become wider National income inequality has also been on the rise The prospect of a shift in designing and implementing development and welfare policies is strong in this new environment The neoliberal policies of the Washington Consensus are giving way to development models which look to a more active government role in both economic and social policies Meanwhile in the parallel universe of welfare policy a fundamental realignment is already taking place Faced with the current economic and social challenges policy communities have turned to a variety of instruments to ensure that growth and social inclusion go together This book offers a systematic analysis of the growing convergence on these matters in the development and welfare state literatures utilizing the experiences of a myriad of jurisdictions around the world Drawing upon the expertise of leading international policymakers practitioners and academics in the field this book critiques the theoretical underpinning of growth and development examine welfare state perspectives on inclusive growth and social economic development and presents lessons learned and best worst practices from the experiences of developing and developed nations

The Oxford Handbook of Transformations of the State Stephan Leibfried, Evelyne Huber, Matthew Lange, Jonah D. Levy, Frank Nullmeier, John D. Stephens, 2015 This Handbook offers a comprehensive treatment of transformations of the state from its origins in different parts of the world and different time periods to its transformations since World War II in the advanced industrial countries the post Communist world and the Global South Leading experts in their fields from Europe and North America discuss conceptualizations and theories of the state and the transformations of the state in its engagement with a changing international environment as well as with changing domestic economic social and political challenges The Handbook covers different types of states in the Global South from failed to predatory rentier and developmental in different kinds of advanced industrial political economies corporatist statist liberal import substitution industrialization and in various post Communist countries Russia China successor states to the USSR and Eastern Europe It also addresses crucial challenges in different areas of state intervention from security to financial regulation migration welfare states democratization and quality of democracy ethno nationalism and human development The

volume makes a compelling case that far from losing its relevance in the face of globalization the state remains a key actor in all areas of social and economic life changing its areas of intervention its modes of operation and its structures in adaption to new international and domestic challenges Health Insurance Reforms in Asia Sabrina Ching Yuen Luk,2014-03-26 This book empirically examines health care financing reforms and popular responses in three major cities in East Asia Shanghai Singapore and Hong Kong It adopts a new revised version of the theory of historical institutionalism to compare and explain the divergent reform paths in these three places over the past three decades It also examines forces that propel institutional change The book provides three detailed case studies on the development of health care financing reforms and the politics of implementing them It shows that health care systems in Shanghai Singapore and Hong Kong were the products of Western presence in the nineteenth century It illustrates how greater attention is paid to the roles played by ideas actors and environmental triggers without abandoning the core assumptions that political institutions and policy feedback remain central to impact health care financing reforms It shows that health care financing reform is shaped by a complex interplay of forces over time It also provides the most updated material about health care financing reforms in Shanghai Singapore and Hong Kong The central argument of this book is that health care financing reform is both an evolving process responding to changing circumstances and a political process revealing an intricate interplay of power relationships and diverse interests It shows that institutional changes in health care financing system can be incremental but transformative in nature It argues that social policies will continue to develop and welfare states will continue to adapt and evolve in order to cope with new risks and needs This book sheds new lights on understanding the politics of health care financing reform and sources and modes of institutional change *Religion in Secular Education* Cathy Byrne,2014-01-09 Cathy Byrne presents the secular principle as a guiding compass for religion in government schools in plural democracies Using in depth case studies historical and contextual research from Australia and comparisons with other developed nations Religion in Secular Education provides a comprehensive at times confronting analysis of the ideologies policies pedagogies and practices for state school religion In the context of rising demands for students to develop intercultural competence and interreligious literacy and alongside increasing Christian evangelism in the public arena this book highlights risks and implications as education develops religious identity in individual children and in nation states Byrne proposes a best practice framework for nations attempting to navigate towards socially inclusive outcomes and critical thinking in religions education policy

Lineages of Despotism and Development Matthew Lange,2009-08-01 Traditionally social scientists have assumed that past imperialism hinders the future development prospects of colonized nations Challenging this widespread belief Matthew Lange argues in Lineages of Despotism and Development that countries once under direct British imperial control have developed more successfully than those that were ruled indirectly Combining statistical analysis with in depth case studies of former British colonies this volume argues that direct rule promoted cogent and coherent states with high levels of

bureaucratization and inclusiveness which contributed to implementing development policy during late colonialism and independence On the other hand Lange finds that indirect British rule created patrimonial weak states that preyed on their own populations Firmly grounded in the tradition of comparative historical analysis while offering fresh insight into the colonial roots of uneven development *Lineages of Despotism and Development* will interest economists sociologists and political scientists alike *Sustainable Pathways* Nishi Malhotra,2024-07-24 Providing an in depth exploration of India s Indigenous tribes and their unique yet undervalued arts and crafts traditions this work illuminates the struggles of these communities that live on the outskirts of mainstream Indian society and examines their journey to financial empowerment

Talking Policy Judith Bessant,2020-08-04 When we catch a bus visit a doctor borrow a book from the library or enrol in a course we benefit from the social policies of government *Talking Policy* explains how the myriad programs and services we take for granted are developed and delivered and how this fits into the political process There is a human and political aspect to social policy making it s not all rational solutions to measurable problems The authors explain how issues come to be defined as social problems and offer an account of the historical development of social policy and the welfare state in Australia They also outline the competing political and philosophical ideas which influence the different ways in which governments respond to social inequality and needs in the community With detailed case studies from variety of areas of social policy making *Talking Policy* is a valuable introduction to this complex and important field *Talking Policy* is an informative insightful book that is also absorbing and challenging Lois Bryson Emeritus Professor University of Newcastle With a commitment to reinvigorate policy debate the authors make a convincing case that at its heart policy making is about competing ethical visions that ideas count and that words serve as tools in this political and contested activity Associate Professor Carol Bacchi University of Adelaide *Connecting South-South Communities* Muhammed Haron,2019-01-03 In addition to offering a comprehensive overview and fair insight over more than twenty five years into the relations between two South Middle Powers namely South Africa and Malaysia this book also discusses them within their respective regional structures and evaluates their respective diplomatic and commercial connections It also explores issues that have generally be neglected by International Relations specialists and in this regard it gives attention to cultural contacts that bring to the fore the critical role of non state actors in international affairs Since the ideas espoused by South Africa and Malaysia s political leaders are rooted in their specific national and broad regional philosophies the study also unpacks the notions of the African ways vis vis the Asian ways in maintaining and sustaining state to state relations within the two regions This book which uses Critical Theory as an appropriate framework that takes full cognisance of various developments in International Relations will be of interest to scholars and researchers in both the Social Sciences and the Humanities **Patrons of Women** Esther Hertzog,2011-05-01 Assuming that women s empowerment would accelerate the pace of social change in rural Nepal the World Bank urged the Nepali government to undertake a Gender Activities Project within an ongoing long

term water engineering scheme The author an anthropologist specializing in bureaucratic organizations and gender studies was hired to monitor the project Analyzing her own experience as a practicing development expert she demonstrates that the professed goal of women s empowerment is a pretext for promoting economic organizational goals and the interests of local elites She shows how a project intended to benefit women through teaching them literary and agricultural skills fails to provide them with any of the promised resources Going beyond the conventional analysis that positions aid givers vis vis powerless victimized recipients she draws attention to the complexity of the process and the active role played by the Nepalese rural women who pursue their own interests and aspirations within this unequal world The book makes an important contribution to the growing critique of development projects and of women s development projects in particular

A History of Modern Singapore, 1819-2005 C.M. Turnbull,2009-01-01 When C M Turnbull s A History of Singapore 1819 1975 appeared in 1977 it quickly achieved recognition as the definitive history of Singapore A second edition published in 1989 brought the story up to the elections held in 1988 In this fully revised edition rewritten to take into account recent scholarship on Singapore the author has added a chapter on Goh Chok Tong s premiership 1990 2004 and the transition to a government headed by Lee Hsien Loong The book now ends in 2005 when the Republic of Singapore celebrated its 40th anniversary as an independent nation Major changes occurred in the 1990s as the generation of leaders that oversaw the transition from a colony to independence stepped aside in favour of a younger generation of leaders Their task was to shape a course that sustained the economic growth and social stability achieved by their predecessors and they would be tested towards the end of the decade when Southeast Asia experienced a severe financial crisis Many modern studies on Singapore focus on current affairs or very recent events and pay a great deal of attention to Singapore s successful transition from the developing to the developed world However younger historians are increasingly interested in other aspects of the country s past particularly social and cultural issues A History of Modern Singapore 1819 2005 provides a solid foundation and an overarching framework for this research surveying Singapore s trajectory from a small British port to a major trading and financial hub within the British Empire and finally to the modern city state that Singapore became after gaining independence in 1965

Historical Imagination and Cultural Responses to Colonialism and Nationalism Azhar Ibrahim,2022-12-06 The basis of our historical imagination is the intellectual s or historian s critical thinking and their solidarity with the people with their destiny and predicament with the consistent aim of emancipating and liberating the subjugated the oppressed and the marginalised History conditions the way that society discusses its problems Treating history as a form of imagination Azhar Ibrahim invites readers to probe the colonialist and nationalist tampering suppression and distortion of narratives on the Malays In this thought provoking book the author encourages contemporary historians to move beyond the practice of Orientalist scholars collecting data and describing facts Instead he promotes an alternative reading of history one that departs from mainstream versions Reflecting a strong understanding of classical Malay texts the

author also touches on broad themes such as psychological feudalism orientalism and the contestation of nationalist and colonialist perspectives on the community Azhar s book is a welcomed contribution and a must read for those interested in alternative discourses in Malay Studies **Educations in Ethnic Violence** Matthew Lange,2011-12-12 In Educations in Ethnic Violence Matthew Lange explores the effects education has on ethnic violence Lange contradicts the widely held belief that education promotes peace and tolerance Rather Lange finds that education commonly contributes to aggression especially in environments with ethnic divisions limited resources and ineffective political institutions He describes four ways in which organized learning spurs ethnic conflicts Socialization in school shapes students identities and the norms governing intercommunal relations Education can also increase students frustration and aggression when their expectations are not met Sometimes the competitive atmosphere gives students an incentive to participate in violence Finally education provides students with superior abilities to mobilize violent ethnic movements Lange employs a cross national statistical analysis with case studies of Sri Lanka Cyprus the Palestinian territories India sub Saharan Africa Canada and Germany
