This book lays claim to no other merit than that of being an earnest attempt to meet the demand often expressed for an American text book on the subjects herein discussed Many of the features of the service of security and information are common to both hemispheres and to all armed forces whether savage hordes or highly organized armies Other details of the same science vary with the topography the organization of the army national characteristics and the nature of the enemy encountered It follows therefore that a text book on this subject might be admirably adapted to the requirements of European officers and at the same time be in some respects quite unsuited to our needs From preface to the first edition
