The Heritage Of Wisdom Essays In The History Of Philosophy:

The Heritage of Wisdom Anthony Kenny, 1987-01-01 *The Metaphysics of Creation* Norman Kretzmann, 1999-06-17

About Aquinas St Thomas Aquinas lived from 1224/5 to 1274 mostly in his native Italy but for a time in France He was the greatest of the medieval philosopher theologians and one of the most important of all Western thinkers His most famous books are the two summaries of his teachings the *Summa contra gentiles* and the *Summa theologiae* About this book Norman Kretzmann expounds and criticizes Aquinas's natural theology of creation which is natural or philosophical in virtue of Aquinas's having developed it without depending on the data of Scripture The *Metaphysics of Creation* is a continuation of the project Kretzmann began in *The Metaphysics of Theism* moving the focus from the first to the second book of Aquinas's *Summa contra gentiles* Here we find Aquinas building upon his account of the existence and nature of God arguing that the existence of things other than God must be explained by divine creation out of nothing He develops arguments to identify God's motivation for creating to defend the possibility of a beginningless created universe and to explain the origin of species He then focuses exclusively on creatures with intellects with the result that more than half of his natural theology of creation constitutes a philosophy of mind Kretzmann gives a masterful guide through all these arguments As before he not only expounds Aquinas's natural theology but advocates it as the best historical instance available to us Peter Geach:
Philosophical Encounters H.A. Lewis, 2013-03-09 The present volume owes its existence to a proposal of Dr Esa Saarinen Our aim was to celebrate the work of a living philosopher by presenting it both from his own point of view through the medium of a philosophical autobiography and from that of his closest philosophical colleagues and adversaries We felt that a philosophical career lived through vigorous controversy was best reflected not by adulation but in the spirit of that career by open debate Contributors were not constrained in their choice of topic but their contributions fell naturally into groups linked with some of Peter Geach's principal areas of interest and we have so grouped them in the book There is an interweaving of biographical and philosophical themes not only in Peter Geach's philosophical autobiography but also in the introductions he has contributed to each section Professor W V O Quine's contribution which consists of extracts from his correspondence with Peter Geach has been set apart as it forms a natural bridge between Peter Geach's autobiography and the contributions that follow Their correspondence reproduced here throws new light on many familiar themes from the writings of both philosophers among them the objects of belief and other attitudes issues in set theory the nature of causality and evolution in epistemology **Philosophical Reflections on Medical Ethics** N. Athanassoulis, 2005-09-08 This book provides a collection of original essays on cutting edge topics in medical ethics research Leading philosophers give in depth accounts of issues as diverse as embryo pre selection the role of autonomy in organ transplant markets conscientious objection in the health care professions and neonatal euthanasia Provocative and original the contributions to this volume will be of interest to academic students and health care professionals alike Biographical Dictionary of Twentieth-Century Philosophers

Stuart Brown, Diane Collinson, Robert Wilkinson, 2012-09-10 This Biographical Dictionary provides detailed accounts of the lives, works, influence and reception of thinkers from all the major philosophical schools and traditions of the twentieth century. This unique volume covers the lives and careers of thinkers from all areas of philosophy from analytic philosophy to Zen and from formal logic to aesthetics. All the major figures of philosophy such as Nietzsche, Wittgenstein and Russell are examined and analysed. The scope of the work is not merely restricted to the major figures in western philosophy but also covers in depth a significant number of thinkers from the near and far east and from the non-European, Hispanic language communities. The Biographical Dictionary also includes a number of general entries dealing with important schools of philosophy such as the Vienna Circle or currents of thought such as vitalism. These allow the reader to set the individual biographies in the context of the philosophical history of the period. With entries written by over 100 leading philosophy scholars, the Biographical Dictionary is the most comprehensive survey of twentieth century thinkers to date.

Structure The book is structured alphabetically by philosopher. Each entry is identically structured for ease of access and covers nationality, dates and places of birth and death, philosophical style or school, areas of interest, higher education, significant influences, main appointments, main publications, secondary literature, account of intellectual development and main ideas, critical reception and impact. At the end of the book, a glossary gives accounts of the schools, movements and traditions to which these philosophers belonged, and thorough indexes enable the reader to access the information in several ways: by nationality, by major areas of contribution to philosophy (e.g. aesthetics), by major influences on the thinker concerned (e.g. Plato, Kant, Wittgenstein).

Peace, Toleration and Decay Martin Sutherland, 2007-01-01 Traditional approaches to early Nonconformity have divided its history at the Toleration Act of 1689. The intellectual history of the movement has largely focused on the ideas of Richard Baxter and

John Locke These conventions prevent a full understanding of the disunity and decline of the movement in the early eighteenth century Continuities across the period and the gradual emergence of themes which would feed into Evangelicalism have been obscured The rich theological dynamics of Dissent cannot be appreciated without detailed reference to the thought of other contemporary leaders Among the most important was John Howe 1630-1705 Howe's career stretched from Cromwell to Queen Anne His irenic ecclesiology shaped the response to toleration and influenced key leaders in the decades following his death Crucial shifts in Nonconformist thinking may be traced in his writings and those of his successors such as Calamy Watts and Doddridge As a result the significance of the division at Salters Hall in 1719 becomes clearer This study reexamines a neglected strand of Nonconformist thought and proposes a new understanding of later Stuart Dissent The distinct characteristics of the movement are freshly defined and Dissent is situated in historical continuity between Puritanism and early Evangelicalism The monograph thus provides a scholarly reinterpretation of an important group in a crucial period of English history The themes that emerge inform the wider study of English ecclesiology and political theory under the Tudors and Stuarts *Bulletin of Dr. Williams's Library* Dr. Williams's Library, 1989
