effects on Argentine and Chilean foreign policies of domestic structures and international conditions The book seeks to determine the extent to which foreign policy provides opportunities for states to exercise political autonomy given the powerful constraints imposed by the multiple structures of the international system and how negotiation behaviour generated the path from conflict to cooperation between Argentina and Chile The author's focus on foreign policy aids the understanding of processes and decisions within Argentina and Chile during the Beagle crisis while utilising new theoretical approaches in the field of negotiation behaviour in Latin America

The Geopolitics of Security in the Americas Martin Sicker, 2001-11-30 Sicker examines the role of the United States within the Western Hemisphere and the geopolitical and geostrategic factors that have helped shape its policies in the region He demonstrates that such factors have contributed heavily to establishing the patterns of state development and interstate relations in the Western Hemisphere throughout its modern history The prevailing geopolitical environment has been conditioned to a large extent by the emergence of the United States as the unquestionably dominant power in the extensive region However that status did not exist at the time it achieved its independence It was brought about through almost incessant conflict with and expansion at the expense of other states nations and peoples over more than a century As a result the concerns and interests of the dominant power became and remain of necessity factors that states beyond the borders of the United States must take into consideration when pursuing their own national interests and policies As Sicker amply demonstrates failure to do so will often produce undesirable consequences for the offending state As is clear however the states of the hemisphere have their own geopolitical interests and concerns independent of and sometimes conflicting with those of the United States As Sicker shows throughout the volume and especially in his analysis of inter American conflicts many of the nations of Latin America have unresolved territorial controversies with their neighbors that date to their origins as independent states Because of this troubled geopolitical legacy there have been numerous conflicts among the states of Latin America some of which the United States has attempted to mediate or arbitrate and some that seem impervious to a permanent negotiated settlement This is a provocative analysis that will be of interest to scholars students researchers and policymakers involved with inter American relations and U S diplomacy

Defence Diplomacy and National Security Strategy Ian Liebenberg, Dirk Kruijt, Shrikant Paranjpe, 2020-04-20 The post cold war era presented security challenges that at one level are a continuation of the cold war era at another level these phenomena manifested in new forms Whether the issues of economics and trade transfer of technologies challenges of intervention or humanitarian crisis the countries of the South previously pejoratively labelled Third World or developing countries have continued to address these challenges within the framework of their capabilities and concerns The volume explores defence diplomacies national security challenges and strategies dynamics of diplomatic manoeuvres and strategic resource management of Latin American southern African and Asian countries

World Wide Weed Tom Decorte, 2016-02-11 For the majority of its history the cultivation of cannabis did not stand out at least compared

to the cultivation of other illegal plants Cannabis plantations like coca bush or opium poppy plantations were typically large in size grown by local farmers in a handful of developing producing countries processed and then exported to industrial consuming nations While cocaine and heroin are still produced in a handful of developing countries cannabis cultivation is increasingly universal From Europe to the Americas and Oceania import substitution in cannabis markets has been noticed in almost every developed country around the world with a notable aversion for discrimination Geographical technological cultural and economic factors help to explain why indoor and outdoor domestic cultivation is well established and why the nature and extent of cultivation varies so dramatically across the western developed nations As we start the second decade of the 21st century the new cannabis industry continues to fascinate both casual and academic observers of the drug scene Researchers around the world have become increasingly interested in the phenomenon aiming to describe and potentially explain the rapid switch from importation to domestic production in their own countries In bringing together some of the world s leading experts on cannabis cultivation this book contains sixteen chapters that take an interdisciplinary look at global trends in cannabis cultivation It will serve as an exemplar for wider discussions of key theories and concepts relating to the spread not just of cannabis cultivation but also of illegal markets more generally the actors that operate within these markets and the policies and practices that are employed in response to developments within these markets
