Prison Worlds Didier Fassin, 2017-05-23 The prison is a recent

invention hardly more than two centuries old yet it has become the universal system of punishment How can we understand the place that the correctional system occupies in contemporary societies What are the experiences of those who are incarcerated as well as those who work there To answer these questions Didier Fassin conducted a four year long study in a French short stay prison following inmates from their trial to their release He shows how the widespread use of imprisonment has reinforced social and racial inequalities and how advances in civil rights clash with the rationales and practices used to maintain security and order He also analyzes the concerns and compromises of the correctional staff the hardships and resistance of the inmates and the ways in which life on the inside intersects with life on the outside In the end the carceral condition appears to be irreducible to other forms of penalty both because of the chain of privations it entails and because of the experience of meaninglessness it comprises Examined through ethnographic lenses prison worlds are thus both a reflection of society and its mirror At a time when many countries have begun to realize the impasse of mass incarceration and question the consequences of the punitive turn this book will provide empirical and theoretical tools to reflect on the meaning of punishment in contemporary societies

challenges they face *Environmental Criminology and Crime Analysis* Richard Wortley, Michael Townsley, 2016-11-01

Environmental criminology is a term that encompasses a range of overlapping perspectives. At its core, the many strands of environmental criminology are bound by a common focus on the role that the immediate environment plays in the performance of crime and a conviction that careful analyses of these environmental influences are the key to the effective investigation, control, and prevention of crime. This new edition brings together leading theorists and practitioners in the field to provide a comprehensive integrative coverage of the field of environmental criminology and crime analysis. This book is divided into three sequential parts. Understanding the crime event explores routine activity approach, crime pattern theory, the rational choice perspective, and situational precipitators of crime. Analysing crime patterns discusses crime mapping, offender mobility, repeat victimisation, geographic profiling, and crime scripts. Preventing and controlling crime covers topics including problem-oriented policing, situational crime prevention, and environmental design. Fully updated and including new chapters on crime scripts and offender mobility, a scene setting introductory overview, and critical thinking questions at the end of each chapter, this text is an essential and comprehensive resource for practitioners and students taking courses on environmental criminology, crime analysis, and crime prevention. Crime Opportunity Theories Mangai

Natarajan, 2017-07-05. Opportunity theories of crime seek to explain the occurrence of crime rather than simply the existence of criminal dispositions. They emphasize the fundamental element in the criminal act of opportunity: how this arises, how it is perceived, evaluated, and acted on by those with criminal dispositions. This volume brings together influential research articles on opportunity theories of crime by leading theorists such as Cohen and Felson on routine activity theory and Clarke and Cornish on the bounded rational choice perspective. The articles also include more recent theoretical developments and studies of situational crime prevention of specific twenty-first century crimes. These articles attest to the sheer volume as well as the richness and the variety of work designed to reduce crime that has forever changed the face of criminology and criminal justice. **American Prisons and Jails** Vidisha Barua Worley, Robert M.
