South Atlantic Urban Studies Vol 2:

South Atlantic Urban Studies, 1981 **One More Day's Journey** Allen B. Ballard, 1984 This book reflects on the lives and histories of Black Philadelphians and South Carolinians No Straight Path Elizabeth Jacoway, 2019-09-04 No Straight Path tells the stories of ten successful female historians who came of age in an era when it was unusual for women to pursue careers in academia especially in the field of history These first person accounts illuminate the experiences women of the post World War II generation encountered when they chose to enter this male dominated professional world None of the contributors took a straight path into the profession most first opted instead for the more conventional pursuits of college public school teaching marriage and motherhood Despite these commonalities their stories are individually unique one rose from poverty in Arkansas to attend graduate school at Rutgers before earning the chairmanship of the history department at the University of Memphis another pursued an archaeology degree studied social work and served as a college administrator before becoming a history professor at Tulane University a third was a lobbyist who attended seminary then taught high school entered the history graduate program at Indiana University and helped develop two honors colleges before entering academia and yet another grew up in segregated Memphis and then worked in public schools in New Jersey before earning a graduate degree in history at the University of Memphis where she now teaches The experiences of the other historians featured in this collection are equally varied and distinctive Several themes emerge in their collective stories Most assumed they would become teachers nurses secretaries or society ladies the only respectable choices available to women at the time The obligations of marriage and family they believed would far outweigh their careers outside the home Upon making the unusual decision at the time to move beyond high school teaching and attend graduate school few grasped the extent to which men dominated the field of history or that they would be perceived by many as little more than objects of sexual desire The work home balance proved problematic for them throughout their careers as they struggled to combine the needs and demands of their families with the expectations of the profession These women had no road maps to follow The giants who preceded them Gerda Lerner Anne Firor Scott Linda K Kerber Joan Wallach Scott A Elizabeth Taylor and others had breached the gates but only with great drive and determination Few of the contributors to No Straight Path expected to undertake such heroics or to rise to that level of accomplishment They may have had modest expectations when entering the field but with the help of female scholars past and present they kept climbing and reached a level of success within the profession that holds great promise for the women who follow *Urban Policy in Twentieth-century America* Arnold Richard Hirsch, Raymond A. Mohl, 1993 The recent riots in Los Angeles brought the urban crisis back to the center of public policy debates in Washington D C and in urban areas throughout the United States The contributors to this volume examine the major policy issues race housing transportation poverty the changing environment the effects of the global economy confronting contemporary American cities Raymond A Mohl begins with an extended discussion of the origins evolution and

current state of Federal involvement in urban centers Michael B Katz follows with an insightful look at poverty in turn of the century New York and the attempts to ameliorate the desperate plight of the poor during this period of rapid economic growth Arnold R Hirsch Mohl and David R Goldfield then pursue different facets of the racial dilemma confronting American cities Hirsch discusses historical dimensions of residential segregation and public policy while Mohl uses Overtown Miami as a case study of the social impact of the construction of interstate highways in urban communities David Goldfield explores the political ramifications and incongruities of contemporary urban race relations Finally Carl Abbott and Sam Bass Warner Jr examine the impact of global economic developments and the environmental implications of past policy choices Collectively the authors show us where we have been some of the needs that must be addressed and the urban policy alternatives we face

Falk,Kevin McDonald,Ed McConville,Mimi Conway,Allen Tullos,Peter Wood,Steve Hoffius,Roy Appleton,Hilary Hylton,Richard Couto,Linda Thalman,Bob Broedel,Dan Blumenthal,Joyce Goldstein,Helen M. Lewis,M.H. Ross,Barbara Berney,Matt Witt,Marc Miller,1978 Three years ago when I first met Talbert Faircloth and his wife Dora I found it very hard to believe the story that they told me Talbert was sick at the time and jobless and angry Two years earlier he had been carried breathless out of the cotton mill on a stretcher never to return to work again I found it hard to believe that thousands of workers in the South s largest and oldest industry could have been afflicted by a crippling disease for years and not have known that they had it or even what caused it In time I learned that Talbert s story like that of 35 000 other Southern textile workers was so wrought with truth and so difficult for the region s most powerful industry to accept that it had been suppressed and ignored for decades A year ago during a conference at

Highlander Center in Tennessee I first heard Les Falk recount his experiences as medical administrator for the United Mine Workers Health and Retirement Fund The conference brought together doctors nurses organizers and health workers from across the South to discuss topics and articles for this health issue of Southern Exposure and to share common experiences in the health field Les Falk s recollections of the UMWA Fund s battles with entrenched coal company doctors during the early 1950s gave our gathering of Southern health activists a sense of rootedness in our region s tradition of struggle and innovation in organizing health care

The Irish in the South, 1815-1877 David T. Gleeson, 2002-11-25 The only comprehensive study of Irish immigrants in the nineteenth century South this book makes a valuable contribution to the story of the Irish in America and to our understanding of southern culture The Irish who migrated to the Old South struggled to make a new home in a land where they were viewed as foreigners and were set apart by language high rates of illiteracy and their own self identification as temporary exiles from famine and British misrule They countered this isolation by creating vibrant tightly knit ethnic communities in the cities and towns across the South where they found work usually menial jobs Finding strength in their communities Irish immigrants developed the confidence to raise their voices in the public arena forcing native southerners to recognize and accept them first politically then socially The Irish integrated into southern society without abandoning their ethnic identity They displayed their loyalty by fighting for the Confederacy during the Civil War and in particular by opposing the Radical Reconstruction that followed By 1877 they were a unique part of the Solid South Unlike the Irish in other parts of the United States the Irish in the South had to fit into a regional culture as well as American culture in general By following their attempts to become southerners we learn much about the unique experience of ethnicity in the American South

Myth and Southern History: The Old South Patrick Gerster, Nicholas Cords, 1989 Many historical myths are actually false yet psychologically true The contributors to this volume see myth and reality as complementary elements in the historical record *Myth and Southern History* is as much a commentary on southern historiography as it is on the viability of myth in the historical process Volume 2 *The New South* offers new perspectives on the North s role in southern mythology the so called Savage South twentieth century black and white southern women and the changes that distinguish the late twentieth century South from that of the Civil War era

The Origins of the Southern Middle Class,

1800-1861 Jonathan Daniel Wells,2005-11-16 With a fresh take on social dynamics in the antebellum South Jonathan Daniel Wells contests the popular idea that the Old South was a region of essentially two classes planters and slaves until after the Civil War He argues that in fact the region had a burgeoning white middle class including merchants doctors and teachers that had a profound impact on southern culture the debate over slavery and the coming of the Civil War Wells shows that the growth of the periodical press after 1820 helped build a cultural bridge between the North and the South and the emerging southern middle class seized upon northern middle class ideas about gender roles and reform politics and the virtues of modernization Even as it sought to emulate northern progress however the southern middle class never abandoned its attachment to slavery By the 1850s Wells argues the prospect of industrial slavery in the South threatened northern capital and labor causing sectional relations to shift from cooperative to competitive Rather than simply pitting a backward slave labor agrarian South against a progressive free labor industrial North Wells argues that the Civil War reflected a more complex interplay of economic and cultural values

The Urban South Lawrence H. Larsen,2021-12-14 In this panoramic survey of urbanization in the American South from its beginnings in the colonial period through the Sunbelt era of today Lawrence Larsen examines both the ways in which southern urbanization has paralleled that of other regions and the distinctive marks of southernness in the historical process Larsen is the first historian to show that southern cities developed in layers spreading ever westward in response to the expanding transportation needs of the Cotton Kingdom Yet in other respects southern cities developed in much the same way as cities elsewhere in America despite the constraints of regional racial and agrarian factors And southern urbanites far from resisting change quickly seized upon technological innovations most recently air conditioning to improve the quality of urban life Treating urbanization as an independent variable without an ideological foundation Larsen demonstrates that focusing on the introduction of certain city services such as sewerage and professional fire departments enables the historian to determine points of urban progress Larsen s landmark study provides a new perspective not only on a much ignored aspect of the history of the South but also on the relationship of the distinctive cities of the Old South to the new concept of the Sunbelt city Carrying his story down to the present he concludes that southern cities have gained parity with others throughout America This important work will be of value to all students of the South as well as to urban historians

European and Non-European Societies, 1450-1800

Robert Forster,2019-07-16 First published in 1997 this is the first of two volumes It looks at the process of European expansion which brought into contact societies and cultures across the world which had been initially alien to one another

Conflict and violent conflict was one aspect of this interaction but accommodation mutual adaptation and institutional and behavioural synthesis were also present though often biased in favour of European norms The intent of this book is to avoid treating colonization dominance and exploitation as the only focuses of attention In the first volume Robert Forster explores issues of formative influences the impact of Eurocentrism on historiography and the reaction against it and the differing approaches and perceptions of the Europeans notably the Spanish French and English In this period he distinguishes three modes of interaction that of the trading empires generally in Africa and Asia where the European control of the encounter was slighter and those of the regions of settlement as in North America and of exploitation typified by the Caribbean where the European impact was profound The second volume focuses on the Americas and uses the topics of religion class gender and race as its points of entry
