Social Class and Education Diane Reay, Carol Vincent, 2016-04-08 Theorizing Social Class and Education presents a selection of writing on class analysis within sociology of education as it has evolved over the last decade both in the UK and internationally Moving from a narrow focus on class position and categorisation to a much broader view on behaviours attitudes identities and practices the contributors explore and theorize the ways in which particular individuals develop their perspectives and understandings of the social world and the role education plays in shaping these This book was originally published as a special issue of the British Journal of Sociology of Education *The Elusive What and the Problematic How*, 2008-01-01 For the authors in this book there can be no valid excuses for ignorance in any aspect of education as theory practice That is If we come to learn that all educational problems involve knowledge of complex systems and processes then quick simple solutions should not be an educator's first or only expedient option If all education requires a measure of cultural and contextual understandings then uniform standardized programs and lessons will not meet the needs of all children or communities If educational change takes time and strenuous efforts to take hold then why do we abandon and restart reforms efforts year after year If educational practices are best performed by those closest to the problems then why do we not prepare and continuously develop teachers and administrators to grow intellectually and politically to make wise decisions If who a person is culturally and intellectually shapes who they are as educators then why are our recruitment selection induction and retention policies not influenced by this assumption If today's best practices have not taken careful note of successes in the past then how do we validly measure best practices in use today If one time standardized test scores are not adequate measures of a person's worth a teacher's competency or a school's value to its community then why do our policies and practices say otherwise Unfortunately our ignorance of the what and the how of education and educational leadership has persisted across contexts and history Why This book provides both theoretical and practical answers to these elusive and problematic issues *Underachievement in Schools* Anne West, Hazel Pennell, 2003 An analysis of how recent research and theory about underachievement and disadvantage in schools can be applied in practice
