South Side Stories Steven Bosak, Steve Bosak, 1994-07 **Forthcoming Books** Rose Army, 2003 **The Lever of Riches** Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation's creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential **The Musical Leader**, 1928 **Popular Fronts** Bill Mullen, 1999 In a stunning revision of radical politics during the Popular Front period Bill Mullen redefines the cultural renaissance of the 1930s and early 1940s as the fruit of an extraordinary rapprochement between African American and white members of the U S Left struggling to create a new American Negro culture A dynamic reappraisal of a critical moment in American cultural history Popular Fronts includes a major reassessment of the politics of Richard Wright's critical reputation a provocative reading of class struggle in Gwendolyn Brooks's A Street in Bronzeville and in depth examinations of the institutions that comprised Chicago's black popular front The Chicago Defender the period's leading black newspaper Negro Story the first magazine devoted to publishing short stories by and about black Americans and the WPA sponsored South Side Community Art Center **Anna**

Dudley, 1996-12-31 Dudley and a research team go back to 24 ministries still in existence five years after the Church and Community Project s completion They discovered how the myths and expectations of funding lay clergy leadership and church society partnerships were shattered by what is doable how the often Herculean efforts frustrated and tired participants who were then uplifted and sustained by making a difference and how faith was the foundation for action and how through action the poor the homeless and others in need became real people and not statistics
