Strange History Of Suzanne Lafleshe And Other Stories Of Women And Fatness:

The Strange History of Suzanne LaFleshe and Other Stories of Women and Fatness Susan Koppelman, 2003
Spanning a century from Kate Chopin and Fannie Hurst to J California Cooper and Elana Dykewomon this bold and deeply satisfying anthology of women s stories explores women s relationships to and perceptions of their physical selves Addressing the peculiarities the pleasures and the shames of body politics these stories of bodies that refuse to be contained offer a variety of perspectives on fully inhabiting the flesh Whether celebrating bodies deemed transgressive or simply daring to acknowledge that such bodies exist these diverse literary representations of fatness render the excessive body brilliantly unapologetically visible Book jacket *The Fat Studies Reader* Esther D. Rothblum, Sondra Solovay, 2009-11-04 Explores a wide range of topics related to body weight From the historical construction of fatness to public health policy from job discrimination to social class disparities from chick lit to airline seats this collection provides an overview of fat studies an examination of the movement s fundamental concerns and a look at its research *The Routledge International Handbook of Fat Studies* Cat Pausé, Sonya Renee Taylor, 2021-04-18 The Routledge International Handbook of Fat Studies brings together a diverse body of work from around the globe and across a wide range of Fat Studies topics and perspectives The first major collection of its kind it explores the epistemology ontology and methodology of fatness with attention to issues such as gender and sexuality disability and embodiment health race media discrimination and pedagogy Presenting work from both scholarly writers and activists this volume reflects a range of critical perspectives vital to the expansion of Fat Studies and thus constitutes an essential resource for researchers in the field **Women in the Trees** Susan Koppelman, 2004 A new edition of the groundbreaking anthology *The Hyper(in)visible Fat Woman* J. Gailey, 2014-11-19 In *The Hyper in visible Fat Woman* Gailey investigates the interface between fat women s perceptions of their bodies and of the social expectations and judgments placed on them The book explores the phenomenon of hyper in visibility the seemingly paradoxical social position of being paid exceptional attention while simultaneously being erased *The Biopolitics of Lifestyle* Christopher Mayes, 2015-12-22 A growing sense of urgency over obesity at the national and international level has led to a proliferation of medical and non medical interventions into the daily lives of individuals and populations This work focuses on the biopolitical use of lifestyle to govern individual choice and secure population health from the threat of obesity The characterization of obesity as a threat to society caused by the cumulative effect of individual lifestyles has led to the politicization of daily choices habits and practices as potential threats This book critically examines these unquestioned assumptions about obesity and lifestyle and their relation to wider debates surrounding neoliberal governmentality biopolitical regulation of populations discipline of bodies and the possibility of community resistance The rationale for this book follows Michel Foucault s approach of problematization addressing the way lifestyle is problematized as a biopolitical domain in neoliberal societies Mayes argues that in response to the threat of obesity lifestyle has emerged as a network of

disparate knowledges relations and practices through which individuals are governed toward the security of the population's health. Although a central focus is government health campaigns, this volume demonstrates that the network of lifestyle emanates from a variety of overlapping domains and disciplines including public health, clinical medicine, media, entertainment, school programs, advertising, sociology, and ethics. This book offers a timely critique of the continued interventions into the lives of individuals and communities by government agencies, private industries, medical and non-medical experts in the name of health and population security, and will be of interests to students and scholars of critical international relations, theory, health and bioethics, and governmentality studies. **Corpus** M. Casper, P. Currah, 2011-06-20

Corpus begins with the argument that traditional disciplines are unable to fully apprehend the body and embodiment and that critical study of these topics urgently demands interdisciplinary approaches. The collection's 14 previously unpublished essays grapple with the place of bodies in a range of twenty-first century knowledge practices including trauma, surveillance, aging, fat, food, feminist technoscience, death, disability, biopolitics, and race among others. The book's projected audience includes teachers and scholars of bodies and embodiment, interdisciplinary scholars and practitioners, and scholars interested in any of the substantive content covered in the book. The collection could be adopted in courses on the body at advanced undergraduate and graduate levels including cultural studies, queer gender and sexuality studies, body and power, biopolitics, intersectional approaches to the body, anthropology of the body, sociology of the body, embodiment and space, digital bodies, anthropology of knowledge production, health, illness, and medicine studies, science, knowledge, and technology studies, and philosophy and social theory. **Ms. Mentor's New and Ever More Impeccable Advice for Women and Men in Academia** Emily Toth, 2009

Ms. Mentor, a brilliant and irascible intellectual who never leaves her ivory tower, writes 14 columns full of perfect wisdom for academics. With wicked wit, she exposes viperous colleagues, teaching evaluation tricks, romantic pitfalls, tenure traps, and scholarly eccentricities. She spills the secrets that your adviser didn't dare tell you.
