forms of social protest and internet technologies Drawing on anthropological and ethnographic research amongst three very different political groups in the UK Italy and Spain the book argues that activists everyday internet uses are largely defined by processes of negotiation with digital capitalism These processes of negotiation are giving rise to a series of collective experiences which are defined by the tension between activists democratic needs on one side and the cultural processes reinforced by digital capitalism on the other In looking at the encounter between activist cultures and digital capitalism the book focuses in particular on the tension created by self centered communication processes and networked individualism by corporate surveillance and data mining and by fast capitalism and the temporality of immediacy Activism on the Web suggests that if we want to understand how new technologies are affecting political participation and democratic processes we should not focus on disruption and novelty but we should instead explore the complex dialectics between digital discourses and digital practices between the technical and the social between the political economy of the web and its lived critique

Routledge Handbook of Food and Cultural Heritage Michael A. Di Giovine, Raúl Matta, 2025-09-24 The Routledge Handbook of Food and Cultural Heritage explores the many varied intersections of food and cultural heritage from a robust transdisciplinary perspective Innovative in its approach this cutting edge Handbook thinks beyond traditional boundaries to present unique perspectives on the myriad ways in which food and cultural heritage are entangled in theory and practice Both are growing industries both are deeply rooted in families cultures and societies both generate controversy and are deployed for political and economic activism They also both have intellectual lives of their own and are centers of interdisciplinary fields themselves yet they also intersect in interesting and until this book under theorized ways After a comprehensive introduction that presents and challenges the state of the art in the

disciplines of critical food and critical heritage studies the Handbook's chapters are divided into six themes common to both fields: Ontologies and epistemologies of food and cultural heritage; material culture; identity; placemaking and belonging; politics and regulation; tourism development and heritage management; and contemporary issues and emerging approaches. To give representation of voices not usually heard in the scholarly tradition, special interviews with food and heritage practitioners complement the comprehensive chapters, adding further depth to the volume through their own lived experiences. With contributions from nearly 50 internationally recognized scholars, social scientists, dietitians, practitioners, and activists, this book is essential reading to scholars, students, researchers, industry professionals, and practitioners looking to understand the complex and compelling ways in which food, foodways, and cultural heritage overlap and impact each other, providing venues for collaborations.

Screening Social Justice Sherry B. Ortner, 2023-02-20 In *Screening Social Justice*, award-winning anthropologist Sherry B. Ortner presents an ethnographic study of Brave New Films, a nonprofit film production company that makes documentaries intended to mobilize progressive grassroots activism. Ortner positions the work of the company within a tradition of activist documentary filmmaking and within the larger field of alternative media that is committed to challenging the mainstream media and telling the truth about the world today. The company's films cover a range of social justice issues with particular focus on the hidden workings of capitalism, racism, and right-wing extremism. Beyond the films themselves, Brave New Films is also famous for its creative distribution strategies. All of the films are available for free on YouTube. Central to the intention of promoting political activism, the films circulate through networks of other activist and social justice organizations and are shown almost entirely in live screenings in which the power of the film is amplified. Ortner takes the reader inside both the production process and the screenings to show how a film can be made and used to mobilize action for a better world.

Struggles for an Alternative Globalization Gwyn Williams, 2017-11-28 Through an anthropological study of a highly influential movement of French alterglobalization activists, this book offers an ethnographic window onto the global movement against corporate capitalism and the neoliberal policies of the WTO. Based on extensive fieldwork on the Larzac plateau in rural southern France, it explores the politics of protest in which activists engage. It examines their resistance to various forms of power, their organization of struggle, their attempts to live out their ideals in daily life, and their challenges to conventional understandings of politics, democracy, economics, morality, and globalization. By subjecting power and resistance to ethnographic study rather than adopting them as abstract categories of analysis, this volume makes an important contribution to theoretical debates on globalization, domination, and resistance. It will be of interest not only to anthropologists and scholars of social movements but also to sociologists and political scientists as well as to activists themselves.

Policy Worlds Cris Shore, Susan Wright, Davide Però, 2011-04-01 There are few areas of society today that remain outside the ambit of policy processes, and likewise, policy making has progressively reached into the structure and fabric of everyday life. An instrument of modern government, policy and its processes provide an analytical

window into systems of governance themselves opening up ways to study power and the construction of regimes of truth This volume argues that policies are not simply coercive constraining or confined to static texts rather they are productive continually contested and able to create new social and semantic spaces and new sets of relations Anthropologists do not stand outside or above systems of governance but are themselves subject to the rhetoric and rationalities of policy The analyses of policy worlds presented by the contributors to this volume open up new possibilities for understanding systems of knowledge and power and the positioning of academics within them

Neoliberalism, Social Exclusion, and Social Movements , Donna L. Cholleff, 2013-10-10 Neoliberalism Social Exclusion and Social Movements critically examines struggles for social justice in an era of neoliberal globalization Cholleff perceptively elucidates the intertwining of debt restructuring the debacle of privatization NAFTA generated distortions in the sugar market and social and economic exclusion of Mexican sugarcane growers and mill workers The enclosure of community commons is but one of the devastating impacts of neoliberal policies that generated social movements across Latin America and beyond Closure of one of Michoacán Mexico's five sugar mills following privatization brought unemployment and economic havoc to the region This region is unique in that it is the only locality where a social movement repossessed the closed sugar refinery and created a cooperative worker run workplace The book offers a historically contextualized globally situated and ethnographically grounded analysis of the social movement as sugarcane growers and mill workers challenged the end to their way of life as they knew it It takes the reader into the very real lives of movement participants their aspirations struggles and accommodations Cholleff skillfully peels back the layers of this social movement as activists sought to remake their own history but under circumstances that did not in the end ensure social justice The author demonstrates empathy for collective struggles confronting the ravages of neoliberal globalization yet explodes the myth that intuitively exalts social movements as morally noble forces for democratization and solidarity She offers a critical perspective on the internal factions and lack of democratization of a social movement gone awry and presents a sorely needed critique of social movement theory While focusing on a particular social movement this book carries wide applicability for all social movements concerned with social justice in an era of enduring neoliberalism It is essential reading for students academics activists and policy makers concerned with global inequalities

Race Rights Reparations Fernne Brennan, 2017-07-14 This book considers institutional racism as a problem that exists within modern societies Its roots lie with the transatlantic slave trade and slavery and the solution involves ridding society of the problem It is argued here that first there needs to be an acceptance of its existence then developing the tools needed to deal with it and finally to implement those tools so that institutional racism can be permanently removed from society The book has four themes the first considers the nature of institutional racism the second theme looks at instances of institutional racism through matters such as deaths in custody and skin lightening the third considers the concept of reparations and the final area looks at the development of social movements as a way of pushing

institutional racism up the political agenda The development of a social movement is part of a social discourse which would for example push mentoring as a form of reparations There is a need for more research on the manifestations of institutional racism and this book is part of that discourse It is argued that the legacy of the slave trade and slavery is continuing and contemporary through the presence of institutional racism in society This problem has not been addressed through legislation and policies devised to combat racial discrimination Institutional racism needs to be understood as being located in the processes and procedures of societal institutions

Religiosity on University Campuses in Africa Abdoulaye Sounaye,Frédéric Madore,2023-08-29 This volume examines religiosity on university campuses in Sub Saharan Africa Focusing on both individuals and organized groups the contributions open a window onto how religion becomes a factor affects social interactions is experienced and mobilized by various actors It brings together case studies from various disciplinary backgrounds anthropology sociology history religious studies literature and theoretical orientations to illustrate the significance of religiosity in recent developments on university campuses It pays a particular attention to religion informed activism and contributes a fresh analysis of processes that are shaping both the experience of being student and the university campus as a moral space Last but not least it sheds light onto the ways in which the campus becomes a site of a reformulation of both religiosity and sociality

Applying Anthropology in the Global Village Christina Wasson,Mary Odell Butler,Jacqueline Copeland-Carson,2016-06-16 The realities of the globalized world have revolutionized traditional concepts of culture community and identity so how do applied social scientists use complicated fluid new ideas such as translocality and ethnoscape to solve pressing human problems In this book leading scholar practitioners survey the development of different subfields over at least two decades then offer concrete case studies to show how they have incorporated and refined new concepts and methods After an introduction synthesizing anthropological practice key theoretical concepts and ethnographic methods chapters examine the arenas of public health community development finance technology transportation gender environment immigration aging and child welfare An innovative guide to joining dynamic theoretical concepts with on the ground problem solving this book will be of interest to practitioners from a wide range of disciplines who work on social change as well as an excellent addition to graduate and undergraduate courses
