Social Horizon Of Knowledge:

Worldviews, Science And Us: Redemarcating Knowledge And Its Social And Ethical Implications Diederik Aerts, Nicole Note, Bart D'hooghe, 2005-07-18 This publication features an interdisciplinary group of contributors which questions aspects of today's worldviews and science that are often taken for granted and tacitly determine the boundaries of what is generally conceived of as the world and science. Some authors stress that existing demarcations are obsolete and often prevent new insights. Others show how they influence the way people perceive themselves and believe the world ontologically to be determining people's actions and the social fabric. There are yet others who point out how a redemarcation may stimulate the development of knowledge acquisition and social well-being. Examples of how bridging knowledge between different fields leads to new crucial insights while identifying the pattern of too strict a demarcation preventing such insights are also analyzed in this volume.

Applied Social Science Research in a Regional Knowledge System Hans Christian Garmann Johnsen, Elisabet S. Hauge, May-Linda Magnussen, Richard Ennals, 2016-10-04 This book illustrates how applied social scientists and their research are integrated with stakeholders and practitioners in a local regional setting and how knowledge development is a mutual concern made in and dependent on ongoing dialogue. Focusing on the Agder region, the southernmost region in Norway, researchers and contributors question what impact the changing economic environment will have on applied researchers around the world. Applied research is seen as a vital part of the infrastructure for economic and social development in the Agder region and beyond. The chapters are divided into four parts: the spatial dimension of knowledge development, understanding regional practice, explaining regional practice, and influencing regional social practice. A useful resource for both policy makers and researchers, the book helps readers reflect on the type of mutual competence building that applied social science research implies and depends on in a regional knowledge development process. It represents a voice on how to understand the development of the knowledge society at regional and global levels.

Knowledge Horizons Charles Despres, Daniele Chauvel, 2012-05-23 Knowledge Horizons charts the feasible future for knowledge management. This practical and provocative resource presents the work of many of the leading voices in knowledge management and related disciplines who explore the current trends and offer pragmatic and authoritative thinking on applied knowledge management from a variety of positions. Knowledge management is the new frontier for businesses, organizations, and institutions of all kinds. For those that hope to conquer this new territory, establishing a better understanding of current and future knowledge management trends and adoption of the most effective practices is imperative. There are numerous options for executives: intranets, extranets, groupware, and core competencies are continually being refined. New entities and rules in terms of intellectual capital and the Chief Knowledge Officer are emerging. Knowledge Horizons addresses these issues by exploring current and future knowledge management trends, gauging the future value of knowledge management investments, and how they will drive new business initiatives and integrate the experience and

The Global and the Local Arndt Sorge, 2005-03-17 there is no lack of ambition in this book And yet unlike much of what today comes as sociology it is fun to read written in a way that combines the very abstract and the very concrete the principles of general theories and the anecdotes of specific histories in ways that are enlightening and entertaining at the same time Those who take the book to heart will find themselves in possession of a language that can speak about globalization in a non sensationalist manner without however in any way detracting from its significance in fact quite to the contrary They will much better and more systematically understand the lasting significance of

the local in a world whose horizons of action are expanding From the Foreword by Wolfgang Streeck Max Planck Institute for the Study of Societies Cologne The rhetoric of internationalization and globalization often suggests an inexorable move away from domestic cultural and institutional differences Yet the development of internationalization within individual nations has been shaped by those very domestic institutions and cultures as best practice or other kinds of international learning have been translated into established practice and knowledge In this important study Arndt Sorge presents a sociological theory of the development of human societies to explain how business systems evolve and change and how internationalization works to specify and change societal identities within nations Examining changes in work organization corporate governance and human resources Sorge shows how this interaction is a pattern that has been followed over centuries Indeed amongst the cases Sorge presents he concentrates on the example of Germany a supposedly highly homogeneous and closed society as evidence for the universality of shifting borders expanding horizons local adoption and adaptation of global practices and the hybridization of systems and standards as the normal course of social evolution Arndt Sorge s analysis of globalization combines rigorous theoretical reasoning with empirically grounded analysis and deliberately adopts a general social science approach drawing on research from Business and Management Studies Sociology Political Science and History
