Religion in Cathedrals Simon Coleman, Marion Bowman, 2021-12-26 This book explores cathedrals past and present as spaces for religious but also wider cultural practices Contributors from history anthropology sociology and religious studies trace major continuities and shifts in the location of cathedrals within religious civic urban and economic landscapes of pre and post Reformation Christianity While much of the focus is on England other European and global contexts are referenced as authors explore ways in which cathedrals have been and remain distinctive spaces of adjacent ritual political and social activity capable of taking on lives of their own as sites of

worship pilgrimage and governance A major theme of the book is that of replication pointing to the ways in which cathedrals echo each other materially and ritually in processes of mutual borrowing and competition while a cathedral can also provide a reference point for smaller constituencies of religious practice such as a diocese or parish As this volume demonstrates the contemporary resurgence of interest in pilgrimage the impact of Caminoisation and the re presentation of cathedrals as cultural heritage further add to the attractions popularity and complexities of cathedrals in the 21st century The chapters in this book were originally published as a special issue of the journal Religion *Shop Window, Flagship, Common Ground* Judith A.
