Sounds Of Home:

Ultimate Speech Sounds Kate Beckett, 2024-01-31 Ever faced challenges motivating clients to participate in speech therapy practice at home Directing parents to helpful resources that reinforce acquired skills from therapy sessions can be a problem This book provides easy to follow instructions educational resources and links to 3D animated clips for therapists to use with parents to ensure perfect technique every time The book considers each of the 24 English consonants 16 monophthongs and 8 diphthongs in detail with regards to anatomy physiological production and therapy materials to be used in practice It is accompanied by online 3D animated video material featuring DARA an avatar that sounds out each consonant or vowel clearly showing how the shape of the mouth and positioning of the tongue forms each sound Photocopiable and free downloadable material from Resourceable com also makes ideal resources for parents to use at home This book offers a toolkit to support technique explanation to parents and children rather than an education for therapists It is a practical clinic resource to help speech therapists teach speech sound formation along with suggested elicitation techniques This is an essential component for newly qualified and student SLTs as well as those more seasoned in the field

Sound Design and Science Fiction William Whittington, 2021 Sound is half the picture and since the 1960s film sound not only has rivaled the innovative imagery of contemporary Hollywood cinema but in some ways has surpassed it in status and privilege because of the emergence of sound design This in depth study by William Whittington considers the evolution of sound design not only through cultural and technological developments during the last four decades but also through the attitudes and expectations of filmgoers Fans of recent blockbuster films in particular science fiction films have come to expect a more advanced and refined degree of film sound use which has changed the way they experience and understand spectacle and storytelling in contemporary cinema The book covers recent science fiction cinema in rich and compelling detail providing a new sounding of familiar films while offering insights into the constructed nature of cinematic sound design This is accomplished by examining the formal elements and historical context of sound production in movies to better appreciate how a film sound track is conceived and presented Whittington focuses on seminal science fiction films that have made specific advances in film sound including 2001 A Space Odyssey THX 1138 Star Wars Alien Blade Runner original version and director s cut Terminator 2 Judgment Day and The Matrix trilogy and games milestones of the entertainment industry s technological and aesthetic advancements with sound Setting itself apart from other works the book illustrates through accessible detail and compelling examples how swiftly such advancements in film sound aesthetics and technology have influenced recent science fiction cinema and examines how these changes correlate to the history theory and practice of contemporary Hollywood filmmaking

Sound Work Jonathan Impett, 2021-12-15 The practices and perception of music creation have evolved with the cultural social and technological contexts of music and musicians But musical authorship in its many technical and aesthetic modes remains an important component of music culture Musicians are increasingly called on to share their

experience in writing However cultural imperatives to account for composition as knowledge production and to make claims for its uniqueness inhibit the development of discourse in both expert and public spheres Internet pioneer Philip Agre observed a discourse deficit in artificial intelligence research and proposed a critical technical practice a single disciplinary field with one foot planted in the craft work of design and the other foot planted in the reflexive work of critique A critical technical practice rethinks its own premises re evaluates its own methods and reconsiders its own concepts as a routine part of its daily work This volume considers the potential for critical technical practice in the evolving situation of composition across a wide range of current practices In seeking to tell more honest useful stories of composition it hopes to contribute to a new discourse around the creation of music
