysed Finally Chapter 6 analyses the question of what happens to security based on strategic deterrence when states enter into the disarmament process More specifically the role of verification in preserving security in such circumstances is analysed thereby answering the main problem of the book The supporting data for Chapter 6 is given in the Appendix
