Poland's New Capitalism Jane Hardy, 2009-07-20 This book explores the way that neoliberal policies have formed the basis of political transformation in Poland championed by both post communist and post Solidarity governments Poland was central to the historic changes that took place across Eastern Europe at the end of the Cold War It is the largest economy in the region and was at the forefront of opposition to communism Since then neoliberal policies have controlled the country This book assesses the impact of these policies the role of capital in the form of transnational corporations and foreign direct investment The revival of trade unions and growth of new social movements are also explored as they challenge Poland's new capitalism

The International Political Economy of Transition Stuart Shields, 2014-10-03 Shortlisted for the 2013 BISA IPEG Book Prize this book explores how Eastern Europe's post communist transition can only be understood as part of a broader interrogation of neoliberal hegemony in the global political economy and provides a detailed historical account of the emergence of neoliberalism in Eastern Central Europe Adopting an innovative Gramscian approach to post communist transition this book charts the rise to hegemony of neoliberal social forces Using transition in

Poland as a starting point the author traces how particular social forces most intimately associated with transnational capital successful in the struggle over competing reform strategies Transition is broken down into three stages the first wave illustrates how the rise of particular social forces shaped by global change gave rise to a neoliberal strategy of capitalism from the 1970s It goes on to show how the political economy of Europeanization associated with EU enlargement instilled a second wave of neoliberalisation Finally exploring recent populist and left wing alternatives in the context of the current financial crisis the book outlines how counter hegemonic struggle might oppose a third wave neoliberalisation The International Political Economy of Transition will be of interest to students and scholars of international political economy post communist studies and European politics

Preying on the State Venelin I. Ganey,2013-08-15 Immediately after 1989 newly emerging polities in Eastern Europe had to contend with an overbearing and dominant legacy the Soviet model of the state At that time the strength of the state looked like a massive obstacle to change less than a decade later the state s dominant characteristic was no longer its overweening powerfulness but rather its utter decrepitude Consequently the role of the central state in managing economies providing social services and maintaining infrastructure came into question Focusing on his native Bulgaria Venelin I Ganey explores in fine grained detail the weakening of the central state in post Soviet Eastern Europe Ganey starts with the structural characteristics of the Soviet satellites and in particular the forms of elite agency favored in the socialist party state As state socialism collapsed Ganey demonstrates its institutional legacy presented functionaries who had become accustomed to power with a matrix of opportunities and constraints In order to maximize their advantage under such conditions these elites did not need a robust state apparatus in fact all of the incentives under postsocialism pushed them to subvert the infrastructure of governance Throughout Preying on the State Ganey argues that the causes of state malfunctioning go much deeper than the policy preferences of free marketeers who deliberately dismantled the state He systematically analyzes the multiple dimensions implications and significance of the institutional and social processes that transformed the organizational basis of effective governance
