Rogers,1997-09-15 Combining practical student centered activities with an annotated bibliography of more than 160 children's books this guide models ways for classroom teachers to teach geography through children's literature Chapters based on the five themes of the Geographic Standards present a variety of activities that teach students important geographic concepts The extensive bibliography provides summaries of books suggested teaching activities and cross references to other books a list of teacher resources is also included Attractive line drawings accompany the conversational text Anyone looking for an effective way to teach geography at the elementary level will want this book and middle and high school educators will find useful extensions for older students The work offers a great way to integrate geography into the curriculum Children's Mobilities Lesley Murray,Susana Cortés-Morales,2019-05-04 This book offers a critical and comprehensive analysis of children's mobilities by focusing on its interdependent imagined and relational aspects In doing so it challenges existing literature which in mobilities studies tends to overlook the mobilities of marginalised social groups in social science more generally tends to immobilize children's studies and in children's mobility studies has mainly focused on the independent and corporeal travel of children The book situates children's mobilities in wider contexts offering

an interdisciplinary and critical perspective throughout and drawing on scholarship at the confluence of childhood and mobilities and a range of research to offer new insights that inform the field of mobilities and studies of childhood In this way the book aims at widening the perspective on children s mobility towards the inclusion of diverse age groups and of the manifold forms of mobilities that are part of children s lives from an interdependent and relational point of view
