I. Gurdjieff,2021-07-20 Over one hundred years ago in Russia G I Gurdjieff introduced a spiritual teaching of conscious evolution a way of gnosis or knowledge of being passed on from remote antiquity Gurdjieff s early talks in Europe were published in the form of chronological fragments preserved by his close followers P D Ouspensky and Jeanne de Salzmann Now these teachings are presented as a comprehensive whole covering a variety of subjects including states of consciousness methods of self study spiritual work in groups laws of the cosmos and the universal symbol known as the Enneagram Gurdjieff respected traditional religious practices which he regarded as falling into three general categories or ways the Way of the Fakir related to mastery of the physical body the Way of the Monk based on faith and feeling and the Way of the Yogi which focuses on development of the mind He presented his teaching as a Fourth Way that integrates these three aspects into a single path of self knowledge The principles are laid out as a way of knowing and experiencing an awakened level of being that must be verified for oneself

*The Reality of Being* Jeanne de Salzmann, 2010-07-27 An important book on liberating ourselves from the state of waking sleep in which we live our lives as taught by one of the most influential spiritual teachers of the 20th century As the closest pupil of the charismatic spiritual master G I Gurdjieff 1866 1949 Jeanne de Salzmann was charged with carrying on his teachings of spiritual transformation Known as the Fourth Way or The Work Gurdjieff's system was based on teachings of the East that he adapted for modern life in the West Now some twenty years after de Salzmann's death the notebooks that she filled with her insights over a forty year period and intended to publish have been translated and edited by a small group of her family and followers The result is this long awaited guide to Gurdjieff's teaching describing the routes to be traveled and the landmarks encountered along the way Organized according to themes the chapters touch on all the important concepts and practices of the Work including Awakening from the sleep of identification with the ordinary level of being Self observation and self remembering Conscious effort and voluntary suffering Understanding symbolic concepts like the Enneagram The Gurdjieff Movements bodily exercises that provide training in Presence and the awareness of subtle energies The necessity of a school meaning the collective practice of the teaching in a group Madame de Salzmann brings to the Work her own strong direct language and personal journey in learning to live that knowledge of a higher level of being which she insists you have to see for yourself on a level beyond theory and concept De Salzmann consistently refused to discuss the teaching in terms of ideas for this Fourth Way is to be experienced not simply thought or believed **The Fourth Way: A Record of Talks and Answers to Questions Based on the Teaching of G. I. Gurdjieff** Peter Demianovich

Ouspensky, 2020-09-28 BEFORE I BEGIN TO EXPLAIN TO YOU in a general way what this system is about and to talk about our methods I want particularly to impress on your minds that the most important ideas and principles of the system do not belong to me This is chiefly what makes them valuable because if they belonged to me they would be like all other theories invented by ordinary minds they would give only a subjective view of things When I began to write *A New Model of the Universe* in 1907 I formulated to myself as many other people have done before and since that behind the surface of the life which we know lies something much bigger and more important And I said to myself then that until we know more about what lies behind all our knowledge of life and of ourselves is really negligible I remember one conversation at that time when I said If it were possible to accept as proven that consciousness or as I should call it now intelligence can manifest itself apart from the physical body many other things could be proved Only it cannot be taken as proved I realized that manifestations of supernormal psychology such as thought transference clairvoyance the possibility of knowing the future of looking back into the past and so on have not been proved So I tried to find a method of studying these things and worked on that line for several years I found some interesting things in that way but the results were very elusive and though several experiments were successful it was almost impossible to repeat them I came to two conclusions in the course of these experiments first that we do not know enough about ordinary psychology we cannot study supernormal psychology because we do not know

normal psychology Secondly I came to the conclusion that certain real knowledge exists that there may be schools which know exactly what we want to know but that for some reason they are hidden and this knowledge is hidden So I began to look for these schools I travelled in Europe Egypt India Ceylon Turkey and the Near East but it was really later when I had already finished these travels that I met in Russia during the war a group of people who were studying a certain system which came originally from Eastern schools This system began with the study of psychology exactly as I had realized it must begin The chief idea of this system was that we do not use even a small part of our powers and our forces We have in us so to speak a very big and very fine organization only we do not know how to use it In this group they employed certain oriental metaphors and they told me that we have in us a large house full of beautiful furniture with a library and many other rooms but we live in the basement and the kitchen and cannot get out of them If people tell us about what this house has upstairs we do not believe them or we laugh at them or we call it superstition or fairy tales or fables This system can be divided into study of the world on certain new principles and study of man The study of the world and study of man include in themselves a kind of special language We try to use ordinary words the same words as we use in ordinary conversation but we attach a slightly different and more precise meaning to them Study of the world study of the universe is based on the study of some fundamental laws which are not generally known or recognized in science The two chief laws are the Law of Three and the Law of Seven which will be explained later Included in this and necessary from this point of view is the principle of scale a principle which does not enter into ordinary scientific study or enters very little The study of man is closely connected with the idea of the evolution of man but the evolution of man must be understood in a slightly different way from the ordinary Ordinarily the word evolution applied either to man or to anything else presupposes a kind of mechanical evolution I mean that certain things by certain known or unknown laws transform into other things and these other things transform into still others and so on But from the point of view of this system there is no such evolution at all I do not speak in general but specifically of man The evolution of man if it occurs can only be the result of knowledge and effort as long as man knows only what he can know in the ordinary way there is no evolution for him and there never was any evolution for him Serious study begins in this system with the study of psychology that is to say with the study of oneself because psychology cannot be studied as astronomy can outside oneself A man has to study himself When I was told that I saw at once that we do not have any methods of studying ourselves and already have many wrong ideas about ourselves So I realized that we must get rid of wrong ideas about ourselves and at the same time find methods for studying ourselves Perhaps you realize how difficult it is to define what is meant by psychology There are so many meanings attached to the same words in different systems that it is difficult to have a general definition So we begin by defining psychology as study of oneself You have to learn certain methods and principles and according to these principles and using these methods you will try to see yourselves from a new point of view

*Views from the Real World* G.I. Gurdjieff, 2012-12-16 First published in 1973 this book has established itself

as an authentic source for those interested in Gurdjieff's ideas and his approach to practical Work on oneself. This new edition in hardback now includes an index.

**The Fourth Way Explained** Xognosis Esoterica, 2025-08-05. Finally all the essential Fourth Way teachings in one comprehensive guide. For decades seekers have struggled through scattered works by Gurdjieff, Ouspensky, and Nicoll trying to piece together this revolutionary system of self-remembering and conscious work. The Fourth Way Explained solves this problem with a single accessible volume for the modern reader. This visually rich guide features 38 original diagrams and charts that illuminate complex concepts previously buried in dense philosophical texts. What took Gurdjieff three volumes including Beelzebub's Tales, Ouspensky's *In Search of the Miraculous*, and other works plus Nicoll's extensive Commentaries to explain is now presented with clear visual learning tools you can use immediately for work on oneself. What makes the Fourth Way or 4th Way radically different? Unlike paths requiring monasteries or retreats, this system of practical mysticism transforms your everyday life into spiritual practice. Your job, stress, relationship conflicts, even smartphone habits become fuel for awakening. This is the way of the sly man achieving objective consciousness while fully engaged in ordinary life. Inside you'll discover visual maps showing how consciousness and self-remembering actually work. Step-by-step transformation processes, the octaves of change, charts comparing mechanical vs. conscious living, illustrated self-observation techniques from the Work, diagrams of energy transformation and the three centers, practical exercises for immediate application. These visual tools show exactly how to recognize mechanical patterns and false personality in daily life, create conscious shocks to awaken presence, transform negative emotions into growth through conscious suffering, build your magnetic center through conscious efforts, navigate personal development systematically. Written by a practitioner with over 30 years of experience in esoteric traditions and inner work, this synthesis bridges ancient wisdom with contemporary psychology and neuroscience. Readers typically report increased self-awareness within the first week and fundamental shifts in how they experience daily challenges within 30 days. This illustrated guide brings together the essential Fourth Way teachings from esoteric psychology to practical methods previously scattered across numerous works with the added clarity of visual learning. Whether you're a visual learner, student of Gurdjieff's ideas, or simply tired of living mechanically, this practical manual offers precise technology for moving from mechanical existence to conscious life. Your transformation starts with understanding made visually clear that you can wake up right where you are right now.
