W. Heldring, 2011-11-30 Africa in the mid nineteenth century was still very much an unknown continent its vast lands a source of unceasing interest and mystery La the white man This was the age of discovery the decades before the fascination wore off and the scramble for Africa began in earnest Explorers such as Burton Speke and Livingstone were the names on everyone s lips In this climate Albrecht Roscher grew up La be an outstanding young scholar whose interest in the works of classical writers such as Ptolemy and Herodotus inspired in him a love of geography science and biology which the achievements of Burton and others only served to inflame Africa beckoned However little did he imagine as he left Germany for the shores of East Africa that he would never return His murder before he managed to fulfill his ambitions has ensured that he has been largely consigned to a footnote in the history of African exploration In *The Killing of Dr Albrecht Roscher* Heldring sets out to redress the balance in what is a fitting tribute to a man who had he lived longer might have gone on to rival the achievements of Burton Livingstone and the other great explorers of that age **Interpreting Our World** Joseph

Christianity and Missions, 1450-1800 J. S. Cummins, 2016-12-05 The theme of this volume is the transformation of European Christianity into a world wide religion The spirit of crusade against Islam was one impulse driving the early expansion these essays show how new ideologies of mission were developed and how perceptions have continued to evolve notably in the light of Vatican II They reveal the differing attitudes and roles of missionaries in such radically different environments as America and China and the equally varied ways in which this activity was received with the many problems of accommodation and syncretism Topics covered include the development of new institutions to control missionary activity notably the Roman Propaganda Fidei tensions around race and the role of women and the stimulus given for instance to linguistic studies by the need to communicate Finally they examine the belated awakening of the Protestant churches to the need to compete with Rome in the evangelization of the world

Strangers in the South Seas Richard Lansdown, 2006-04-30 Long before Magellan entered the Pacific in 1521 Westerners entertained ideas of undiscovered oceans mighty continents and paradisaic islands at the far ends of the earth First set down by Egyptian storytellers Greek philosophers and Latin poets such ideas would have a long life and a deep impact in both the Pacific and the West With the discovery of Tahiti in 1767 another powerful myth was added to this collection the noble savage For the first time Westerners were confronted by a people who seemed happier than themselves This revolution in the human sciences was accompanied by one in the natural sciences as the region revealed gaps and anomalies in the great chain of being that Charles Darwin would begin to address after his momentous visit to the Galapagos Islands The Pacific produced similar challenges for nineteenth century researchers on race and culture and for

those intent on exporting their religions to this immense quarter of the globe Although most missionary efforts ultimately met with success others ended in ignominious retreat As the century wore on the region presented opportunities and dilemmas for the imperial powers leading to a guilty desire on the part of some to pull out along with an equally guilty desire on the part of others to stay and help This process was accelerated by the Pacific War between 1941 and 1945 After more than two millennia of fantasies the story of the West's fascination with the insular Pacific graduated to a marked sense of disillusion that is equally visible in the paintings of Gauguin and the journalism of the nuclear Pacific Strangers in the South Seas recounts and illustrates this story using a wealth of primary texts It includes generous excerpts from the work of explorers soldiers naturalists anthropologists artists and writers some famous some obscure It begins in 1521 with an account of Guam by Antonio Pigafetta one of the few men to survive Magellan's circumnavigation voyage and ends in the late 1980s with the writing of an American woman Joana McIntyre Varawa as she faces the personal and cultural insecurities of marriage and settlement in Fiji It shows how the Great South Sea has been an irreplaceable distant mirror of the West and its intellectual obsessions since the Renaissance Comprehensively illustrated and annotated this anthology will introduce readers to a region central to the development of modern Western ideas This is a carefully conceived anthology covering an excellent range of subjects The selections are well chosen and interesting and the introductory materials are both scholarly and accessible It should be widely used in university courses dealing with almost any aspect of the Pacific Rod Edmond University of Kent at Canterbury

Science, Empire and the European Exploration of the Pacific Tony Ballantyne, 2018-10-24 This collection of essays assesses the interrelationship between exploration empire building and science in the opening up of the Pacific Ocean by Europeans between the early 16th and mid 19th century It explores both the role of various sciences in enabling European imperial projects in the region and how the exploration of the Pacific in turn shaped emergent scientific disciplines and their claims to authority within Europe Drawing on a range of disciplines from the history of science to geography imperial history to literary criticism this volume examines the place of science in cross cultural encounters the history of cartography in Oceania shifting understandings of race and cultural difference in the Pacific and the place of ships books and instruments in the culture of science It reveals the exchanges and networks that connected British French Spanish and Russian scientific traditions even in the midst of imperial competition and the ways in which findings in diverse fields from cartography to zoology botany to anthropology were disseminated and crafted into an increasingly coherent image of the Pacific its resources peoples and histories This is a significant body of scholarship that offers many important insights for anthropologists and geographers as well as for historians of science and European imperialism
