The Bloomsbury Handbook of Schools and Religion Jo Fraser-Pearce, James W. Fraser, 2023-09-21 The Bloomsbury Handbook of Schools and Religion provides the first truly global scan of contemporary issues and debates around the world regarding the relationships between the state schools and religion Organized around specific contested issues from whether or not mindfulness should be practised in schools to appropriate and inappropriate religious attire in schools to long term battles about evolution sexuality and race to public funding Fraser Pearce and Fraser carefully curate chapters by leading experts exploring these matters and others in a diverse range of national settings The Bloomsbury Handbook of Schools and Religion offers a refreshingly new international perspective *Resources in Education*, 2001 *Religion in the Primary School* Peter Hemming, 2015-02-20 Religion and its relationship to schooling is an issue that has become more and more topical in recent years In many countries developments such as the diversification of state school sectors concerns about social cohesion between ethnic and religious groups and debates about national identity and values have raised old and new questions about the role of religion in education Whilst the significance of this issue has been reflected in renewed interest from the academic community much of this work has continued to be based around theoretical or pedagogical debates and stances rather than evidence based empirical research This book aims to address this gap by exploring the social and political role of religion in the context of the primary school Drawing on original ethnographic research with a child centred orientation comparisons are drawn between Community and Roman Catholic primary schools situated within a multi faith urban area in the UK In doing so the study explores a number of ways in which religion has the potential to contribute to everyday school life including through school ethos and values inter pupil relations community cohesion and social identity and difference At the centre of the analysis are two key sociological debates about the significance of religion in late modern societies The first is concerned with the place of religion in public life and the influence of secularisation and post secularism on the relationship between religion and schooling The second relates to the increasingly multi faith nature of many national populations and the implications for religious citizenship in educational settings Religion in the Primary School will be a useful resource for academics researchers and students as a key addition to existing knowledge in the disciplines of education sociology and human geography It will also be of value to both policy makers and educationalists interested in the role of religion in schools and the implications for the wider community and society in a range of national contexts
