Society Against The State:

Society Against the State Pierre Clastres, 2020-09-29 In this seminal founding work of political anthropology Pierre Clastres takes on some of the most abiding and essential questions of human civilization What is power What is society How among all the possible modes of political organization did we come to choose the monolithic State model and its accompanying regimes of coercion As Clastres shows other and different regimes do indeed exist and they existed long before ours regimes in which power though it manifests itself everywhere is nonetheless noncoercive In such societies political culture and cultural practices generally are not only not submissive to the State model but they actively avert it rendering impossible the very conditions in which coercive power and the State could arise How then could our own societies of the State ever have arisen from these rich and complex stateless societies and why Clastres brilliantly and imaginatively addresses these questions meditating on the peculiar shape and dynamics of so called primitive societies and especially on the discourses with which civilized i e political economic literate peoples have not ceased to reduce and contain them He refutes outright the idea that the State is the ultimate and logical density of all societies On the contrary Clastres develops a whole alternate and always affirmative political technology based on values such as leisure prestige and generosity Through individual essays he explores and deftly situates the anarchistic political and social roles of storytelling homosexuality jokes ruinous gift giving and the torturous ritual marking of the body placing them within an economy of power and desire very different from our own one whose most fundamental goal is to celebrate life while rendering the rise of despotic power impossible Though power itself is shown to be inseparable from the richest and most complex forms of social life the State is seen as a specific but grotesque aberration peculiar only to certain societies not least of which is our own Not for sale in the U K and British Commonwealth South Africa Burma Jordan and Iraq

The State against Society Grzegorz

Ekiert, 1996-09-30 Classical images of state socialism developed in contemporary social sciences were founded on simple presuppositions State socialist regimes were considered to be politically stable due to their pervasive institutional and ideological control over the everyday lives of their citizens impervious to reform and change and representative of extreme political and economic dependency Despite their contrasting historical experiences they have been treated as basically identical in their institutional design social and economic structures and policies Grzegorz Ekiert challenges this notion in a comparative analysis of the major political crises in post 1945 East Central Europe Hungary 1956 63 Czechoslovakia 1968 76 and Poland 1980 89 The author maintains that the nature and consequences of these crises can better explain the distinctive experiences of East Central European countries under communist rule than can the formal characteristics of their political and economic systems or their politically dependent status He explores how political crises reshaped party state institutions redefined relations between party and state institutions altered the relationship between the state and various groups and organizations within society and modified the political practices of these regimes He shows how these events transformed

cultural categories produced collective memories and imposed long lasting constraints on mass political behavior and the policy choices of ruling elites These crises shaped the political evolution of the region produced important cross national differences among state socialist regimes and contributed to the distinctive patterns of their collapse

Congress. Senate. Committee on the Judiciary. Subcommittee on Criminal Laws and Procedures,1973 The Role of Civil Society in Transitional Justice Selbi Durdiyeva,2023-09-01 This book examines how civil society engages with transitional justice in Russia demonstrating a broad range of roles civil society can undertake while operating in a restrictive political context Based on sociolegal research the study focuses on three types of civil society groups dealing with the legacies of the Soviet repression in Russia a prominent organisation that works on recovering historical truth the International Memorial a parish of the Orthodox Church of Russia operating at a former mass execution and mass burial site the Church at Butovo and contentious groups that could hinder attempts at reckoning and promote state narratives built on the Stalinist and WWII victory myths This book explores an often overlooked case of Russia s transitional justice from below It provides insights into how even in authoritarian contexts civil society can adopt imaginative piecemeal and at times unconventional ways of seeking justice outside and in the absence of official and institutionalised transitional justice measures This book will appeal to scholars of transitional justice memory studies human rights and democratic and civil society theory as well as policymakers and practitioners in these fields and others with interests in Russian and post Soviet studies Associations and the Chinese State: Contested Spaces Jonathan Unger,2014-12-18 What role do Chinese popular associations play in the expansion of civil society and democratization Under Mao few associations were permitted to exist while today over 200 000 associations are officially recognized Are they important foundations of civil society or vehicles for state corporatism and control In this book leading China specialists examine an interesting range of associations from business associations to trade unions to urban homeowners associations women s groups against domestic violence and rural NGOs that develop anti poverty programs The contributors find different important trends underway in different parts of China s economy and society Their findings are nuanced insightful and often not what might be expected **Politics and Government in Hong Kong** Ming Sing,2008-09-15 This book examines the government of Hong Kong since its handover to mainland China in 1997 focusing in particular on the anti government mass protests and mobilisations in the years since 2003 It argues that Hong Kong has been poorly governed since transferring to Chinese rule and that public frustration with governmental performance including anti subversion laws and slow democratisation has resulted in the regular and massive protests which have been rare in Hong Kong s past political development The book then assesses different explanations for Hong Kong s government problems including lack of social cohesion incomplete economic restructuring structural budgetary deficit severe social inequality intensifying cronyism and deficiencies within the political system itself It goes on to discuss the implications of poor governance for legislative elections civil society and constitutional development and considers the

prospects for the future It argues that although in the short term the Hong Kong government has managed to maintain its popular support ratings in the longer run it is unlikely to be able to maintain its legitimacy in dealing with the fundamental challenges of government unless the current system is replaced by popular election of the government with appropriate institutional capacity and political powers Transactions of the California State Agricultural Society California State Agricultural Society (Sacramento, Calif.),1874 The Legal Status and Perspectives of Ethnic Minorities in European States Magdalena Butrymowicz,2022-03-02 The way we exist in society defines our place in its social structures and reaffirms our belonging identity and dignity Europe is a continent characterized by many internal conflicts and ongoing struggles inside societies The battlefield is society itself where state law clashes with ethnic law over the very identity of society Exploring debates from Scandinavia to Spain about the religious and political autonomy and freedom this book explains that the violation of the rights of ethnic minorities and indigenous peoples such as the Sami and Basque peoples remains a problem in Europe In addition to these political conflicts Magdalena Butrymowicz analyzes the legal and religious culture within minority ethnic structures themselves Ultimately this book raises timely questions about the balance between state control and legal autonomy for ethnic minorities across Europe advocating for a new definition of ethnic law as the right of ethnic minorities creating their legal and ethnic identity The book will interest anyone exploring the dynamic between European states and the ethnic minorities that live in them **Society Against Itself** Howard S. Schwartz,2018-05-08 Political correctness involves much more than a restriction of speech It represents a broad cultural transformation a shift in the way people understand things and organize their lives a change in the way meaning is made The problem addressed in this book is that for reasons the author explores some ways of making meaning support the creation and maintenance of organization while others do not Organizations are cultural products and rely upon psychological roots that go very deep The basic premise of this book is that organizations are made up of the rules common understandings and obligations that the father represents and which are given meaning in the oedipal dynamic In anti oedipal psychology however they are seen as locuses of deprivation and structures of oppression Anti oedipal meaning then is geared toward the destruction of organization

The Political Economy of Civil Society and Human Rights Gary B. Madison,2002-09-10 Madison uses the concept of civil society and his distinctive version of communicative rationality to provide a closely argued and robust defence of the neo liberal political and economic tradition Writing with considerable elegance and humour the author draws on the hermeneutical and neo pragmatist traditions and on a diverse range of evidence and discussion mainly concerning transitional economies and societies in Eastern Europe and around the world Providing a systematic analysis of the multi faceted notion of civil society this book shows in detail how the three main orders of civil society the moral cultural the political and the economic constitute spheres of autonomy At the same time it illustrates how these different orders are closely interrelated and interact in a synergetic manner A unique feature of this study is the way in which the author

demonstrates how the logic of the various orders of civil society is in a way appropriate to the distinct nature of each order a logic of communicative rationality The work concludes by arguing that the only sure way of achieving international justice is by the construction of civil society world wide **Publications of the Rhode Island Historical Society** Rhode Island Historical Society,1896 From 1893 1900 the Publications of the Society include its Proceedings 1892 93 1899 1900
