

SOCIAL THEORY IN THE **TWENTIETH CENTURY** **AND BEYOND**

2nd edition

Patrick Baert & Filipe Carreira da Silva

The background of the cover features a dense, overlapping collection of stylized human figures made of paper. The figures are in various shades of white, light grey, and beige. They are arranged in a way that suggests a crowd or a social gathering, with some figures in the foreground being more prominent than others. The overall effect is a textured, layered representation of human presence.

Social Theory Jeffrey C. Alexander, 1995 In four closely interwoven studies Jeffrey Alexander identifies the central dilemma that provokes contemporary social theory and proposes a new way to resolve it The dream of reason that marked the previous fin de siècle foundered in the face of the cataclysms of the twentieth century when war revolution and totalitarianism came to be seen as themselves products of reason In response there emerged the profound skepticism about rationality that has so starkly defined the present fin de siècle From Wittgenstein through Rorty and postmodernism relativism rejects the very possibility of universal standards while for both positivism and neo Marxists like Bourdieu reductionism claims that ideas simply reflect their social base In a readable and spirited argument Alexander develops the alternative of a neo modernist position that defends reason from within a culturally centered perspective while remaining committed to the goal of explaining not merely interpreting contemporary social life On the basis of a sweeping reinterpretation of postwar society and its intellectuals he suggests that both antimodernist radicalism and postmodernist resignation are now in decline a more democratic less ethnocentric and more historically contingent universalizing social theory may thus emerge Developing in his first two studies a historical approach to the problem of absent reason Alexander moves via a critique of Richard Rorty to construct his case for present reason Finally focusing on the work of Pierre Bourdieu he provokes the most sustained critical reflection yet on this influential thinker *Fin de Siècle Social Theory* is a tonic intervention in contemporary debates showing how social and cultural theory can properly take the measure of the extraordinary times in which we live

Sunderlin, 2003 Does human population growth threaten the environment or does it guarantee we will safeguard it Is economic growth the key ecological problem or is it in fact the solution What will be the leading force to save the planet civil

society government or private enterprise This book shows that these polemical debates are governed not so much by access to facts as they are by the political ideology of the expert advancing a particular argument Moreover the thoughts of these experts tend to be based largely in just one of three competing streams of political thought the left the center or the right Drawing on social theory the author explains the philosophical origins of this tendency to rely on just one of three traditions and why this poses a serious obstacle to conceptualizing the cause nature and resolution of environmental problems Sunderlin argues that laying the foundation for a livable world involves giving conscious and dedicated attention to the core tenets of all three political traditions action against class inequality and advocacy of social justice within and among countries reformation of laws and policies emanating from the halls of power and technological innovation in centers of research and wholesale cultural change and promotion of individual initiative responsibility and creativity
