Byington,2020-05-11 Mark E Byington explores the formation history and legacy of the ancient state of Puy which existed in central Manchuria from the third century BCE until the late fifth century CE As the earliest archaeologically attested state to arise in northeastern Asia Puy occupies an important place in the history of that region Nevertheless until now its history and culture have been rarely touched upon in scholarly works in any language The present volume utilizing recently discovered archaeological materials from Northeast China as well as a wide variety of historical records explores the social and political processes associated with the formation and development of the Puy state and discusses how the historical legacy of Puy its historical memory contributed to modes of statecraft of later northeast Asian states and provided a basis for a developing historiographical tradition on the Korean peninsula Byington focuses on two major aspects of state formation as a social process leading to the formation of a state level polity called Puy and as a political process associated with a variety of devices intended to assure the stability and perpetuation of the inegalitarian social structures of several early states in the Korea Manchuria region Scandinavia since 1500 Byron J. Nordstrom,2023-06-27 An updated edition of the definitive history of Scandinavia over the past five centuries Despite certain distinctions and differences the lands of Scandinavia or Norden Sweden Norway Finland Iceland Denmark and the Faroe Islands are united by bonds of culture language and geography and by a shared

history that comes richly to life in this landmark work Now in an expanded updated edition this authoritative chronicle of five centuries of Scandinavian history incorporates the geopolitical developments and momentous events that have marked the Nordic world in recent decades Scandinavia since 1500 situates the region's political history within the traditional European chronology in which the long modern period is subdivided into the Renaissance early modern modern and contemporary Within this framework Byron J Nordstrom traces the various ways in which economic social and cultural ideas and practices have come to Scandinavia from abroad only to be modified and recast in a uniquely Nordic character Long unquestioned national mythologies come under Nordstrom's scrutiny along with historical blind spots and erasures as he ranges from canonical figures like Gustavus Adolphus of Sweden and Christian IV of Denmark to the constitutions of the nineteenth and twentieth centuries the resistance movements in World War II and the Scandinavian welfare states literary culture and modern design Expanded to include the nature and realities of the increasingly postindustrial economies of the late twentieth and early twenty first centuries including environmental concerns integration with Europe globalization and immigration Scandinavia since 1500 offers a comprehensive yet nuanced portrait of this unique region in all its political diplomatic social economic and cultural complexity
