**Introduction to Regional Englishes** Joan C Beal, 2010-11-26 A description of regional varieties of British English along with discussion of current research in dialectology variationist sociolinguistics      *The Handbook of Language and Globalization* Nikolas Coupland, 2012-09-17 The Handbook of Language and Globalization brings together important new studies of language and discourse in the global era consolidating a vibrant new field of sociolinguistic research The first volume to assemble leading scholarship in this rapidly developing field Features new contributions from 36 internationally known scholars bringing together key research in the field and establishing a benchmark for future research Comprehensive coverage is divided into four sections global multilingualism world languages and language systems global discourse in key domains and genres language values and markets under globalization and language distance and identities Covers an impressive breadth of topics including tourism language teaching social networking terrorism and religion among many others Winner of the British Association for Applied Linguistics book prize 2011      *Engaged Language Policy and Practices* Kathryn A. Davis, Prem Phylak, 2016-12-08 Engaged Language Policy and Practices re envisions language policy and planning as an engaged approach drawing on and portraying theoretical and educational equity perspectives It calls for the right to language policy making in which all concerned communities parents students educators and advocates collectively imagine new strategies for resisting global neoliberal marginalization of home languages and cultural identities This book subsequently emphasizes the means by which engaged dialectic processes can inform and clarify language policy making decisions that promote equity In other words rather than descriptions of outcomes the authors emphasize the need to detail the means by which local regional actors resist and transform inequitable policies These descriptions of processes thereby provide all actors with ideological pedagogical and equity policy tools that can inform situated school and community policy making This book depicts ways in which engaged language policy embodies the intersection of critical inquiry participant involvement and ongoing engaged language planning processes It further offers an alternative to the traditional top down approach to language education policy making Engaged Language Policy and Practices is essential reading for scholars teachers students communities and others concerned with worldwide language and identity equity      *Theories and Methods* Peter Auer, Jürgen Erich Schmidt, 2009-12-22 The dimensions of time and space fundamentally cause and shape the variability of all human language To reduce investigation of this insight to manageable proportions researchers have traditionally concentrated on the deepest dialects But it is increasingly apparent that although most people still speak with a distinct regional coloring the new mobility of speakers in recently industrialized and postindustrial societies and the efflorescence of communication technologies cannot be ignored This has given rise to a reconsideration of the relationship between geographical place and cultural space and the fundamental link between language and a spatially bounded territory Language and Space An International Handbook of Linguistic Variation seeks to take full account of these developments in a

comprehensive theoretically rich way The introductory volume examines the concept of space and linguistic approaches to it the structure and dynamics of language spaces and relevant research methods A second volume offers the first thorough exploration of the interplay between linguistic investigation and cartography and subsequent volumes uniformly document the state of research into the spatial dimension of particular language groupings Key features comprehensive coverage of the field in terms of theory and methods the unique volume stands alone since it neither is a handbook of dialectology or of areal linguistics nor a handbook on language variation alone gathers together a great number of distinguished scholars and experts in the field

**Intertextuality 2.0** Cynthia Gordon, 2023 Intertextuality is the overarching idea that all texts and conversations are linked to other texts and conversations and that people create and infer meanings in discourse through making and interpreting these links Intertextuality is fundamentally connected to metadiscourse when a person draws on or references one text or conversation in another intertextuality they necessarily communicate something about that text or conversation metadiscourse While scholars have long recognized the interrelatedness of these two theoretical concepts existing studies have tended to focus on one or the other leaving underexplored the specific ways in which these phenomena are intertwined at the micro interactional level especially online and for what purposes This interactional sociolinguistic study contributes to filling this gap by demonstrating how specific intertextual linking strategies both linguistic e g word repetition deictic pronouns and multimodal e g emojis symbols and GIFs are mobilized by posters participating in online weight loss discussion boards These strategies serve as a resource to accomplish the metadiscursive activities targeted at various levels of discourse through which participants construct shared understandings negotiate the group's interactional norms and facilitate engagement in the group's primary shared activity exchanging information about and providing support for weight loss healthful eating and related issues By rigorously applying the perspective of metadiscourse in a study of intertextuality Intertextuality 2.0 offers important new insights into why intertextuality occurs and what it accomplishes it helps people manage the challenges of communication

Choreographies of Multilingualism Tong-King Lee, 2022 Singapore boasts a complex mix of languages and is therefore a rich site for the study of multilingualism and multilingual society In particular writing is a key medium in the production of the nation's multilingual order one that is often used to organize language relations for public consumption In Choreographies of Multilingualism Tong King Lee examines the linguistic landscape of written language in Singapore from street signage and advertisements to institutional anthologies and text based memorabilia to language primers and social media based poetry to reveal the underpinning language ideologies and how those ideologies figure in political tensions The book analyzes the competing official and grassroots narratives around multilingualism and takes a nuanced approach to discuss the marginalization celebration or appropriation of Singlish Bringing together theoretical perspectives from sociolinguistics multimodal semiotics translation and cultural studies Lee demonstrates that multilingualism in Singapore is an emergent and evolving construct through which identities and

ideologies are negotiated and articulated Broad ranging and cross disciplinary this book offers a significant contribution to our understanding of language in Singapore and more broadly to our understanding of multilingualism and the sociolinguistics of writing

**Reimagining Rapport** Zane Goebel, 2021 To do ethnography a researcher must have rapport with research subjects But what is rapport Ethnography and ethnographic methods have increasingly become a feature of social inquiry in general and sociolinguistics in particular and rapport is generally considered a prerequisite for fieldwork And yet unlike related terms such as communication and phatic communion this concept has remained largely unexamined Reimagining Rapport turns a critical eye to the use of the term rapport across disciplines The collection analyzes the very idea of rapport both exploring how it has been shaped by historical forces and actors within sociocultural anthropology and questioning its usefulness Rather than viewing the term as simply denoting a type of positive social relationship that needs to be formed between researcher and consultant before research can begin this book invites us to reimagine rapport theoretically methodologically and meta methodologically Zane Goebel and other leading sociolinguists challenge readers to think about how rapport has been constructed within these disciplines and ultimately to see rapport as an emergent co constructed social relationship that is actively built during situated multimodal encounters The contributors collectively examine the role of ideology and mediation in the construction of rapport and argue that reconceptualizing research subject relationships is essential for establishing more sophisticated ways of understanding interpreting and representing research context A valuable resource for scholars and students of sociolinguistics and linguistic anthropology as well as for others engaged in ethnographic fieldwork Reimagining Rapport is the first collection to provide an in depth investigation of this critically important but previously unexamined concept
