Bornstein, 2002 Despite the fact that most people

become parents and everyone who has ever lived has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree Striking permutations on the theme of parenting are emerging single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny      **Dating and Sexuality in America**

Lawrence-Lightfoot, 2016-09-29 From growing their children parents grow themselves learning the lessons their children teach Growing up then is as much a developmental process of parenthood as it is of childhood While countless books have been written about the challenges of parenting nearly all of them position the parent as instructor and support giver the child as learner and in need of direction But the parent child relationship is more complicated and reciprocal over time it transforms in remarkable surprising ways As our children grow up and we grow older what used to be a one way flow of instruction and support from parent to child becomes instead an exchange We begin to learn from them The lessons parents learn from their offspring voluntarily and involuntarily with intention and serendipity often through resistance and struggle

are embedded in their evolving relationships and shaped by the rapidly transforming world around them With Growing Each Other Up Macarthur Prize winning sociologist and educator Sara Lawrence Lightfoot offers an intimately detailed emotionally powerful account of that experience Building her book on a series of in depth interviews with parents around the country she offers a counterpoint to the usual parental development literature that mostly concerns the adjustment of parents to their babies rhythms and the ways parents weather the storms of their teenage progeny The focus here is on the lessons emerging adult children ages 15 to 35 teach their parents How are our perspectives as parents shaped by our children What lessons do we take from them and incorporate into our worldviews Just how much do we learn often despite our own emotionally fraught resistance from what they have seen of life that we perhaps never experienced From these parent portraits emerges the shape of an education composed by young adult children an education built on witness growing intimacy and acceptance Growing Each Other Up is rich in the voices of actual parents telling their own stories of raising children and their children raising them watching that fundamental connection shift over time Parents and children of all ages will recognize themselves in these evocative and moving accounts and look at their own growing up in a revelatory new light

provides the keys to understanding the trajectory that Japanese society has followed toward its lowest low fertility since the 1980s. The characteristics of the life course of women born in the 1960s who were the first cohort to enter that trajectory are explored by using both qualitative and quantitative data analyses. Among the many books explaining the decline in fertility, this book is unique in four ways. First, it describes in detail the reality of factors concerning the fertility decline in Japan. Second, the book uses both qualitative and quantitative methods to introduce the whole picture of how the low fertility trend began in the 1980s and developed in the 1990s and thereafter. Third, the focus is on a specific birth cohort because their experiences determined the current patterns of family formation such as late marriage and postponed childbirth. Fourth, the book explores the knife edge balance between work and family conditions especially with regard to childbearing in the context of Japanese management and gender norms. After examining the characteristics of demographic and socioeconomic circumstances of postwar Japan in detail, it can be seen that the change in family formation first occurred drastically in the 1960s cohort. Using both qualitative interview data cumulatively from 150 people and quantitative estimates with official statistics, this book shows how individual level choices to balance work and family obligations resulted in a national level fertility decline. Another focus of this book is the increasing unintended infertility due to postponed pregnancy, a phenomenon that is attracting great social attention because the average age of pregnancy is approaching the biological limit. This book is a valuable resource for researchers who are interested in the rapid fertility decline as well as the work life balance and the life course of women in Japanese employment practice and family traditions. **Clinical and Educational Interventions with Fathers** Jay Fagan, Alan Hawkins, 2018-10-24 Call on men's hidden strengths to help them become responsible fathers in even the most challenging circumstances. *Clinical and Educational Interventions with Fathers* gives you fresh approaches for effective interventions with fathers. Whether by calling on their faith to help them deal with the complexities of fatherhood or offering high tech interventions on the Internet, these techniques help men find their strengths, maintain their masculinity, and learn to guide, nurture, and discipline with love and responsibility. Instead of thinking of fathers as deficient, the book emphasizes finding fathers' strengths and potentials for growth. It also respects the diversity of parenting styles among fathers from various ethnic, racial, and class backgrounds. No man wants to be a bad father. Nevertheless, many men in our culture do not know how to care for the children they beget. Trapped by stereotypes of masculine behavior and deprived of positive role models, they find themselves trying to do the challenging work of fatherhood without the necessary resources, information, or support. *Clinical and Educational Interventions with Fathers* offers positive approaches to helping men become responsible fathers, including designing special techniques and programs to help fathers in prison and other challenging circumstances, helping fathers manage anger.
