Religion and the Medieval and Early Modern Global Marketplace Scott Oldenburg, Kristin M. S. Bezio, 2021-10-28

Religion and the Medieval and Early Modern Global Marketplace brings together scholars from a variety of disciplines to examine the intersection conflict and confluence of religion and the market before 1700 Each chapter analyzes the unique interplay of faith and economy in a different locale Syria Ethiopia France Iceland India Peru and beyond In ten case studies specialists of archaeology art history social and economic history religious studies and critical theory address issues of secularization tolerance colonialism and race with a fresh focus They chart the tensions between religious and economic thought in specific locales or texts the complex ways that religion and economy interacted with one another and the way in which matters of faith economy and race converge in religious images of the pre and early modern periods Considering the intersection of faith and economy the volume questions the legacy of early modern economic and spiritual exceptionalism and the ways in which prosperity still entangles itself with righteousness The interdisciplinary nature means that this volume is the perfect resource for advanced undergraduates postgraduates and scholars working across multiple areas including history literature politics art history global studies philosophy and gender studies in the medieval and early modern periods

Money, Morality, and Culture in Late Medieval and Early Modern Europe Diane Wolfthal, 2016-12-05 One of the first volumes to explore the intersection of economics morality and culture this collection analyzes the role of the developing monetary economy in Western Europe from the twelfth to the seventeenth century The contributors scholars from the fields of history literature art history and musicology investigate how money infiltrated every aspect of everyday life modified notions of social identity and encouraged debates about ethical uses of wealth These essays investigate how the new symbolic system of money restructured religious practices familial routines sexual activities gender roles urban space and the production of literature and art They explore the complex ethical and theological discussions which developed because the role of money in everyday life and the accumulation of wealth seemed to contradict Christian ideals of poverty and charity revealing a rich web of reactions to the tensions inherent in a predominately Christian neo capitalist culture *Money Morality and Culture in Late Medieval and Early Modern Europe* presents a comprehensive multi disciplinary assessment of the ways in which the rise of the monetary economy fundamentally affected morality and culture in Western Europe

Money, Commerce, and Economics in Late Medieval English Literature Craig E. Bertolet, Robert Epstein, 2018-02-07 This is the first collection of essays dedicated to the topics of money and economics in the English literature of the late Middle Ages These essays explore ways that late medieval economic thought informs contemporary English texts and apply modern modes of economic analysis to medieval literature In so doing they read the importance and influence of historical records of practices as aids to contextualizing these texts They also apply recent modes of economic history as a means to understand the questions the texts ask about economics trade and money Collectively these papers

argue that both medieval and modern economic thought are key to valuable historical contextualization of medieval literary texts but that this criticism can be advanced only if we also recognize the specificity of the economic and social conditions of late medieval England Mortality, Trade, Money and Credit in Late Medieval England (1285-1531) Pamela Nightingale, 2020-07-21 The eleven articles in this volume examine controversial subjects of central importance to medieval economic historians Topics include the relative roles played by money and credit in financing the economy whether credit could compensate for shortages of coin and whether it could counteract the devastating mortality of the Black Death Drawing on a detailed analysis of the Statute Merchant and Staple records the articles chart the chronological and geographical changes in the economy from the late thirteenth to the early sixteenth centuries This period started with the triumph of English merchants over alien exporters in the early 1300s and concluded in the early 1500s with cloth exports overtaking wool in value The articles assess how these changes came about as well as the degree to which both political and economic forces altered the pattern of regional wealth and enterprise in ways which saw the northern towns decline and London rise to be the undisputed financial as well as the political capital of England **Religion and Society in the Medieval West, 600-1200** Henry Mayr-Harting, 2010 The papers reprinted here all have to do with the very varied ways in which religion made an impact upon or was intertwined with political and social life They span the period from 600 to 1200 with particular points of focus on early Anglo Saxon England Charlemagne the Ottonian empire and 12th century England In these articles the Oxford historian Henry Mayr Harting explores the religion of secular rulers the religion or relative lack of it of bishops and churches the religion of custodians at shrines or of recluses or artists as well as religious phenomena such as angelic apparitions conversion or apocalypticism Religious Poverty and the Profit Economy in Medieval Europe Lester K. Little, 1978
