New Life Courses, Social Risks and Social Policy in East Asia Raymond K. H. Chan,Jens Zinn,Lih-Rong Wang,2015-10-30 Social policy in modern industrialised societies is increasingly challenged by new social risks These include insecure employment resulting from ever more volatile labour markets new family and gender relationships resulting from the growing participation of women in the labour market and the many problems resulting from very much longer human life expectancy Whereas once social policy had to be in step with a standardised relatively stable and predictable life course it now has to cope with non standardised individual preferences life courses and families and the consequent increased risks and uncertainties This book examines these new life courses and their impact on social policy across a range of East Asian societies It shows how governments and social welfare institutions have been slow to respond to the new challenges In response we propose a life course sensitised policy as an approach to manage these risks Overall the book provides many new insights which will assist advance social policy in East Asia *Public Health Policies and Social Inequality* C. Andrain,1998-06-10 This book explores the interaction between public health policies and social inequality It probes three issues What groups wield the greatest influence over the policy process Who gains the most benefits from health policies How can we best understand the policy link between health and social inequalities A theory of social opportunities clarifies the reasons for policy effectiveness particularly the impact of public programmes on the environmental and personal conditions that improve people s health *International Encyclopedia of Social Policy* Tony Fitzpatrick,Huck-ju Kwon,Nick Manning,James Midgley,Gillian Pascall,2013-07-04 Available in paperback for the first time this milestone work offers an in depth treatment of all aspects of the discipline and practice of social policy globally Supported by a distinguished international advisory board the editors have compiled almost 900 000 words across 734 entries written by 284 leading specialists to provide authoritative coverage of concepts policy actors welfare institutions and services along a series of national regional and transnational dimensions Also included are biographical entries on major policy makers and shapers The editors have particularly striven to provide strong coverage of differing geographical and cultural traditions so that the variety of social policy as both an academic discipline and a domain of governance is reflected Contributors draw in and make the necessary connections with social policy s associated disciplines to provide a rich picture of this vast and highly diverse field Comprehensive and authoritative the Encyclopedia has sought to open up rather than to foreclose the numerous areas in which there is on going research debate and sometimes serious disagreement and divergence in theory and practice To this end entries attempt to introduce a core or common ground of understanding before moving on to a wider discussion of debates regarding different conceptual and geographical approaches The whole is integrated by cross referencing and
