Raven, 1979-01-01 Social Research in the Judicial Process Wallace D. Loh, 1984-09-17 How to inform the judicial mind Justice Frankfurter remarked during the school desegregation cases is one of the most complicated problems Social research is a potential source of such information Indeed in the 1960s and 1970s with activist courts at the forefront of social reform the field of law and social science came of age But for all the recent activity and scholarship in this area few books have attempted to create an intellectual framework a systematic introduction to applied social legal research Social Research in the Judicial Process addresses this need for a broader picture Designed for use by both law students and social science students it constructs a conceptual bridge between social research the realm of social facts and judicial decision making the realm of social values Its unique casebook format weaves together judicial opinions empirical studies and original text It is a process oriented book that teaches skills and perspectives cultivating an informed sensitivity to the use and misuse of

psychology social psychology and sociology in appellate and trial adjudication Among the social legal topics explored are school desegregation capital punishment jury impartiality and eyewitness identification This casebook is remarkable for its scope its accessibility and the intelligence of its conceptual integration It provides the kind of interdisciplinary teaching framework that should eventually help lawyers to make knowledgeable use of social research and social scientists to conduct useful research within a legally sophisticated context

The Psychology and Law of Criminal Justice Processes Roger J. R. Levesque, 2006 Psychological science now reveals much about the law's response to crime This is the first text to bridge both fields as it presents psychological research and theory relevant to each phase of criminal justice processes The materials are divided into three parts that follow a comprehensive introduction The introduction analyses the major legal themes and values that guide criminal justice processes and points to the many psychological issues they raise Part I examines how the legal system investigates and apprehends criminal suspects Topics range from the identification searching and seizing to the questioning of suspects Part II focuses on how the legal system establishes guilt To do so it centres on the process of bargaining and pleading cases assembling juries providing expert witnesses and considering defendants mental states Part III focuses on the disposition of cases Namely that part highlights the process of sentencing defendants predicting criminal tendencies treating and controlling offenders and determining eligibility for such extreme punishments as the death penalty The format seeks to give readers a feeling for the entire criminal justice process and for the role psychological science has and can play in it

The Trial Process Bruce Dennis Sales, 2013-11-11 As noted in the Preface to Volume 1 in this series the goal of *Perspectives in Law and Psychology* is to provide a forum for books aimed at systematically interfacing the two disciplines Toward this end Volume 1 presented a collection of original writings focused on the criminal justice system that grew out of a conference held at the University of Nebraska at Lincoln Because that volume was based on conference proceedings however an attempt was not made to provide thorough coverage of all law psychology issues in the criminal justice system rather it highlighted a select few issues that were currently being investigated by some of the outstanding people in the field This volume differs substantially from the first in that it attempts to bring together those psycholegal scholars who are doing the major research on the trial process today and provides broad coverage of critical research on the trial Thus the chapters not only provide an extensive review of existing literature in this field but also present new contributions by these scholars

Applied Social Psychology Annual Leonard Bickman, 1981-06-01 Volume 2 of the *Annuals* presents more important general issues in applying social psychology thereby providing a broader context within which to view specific applications It also considers applications to law and criminal justice Law and criminal justice have especially

interested social psychologists since crime has been seen as one of the most significant contemporary social issues The Blackwell Companion to Law and Society Austin Sarat, 2008-04-15 The Blackwell Companion to Law and Society is an authoritative study of the relationship between law and social interaction Thirty two original essays by an international group of expert scholars examine a wide range of critical questions Authors represent various theoretical methodological and political commitments creating the first truly global overview of the field Examines the relationship between law and social interactions in thirty three original essay by international experts in the field Reflects the world wide significance of North American law and society scholarship Addresses classical areas and new themes in law and society research including the gap between law on the books and law in action the complexity of institutional processes the significance of new media and the intersections of law and identity Engages the exciting work now being done in England Europe Australia and New Zealand South Africa Israel as well as Third World scholarship Handbook of Justice Research in Law Joseph Sanders, V. Lee Hamilton, 2007-05-08 Justice a word of great simplicity and almost frightening scope When we were invited to edit a volume on justice in law we joked about the small topic we had been assigned Often humor masks fear and this was certainly one of those times Throughout the project we found daunting the task of covering even a fraction of the topics that usually fall under the umbrella of justice research in law Ultimately the organization of the book emerged from the writing of it Our introductory chapter provides a road map to how the topics weave together but as is so often the case it was written last not first It was only when we had chapters in hand that we began to see how the many strands of justice research might be woven together Chapters 2 4 on the basic forms of justice procedural retributive and distributive are the lynchpin of the volume they provide the building blocks that permit us to think and write about each of the other substantive and applied chapters in terms of how they relate to the fundamental forms of justice In the large central section of the volume Chapters 5 9 the contributors address many ways in which the justice dimensions relate to one another Most important for law is the relationship of perceptions of procedural justice and the two types of substantive justice retributive and distributive *The Federal Sentencing Guidelines* United States Sentencing Commission, 1991 **Trust in the Law** Tom R. Tyler, Yuen J. Huo, 2002-10-10 Public opinion polls suggest that American s trust in the police and courts is declining The same polls also reveal a disturbing racial divide with minorities expressing greater levels of distrust than whites Practices such as racial profiling zero tolerance and three strikes laws the use of excessive force and harsh punishments for minor drug crimes all contribute to perceptions of injustice In *Trust in the Law* psychologists Tom R Tyler and Yuen J Huo present a compelling argument that effective law enforcement requires the active engagement and participation of the communities it serves and argue for a cooperative approach to law enforcement that appeals to people s sense of fair play even if the outcomes are not always those with which they agree Based on a wide ranging survey of citizens who had recent contact with the police or courts in Oakland and Los Angeles *Trust in the Law* examines the sources of people s favorable and unfavorable reactions to

their encounters with legal authorities Tyler and Huo address the issue from a variety of angles the psychology of decision acceptance the importance of individual personal experiences and the role of ethnic group identification They find that people react primarily to whether or not they are treated with dignity and respect and the degree to which they feel they have been treated fairly helps to shape their acceptance of the legal process Their findings show significantly less willingness on the part of minority group members who feel they have been treated unfairly to trust the motives to subsequent legal decisions of law enforcement authorities Since most people in the study generalize from their personal experiences with individual police officers and judges Tyler and Huo suggest that gaining maximum cooperation and consent of the public depends upon fair and transparent decision making and treatment on the part of law enforcement officers Tyler and Huo conclude that the best way to encourage compliance with the law is for legal authorities to implement programs that foster a sense of personal involvement and responsibility For example community policing programs in which the local population is actively engaged in monitoring its own neighborhood have been shown to be an effective tool in improving police community relationships Cooperation between legal authorities and community members is a much discussed but often elusive goal Trust in the Law shows that legal authorities can behave in ways that encourage the voluntary acceptance of their directives while also building trust and confidence in the overall legitimacy of the police and courts A Volume in the Russell Sage Foundation Series on Trust
