South Africa Wealth Poverty And Reconstruction:

Social Demography of South Africa Clifford O. Odimegwu, John Kekovole, 2015-08-27 This edited collection investigates what progress has been made in the field of social demography in South Africa since the democratic dispensation in the country Contributors offer a compilation of in depth analytical studies of substantive technical and contemporary issues in the South African demographic landscape Accessible and topical it is a useful reference guide to those working in disciplines such as sociology geography statistics and economics and to all those trying to understand the role of national statistical agency in national development planning in Africa This book project is funded by Statistics South Africa Pretoria South Africa

South Africa Siri Gloppen, 2019-05-23 Originally published in 1997 South Africa The Battle over the Constitution analyses rivaling positions in the South African constitutional debate from the early 1990s via the 1993 interim constitution to the adoption and certification of the new Final Constitution in December 1996 A theoretical framework is developed to analyze the constitutional structure of the contesting constitutional models and the book looks into their potential for addressing the problems of violence social inequality and ethnic tension and for achieving legitimacy and constitutionalism It argues that the constitutional solutions are premised on incomparable conceptions of South African reality and that the Final Constitution includes elements based on incompatible world views The compromises required by the constitutional moment could pose problems for the constitutional function The book also discusses other factors influencing the consolidation of a constitutional democracy in South Africa such as the role of the Constitutional Court and the attempts to create legitimacy for the constitution by broad public participation in the constitution making process **South Africa** Lual Acuek Lual

Deng, Elling Njål Tjønneland, 1996 Examines economic development and poverty eradication programmes in South Africa from the early 1980s up to early 1990s **From Crisis to Growth in Africa** Mats Lundahl, 2005-07-05 This book is

concerned with the problem of achieving sustained economic growth in thirteen African countries These are divided into three groups the war stricken economies Angola Guinea Bissau Ethiopia and Eritrea the reform strugglers Kenya Cape Verde Zambia Tanzania Mozambique and Zimbabwe and the growth seekers Uganda South Africa and Lesotho Virtually all of these countries have gone through a structural adjustment program designed to remove imperfections that make it difficult for the market system to work in an optimal fashion This title reviews these experiences **Rethinking African Development**

Lual Acuek Lual Deng, 1998 **Building and Sustaining the Capacity for Social Policy Reforms** Belkacem

Laabas, 2017-11-22 This title was first published in 2000 Ten papers on poverty alleviation and social policy matters applied to Arab countries and Africa They explore the impact on the vulnerable of the implementation of structural adjustment programmes and look at poverty alleviation and social policies health care and social security issues *Health and Health Care in South Africa* H. C. J. Van Rensburg, 2004 Health and healthcare in South Africa attempts to capture the essence of transformation and trends in the South African health sector It offers on the one hand an overview of recent and current

developments in the South African health care system and on the other of trends in the health status of the South African population The book is a follow up to the well known Health care in South Africa structure and dynamics Van Rensburg Fourie Pretorius 1992 published just before the transition to a democratic society The book retains a strong historical thread but the focus is generally on the nature of the transformation process gains made and failures encountered **Journal of Social Development in Africa** ,1996 Comparing Brazil and South Africa Steven Friedman,Riaan De Villiers,1996

The Oxford Companion to the Economics of South Africa Haroon Borat,Alan Hirsch,Ravi Kanbur,Mthuli Ncube,2014-11-27 In 1994 South Africa saw the end of apartheid The new era of political freedom was seen as the foundation for economic prosperity and inclusion The last two decades have seen mixed results Economic growth has been volatile While inequalities in public services have been reduced income inequality has increased and poverty has remained stagnant As the twentieth anniversary of the transition to democracy approaches in 2014 the economic policy debates in South Africa are in full flow They combine a stocktake of the various programs of the last two decades with a forward looking discussion of strategy in the face of an ever open but volatile global economy Underlying the discourse are basic and often unresolved differences on an appropriate strategy for an economy like South Africa with a strong natural resource base but with deeply entrenched inherited inequalities especially across race This volume contributes to the policy and analytical debate by pulling together perspectives on a range of issues micro macro sectoral country wide and global from leading economists working on South Africa Other than the requirement that it be analytical and not polemical the contributors were given freedom to put forward their particular perspective on their topic The economists invited are from within South Africa and from outside from academia and the policy world from international and national level economic policy agencies The contributors include recognized world leaders in South African economic analysis as well as the very best of the younger crop of economists who are working on the study of South Africa the next generation of leaders in thought and policy
