Soviet and East European Law and the Scientific-technical Revolution , 1980* Law And Economic Development In The Soviet Union Peter B. Maggs, 2019-03-04 In the past Soviet policymakers planners and jurists in their enthusiasm for economic and technological development devoted little attention to the often negative consequences of modernization New concerns however have become apparent in recent literature statutes and decrees In this book political scientists and experts on Soviet law address many of those concerns analyzing the legal issues associated with economic modernization in the USSR The central themes of the book are the increasingly centralized nature of the policymaking process in the USSR and Eastern Europe and the marked tendency to rely on law as a principal mechanism for managing the undesirable consequences of scientific and technological progress The authors also assess the impact of the scientific technical revolution on Soviet East European relations and East West relations emphasizing the foreign policy consequences of increased financial and technological interdependence The study does not deal with narrow legalistic issues of technical progress rather its focus on policy questions reflects the inclination of Soviet and Eastern European governments to view those questions in terms of law and legislative activity and to see law as an instrument of social engineering *The Soviet-Eastern European Research and Training Act of 1983* United States. Congress. House. Committee on Education and Labor.

Subcommittee on Postsecondary Education, 1983 **The Communist Party and Soviet Science** Stephen

Fortescue, 1986-06-18 *Comecon* J. J. Brine, 1992 Comecon or the Council for Mutual Economic Assistance was founded by Joseph Stalin in 1949 to counteract the Marshall Plan and reinforce the bonds between the Soviet Union and the people s democracies of Eastern Europe Other Soviet Bloc nations later joined Comecon and for forty years it dominated the trade policies of the Soviet Bloc and profoundly influenced their domestic economic development and relations with the West

Comecon collapsed in 1991 after the countries of Eastern Europe rejected communism. It was often compared with the West European Common Market but differed vastly in its aims, structure, powers and activities. Its influence is a critical factor in assessing both the economic failures of the Soviet Bloc and the problems facing former member states as they make the transition to free market economies. This detailed annotated bibliography is an essential guide to the extensive English language literature about Comecon from its founding until its demise. Chapters cover Comecon's history, structure and law, socialist economic integration, the organization's arrangements for international trade and finance, environment, natural resources and energy, labor, industry and agriculture, science and technology. Comecon, like the rest of the Soviet Bloc, collapsed suddenly but its legacy will color international relations and worldwide economic issues for years to come. An understanding of its institutions, mechanisms and policies remains vital. In appreciating the economic organization of the former Soviet empire, this bibliography will therefore be indispensable to policymakers, economists, historians and political scientists.

The Making of Intellectual Property Law in Vietnam Tran Kien, 2025-09-03

This book is about the making of intellectual property law in Vietnam across colonial and socialist space and time from 1864 to 1994. It provides a completely new, provoking narrative disproving previously published scholarship which claimed that there was no intellectual property law in Vietnam during the colonial and socialist periods. In doing so, the book engages with an emerging field of historiographical inquiry into the intellectual property law history in Vietnam and worldwide, which investigates how and why the scholarship about the history of intellectual property law has been construed and framed as such within a specific period and space. This book is comprised of three knowledge components. The first involves the reconstruction of the lost intellectual property law from 1864 to 1994 in Vietnam doctrinally. Relying on newly discovered archives in Vietnam and worldwide, it unravels a corpus of statutory and regulatory provisions and interesting, at times contradictory, juridical decisions that governed and interpreted copyright, patent and trademark. The second is the historiographical inquiry of the making of the intellectual property law history scholarship in Vietnam. This will answer the questions of how and why the particular histories had been construed and framed as such at a particular time. This involves the debate about sociopolitical ideologies underlying the meaning and application of the laws, most notably colonialism and socialism. Finally, the third engages with the theory of legal transplantation. It addresses a hypothetical question of colonial laboratory as a form of legal transplantation, a new concept that this book offers to the global scholarship. It demonstrates that the colonial empire had tried to use Vietnam as a laboratory for its legal reform and then transplanted the successful and feasible results back to the empire. This book explains the distinctively ideological principles underlying the understanding and application of the law.
