Social Change And Conservation:

Social Change and Conservation Kléber Bertrand Ghimire, Michel P. Pimbert, 2009 This is a powerful book It is about conflict rights process professionalism paradigms power politics gender biodiversity sustainability and political economy It argues a case for radical reorientation in the current conservation thinking and argues it with empirical evidence and moral force The chapters individually and cumulatively pack formidable punch There is an alternative paradigm here which is practical and which simply has to be the wave of the future The question is not whether this paradigm will prevail but how soon and how well There is a wonderful opportunity for a win win scenario with gains both for people and for nature Rober Chambers Professor Institute of Development Studies UK This book should become the starting point of a worldwide public enquiry into the workings of institutions and international policies committed to conservation The general public who have very generously supported the cause of conservation have a right to know why many advertised conservation policies have not succeeded where the real problems lie what should be done in the future and who we should turn to for help These are some of the questions addressed in this volume Vithal Reian Founder Member of the Deccan Development Society and the Confederation of Voluntary Associations India member of the Right Livelihood Award Jury Sweden Protected areas and conservation policies are usually established with only local nature and wildlife in mind Yet they can have far reaching consequences for local populations often undermining their access to resources and their livelihoods Social Change and Conservation is the first comprehensive discussion of the social consequences of protected area schemes and conservation policies
