Social Skills Basis Of Psychopathology:

The Social Skills Basis of Psychopathology Ewing Lakin Phillips, 1978 Social Skills and Health (Psychology Revivals) Michael Argyle, 2013-11-26 The efficiency of an organization and the well being of those working within it are often dependent to a large extent on the social skills deployed by certain key personnel The analysis of these skills and the training of people in their use had reached a stage of considerable sophistication Originally published in 1981 this volume edited by the foremost authority in the field presents a wealth of ideas and information on how best to employ social skills training in health and welfare agencies that are still relevant today The introduction describes the processes of social interaction in which social skills consist introduces the social skill model and shows how social competence is assessed and how the most effective social skills are discovered Subsequent chapters deal with the social skills required of nurses doctors psychotherapists social workers and those charged with child rearing There is a chapter which gives an account of the social skill problems of mental patients and the extent to which social inadequacy is responsible for their other problems The final chapter discusses the main techniques of social skills training and reviews their success in the light of follow up studies The book will be of historical value to all those concerned with the training and performance of personnel within the health related professions and to those with an academic interest in the psychology of human relations **Radical Approaches to Social Skills Training** Peter Trower, 2013-12-16 Originally published in 1984 one of the few facts that emerged clearly in the beleaguered field of psychology and mental health at the time was the extent of poor social skills in psychiatric patients the mentally handicapped and problem adolescents As a result during the 1970s social skills training espoused as a form of behaviour therapy seemed to offer great promise based on the notion that social skills like any other skills are learnt and can be taught if lacking However in evaluating social skills training many investigators found that skills did not endure and generalise This book attempts a major re assessment of social skills training It examines the underlying paradigms which are shown to be fundamentally behaviourist Such paradigms it is argued severely constrain the aims and method of current types of training Thus the book develops what is termed an agency approach based on man as a social agent who actively constructs his own experiences and generates his own goal directed behaviour on the basis of those constructs This new model is developed in both theoretical and practical ways in the main body of the book and should even today be of great interest to all those involved with social skills training *Handbook of Behavioral Group Therapy* Dennis Upper, Steven M. Ross, 2013-11-11 In 1977 the current editors contributed a review article on behavioral group therapy to a volume of Hersen Miller and Eisler's Progress in Behavior Modification series 1977 At that time we noted that despite the advantages to both clinicians and clients of conducting behavioral treatments in groups clinical developments and research in this area were still at a relatively rudimentary level The majority of studies in the behavioral group therapy literature we reviewed reported the direct transfer of an individual behavior therapy procedure such as systematic desensitization to a group of clients with

homogeneous problems such as snake phobia or test anxiety Groups were used in many studies merely to generate sufficient numbers of subjects to allow various types of interventions to be compared rather than to examine group process variables per se Only a limited amount of attention had been given to whether these group interaction variables such as group discussion sharing ideas and feelings and mutual feedback and reinforcement might enhance individually oriented procedures applied in a group The 8 years since this original chapter was written have seen a significant growth in both the breadth and depth of clinical research and work in the behavioral group therapy field This growth was documented in part in a three volume series on behavioral group therapy by the current editors Upper Ross 1979 1980 1981 **Social Skills**

Across the Life Span Douglas W. Nangle, Cynthia A. Erdley, Rebecca Schwartz-Mette, 2020-05-21 Social skills are critical to psychological adjustment across the lifespan These skills are necessary for attaining a variety of important social emotional and interpersonal goals Social skill deficits and resulting negative social interactions are associated with a wide variety of adjustment problems and psychological disorders Social Skills across the Life Span Theory is a comprehensive social skills volume providing in depth coverage of theory assessment and intervention Divided into three major sections the volume begins with the definition of social competence developmental factors and relations to adjustment This is followed by coverage of general assessment and intervention issues across the lifespan In the third section program developers describe specific evidence based interventions Identifies how social skills influence social competence and well being Addresses the full lifespan Reviews methods to assess and intervene with children and adults Details evidence based interventions for children and adults *The Handbook of Communication Skills* Owen Hargie, 2006-10-16 The Handbook of Communication Skills is recognised as one of the core texts in the field of communication This thoroughly revised and updated third edition arrives at a time of considerable growing interest in this area with recent research showing the importance of communication skills for success in many walks of life The book's core principle that interpersonal communication can be conceptualized as a form of skilled activity is examined in detail and a comprehensive transactional model of skilled communication is presented which takes into account current conceptual and research perspectives This book provides a comprehensive analysis of research theory and practice in the key skill areas of communication such as non verbal communication persuasion leadership assertiveness self disclosure listening and negotiation Each chapter is written by a recognised authority in that particular specialism among them world leaders in their particular fields In the ten years since the last edition a large volume of research has been published and the text has been comprehensively updated by reviewing this wealth of data In addition a new chapter on persuasion has been added one of the areas of most rapid growth in social psychology and communication The Handbook of Communication Skills represents the most significant single contribution to the literature in this domain It will be of continued interest to researchers and students in psychology and communication as well as in a variety of other contexts from vocational courses in health business and education to many others such as nursing and social work whose day

to day work is dependent on effective interpersonal skills *Social Competence in Developmental Perspective* Barry Schneider, Grazia Attili, Jacqueline Nadel, Roger Weissberg, 1989-08-31 What determines the focus of a researcher's interest the sources of inspiration for a study or the variables scrutinized If we were to examine the antecedents of these decisions they would surely emerge as accidents of circumstance the personal experiences of the researcher the inspiration of early mentors the influence of contemporary colleagues all tempered by the intellectual currents that nurture the researcher's hypotheses Among the accidents that mold the careers of researchers is geographic location The culture in which a research program emerges helps determine both its very subject and its method The primary purpose of this book is to assist those interested in the scientific study of children's social competence in transcending the boundaries imposed both by geography and by selective exposure to the highly diverse schools of thought that have led to interest in this field Most of these ideas were presented and exchanged at an Advanced Study Institute entitled *Social Competence in Developmental Perspective* held in Savoie France in July 1988 This Institute was attended by scholars from France England Northern Ireland Germany Italy Norway Spain Portugal Netherlands Canada the United States and Brazil Those who participated will recognize that the metamorphosis from lecture to chapter has necessitated many changes In order to accommodate the reader who may be unfamiliar with the field more attention has been paid here to identifying the theoretical contexts of the research described

Applications of Nonverbal Behavioral Theories and Research Robert S. Feldman, 2014-02-25 This book is intended to accomplish several goals First it is designed to provide a broad overview of the major areas of application of theory and research relating to nonverbal behavior Second individual chapters emphasize how the applications have been drawn from underlying theories and empirical bases thereby making the link between theory research and applications apparent Finally the volume links individual chapter contributions demonstrating how theoretical progress over the last few decades has led to important applied advances The contributors to this book consider a wide variety of settings and topics Their common thread however is a shared conviction that an understanding of nonverbal behavior can bring about an improvement in the human condition Each of the authors has made suggestions regarding future directions for both research and practice and their ideas offer real promise **The Analysis of Social Skill** W. T. Singleton, Peter Spurgeon, Robert Stammers, 1980-02

This is the book of a conference held at Leuven Belgium from June 5-9 1979 under the same title The conference was sponsored by the Scientific Affairs Division of the North Atlantic Treaty Organisation Brussels We would like to thank Dr Bayraktar of NATO for his part in facilitating the organisation and support of the conference We are also indebted to the authorities of the University of Leuven who provided excellent facilities and particularly to Professor Verhaegen of the Department of Psychology who acted as academic host to our conference The aim of the conference was to bring together two groups of psychologists who have been developing in parallel their particular methods of studying and describing human behaviour The skill psychologists began with the study of motor skills which are relatively easily observable in real jobs and

recordable in the laboratory More recently interests have shifted from motor skills through perceptual skills to the process skills where the operator is attending to many sources of information in the form of dials charts and computer outputs and adjusting some process to maintain its stability and maximise the yield Currently problems are arising of how to analyse situations in which several skilled individuals work closely together in small team performance The social psychologists have followed an analogous but different path of progress

Luciano L'Abate, 2007-06-06 Most physical and mental health professionals will agree that their time space and funds are generally in short supply even under optimal conditions Their participants clients or patients too will admit to similar deficits of time and patience even with optimal motivation Overburdened mental health facilities are trying to cope with limited budgets and overworked and underpaid personnel Low Cost Approaches to Promote Physical and Mental Health addresses both sides of this shortfall by offering either self administered or easily administered verbal and non verbal interventions designed to promote positive health behaviors while requiring little or no outside funding Editor Luciano L Abate continues his long tradition of prolific innovations by identifying major changes in today s health care systems and explaining how targeted prescriptive promotion prevention strategies can enhance traditional primary secondary and tertiary interventions in key behavioral and relational areas Nutrition weight obesity control diets meal planning vitamins and minerals herbal supplements Exercise expressive movement relaxation meditation and mindfulness Writing for mental health promotion from structured protocols workbooks to less structured focused expressive and guided writing including diaries and autobiographies Sex sexuality affection intimacy and fear of intimacy Mother child bonding as well as couple and family

togetherness Spirituality and forgiveness in dealing with inevitable life hurts and disappointments Friendships and support groups Plus leading edge interventions including emotional intelligence animal companionship and computer technology Reviews of each promotional approach are engaging effective and consistent with standard psychological practice for lasting results either away from or in addition to non clinical and clinical settings schools hospitals seniorcitizen centers etc L Abate and his fifty colleagues have designed a future oriented sourcebook for mental and public health professionals who want to maximize their resources and those of their participants

Children's Peer Relations: Issues in Assessment and Intervention B. H. Schneider, K. H. Rubin, J. E. Ledingham, 2012-12-06 Willard W Hartup This volume amounts to an anniversary collection It was 50 years ago that Lois Jack 1934 published the findings from what most investigators consider to be the first intervention study in this area The experiment later replicated and extended by Marjorie Page 1936 and Gertrude Chittenden 1942 concerned ascendant behavior in preschool children which was defined to include a The pursuit of one s own purposes against interference and b directing the behavior of others Individual differences in ascendance were assumed to have some stability across time and hence to be important in personality development But ascendance variations were also viewed as a function of the immediate situation Among the conditions assumed to determine ascendance were the individual s status in the group as expressed in others attitudes toward him his conception of these attitudes and his previously formed social habits Jack 1934 p 10 Dr Jack s main interest was to show that nonascendant children identified on the basis of observations in the laboratory with another child were different from their more ascendant companions in one important respect They lacked self confidence And having demonstrated that Dr Jack devised a procedure for teaching the knowledge and skill to nonascendant children that the play materials required She guessed correctly that this training would bring about an increase in the ascendance scores of these children
